FIRST BIENNIAL MESSAGE

OF

GOVERNOR JAMES N. GILLETT

TO THE

LEGISLATURE OF THE STATE OF CALIFORNIA

(THIRTY-EIGHTH SESSION)

1909

SACRAMENTO:

W. W. SHANNON, : : : : SUPERINTENDENT STATE PRINTING.
1909.

FIRST BIENNIAL MESSAGE OF GOVERNOR JAMES N. GILLET.

EXECUTIVE DEPARTMENT, STATE OF CALIFORNIA,
SACRAMENTO, January 4, 1909.

To the Senate and Assembly of the State of California.

The constitution provides that the Governor shall, by message, communicate to the legislature at every session thereof the condition of the State and recommend such matters as he shall deem expedient.

Our State is in a most flourishing condition. The financial stringency that prevailed a little over one year ago has passed away, and to-day we find our citizens busily engaged in all manner of enterprises. A bountiful harvest has added largely to our material wealth, our mines have yielded their usual amount of minerals, our commerce and trade have increased in volume, our cities have grown larger and many people have settled in our valleys and along our coast, and to-day a general air of prosperity pervades the entire State. All of our State institutions are doing well, and only harmony prevails among them. The damages sustained by some, by reason of the earthquake, are being repaired.

Financially the State has never been in better condition. At the end of the fiscal year June 30, 1908, there was a balance in the treasury of \$7,305,045.96. Of this amount there was, on September 28th, loaned out to the various banks of this State, as authorized by an act of the last legislature, the sum of \$4,257,350, for which a yearly interest of about \$85,000 is being paid.

STATE HOSPITALS.

The State Hospital at Agnews was entirely destroyed, and there is now being constructed at that place one of the finest and best equipped institutions of its kind which can be found anywhere. At other institutions for the insane fine cottages are being built which will add to their convenience and will be of great advantage in the care and proper treatment of acute cases.

The State Hospitals on June 30, 1908, had 6,555 patients; an increase of 565 in the two years since the last report was issued. This is an average increase each year for the last two years of 282 patients. It

will be found that the largest proportion of the increase, 333, was made in the year ending June 30, 1908. The average annual increase of the hospital population in the five years ending June 30, 1908, has been 155. For the five years ending June 30, 1903, the average annual increase was 118. The new patients received at the hospital for the two years ending June 30, 1908, numbered 3,019, the largest number received in any two-year period since the opening of the hospitals.

The number of new cases admitted to the hospitals is of much more importance in indicating the prevalence of insanity in a State than the numbers resident in the hospitals. Comparing the admissions of the last two years with previous biennial periods the figures are as follows:

1902 to 1904, admissions	2,582
1904 to 1906, admissions	2,939
1906 to 1908, admissions	3,019

Taking the figures adopted by the State Board of Health, 2,001.193, as the population of the State, we had in the State Hospitals on June 30, 1908, one insane person to every 305 of the general population. This is a much better showing for the State than in 1902, when the proportion was one in every 281. Since 1900 our insane population in State Hospitals has increased 24 per cent, while our general population has increased 33 per cent.

The total cost for maintenance, salaries and wages for the two years ending June 30, 1908, the fifty-eighth and fifty-ninth, was for the fifty-eighth fiscal year \$885,023.99, for the fifty-ninth fiscal year \$952,184.03, or a total for the two years of \$1,837,208.02. This sum does not represent the entire amount used for maintenance. The contracts for supplies let in June, 1907, for the fifty-ninth fiscal year, showed an advance in the main supplies used in the hospitals in some cases of 50 per cent.

Flour advanced 19 per cent.
Beef advanced 13 per cent.
Fuel oil advanced 50 per cent.

The above articles are given only as indications and because they are very large items of expense. With few exceptions the expenses have advanced in every line. Such an advance in cost of supplies was unexpected, and though appropriations were liberal they have been obliged to call upon the contingent fund to help out their support.

The total expenditures of the hospitals from support, salaries, and contingent funds for the two years ending June 30, 1908, were as follows:

Fifty-eighth fiscal year	\$1,001,007 21
Fifty-ninth fiscal year	1,073,117 32

The average annual cost of one patient for the five hospitals, including all expenditures excepting those made for permanent improvements, was \$178.

The total expenditures of the Home for Feeble-Minded Children for the two years were as follows:

Support and salaries fifty-eighth fiscal year.....	\$116,766 56
Support and salaries fifty-ninth fiscal year.....	137,895 18

At least three of our hospitals, Stockton, Napa, and Southern California, are obliged to care for more patients than they are able to accommodate properly. Additional buildings are imperatively needed at these hospitals. Agnews will be opened with a capacity of nine hundred on July 1, 1909.

SAN FRANCISCO HARBOR.

A large amount of work is being done on the water front in San Francisco in extending the seawall and in building new wharves and docks. The Harbor Commissioners of that port have managed its affairs exceedingly well, and to the entire satisfaction of the shipping and commercial interests of the State. They are making fine and lasting improvements, and are now constructing steel and concrete wharves and docks which, when completed, will equal any that can be found in any seaport city in the world. The water front is now being conducted on strictly business principles and no favoritism is shown to shipper or contractor. The belt railroad skirting the water front north of Market street is meeting with splendid success in a financial way and in the moving of freight, and it should be extended south of Market street so as to connect with the railroads and places of business existing in the southern portion of the city. This administration feels justly proud of the splendid management of the water front of San Francisco during the last two years.

The Commissioners have established a free market north of Market street, and another one should be established south of it to accommodate that section of the city. Eventually these markets will be a great benefit to the farmers and orchardists who look to San Francisco for a market, and also to the citizens of San Francisco.

STATE PRINTING OFFICE.

There will soon have to be built a new printing office, as the present one is dangerous and not suitable for the purpose for which it is being used.

The printing office has always been a large expense to the State, and its printing, as a rule, has cost more than if it had been contracted for

by private concerns. One reason has been that the office has not been properly equipped with up-to-date presses, machinery, and appliances. If we are going to maintain such an office, and it seems the policy of our State to do so, then we should place in it the best equipment that can be secured.

Two years ago I complained to the State Printer about the excessive cost of printing, and he promised then to endeavor to secure better results, and I am pleased to note that he has. To show the great saving that can be made, if proper machinery and appliances are installed, I desire to call your attention to the difference in the cost per page in printing the Secretary of State's report for the year 1906, compared with the present year, 1908. In 1906 it cost \$9.06 per page, and in 1908 \$4.50 per page. The reason for this great reduction is that the entire report this year was set on Mergenthaler machines, whereas in 1906 the work was done by hand.

Another splendid reason why the printing office should have the best of equipment is shown by the remarkable increase in the assets of the School Book Fund. On January 5, 1903, the assets of this fund amounted to \$137,671, and on June 30, 1908, it amounted to \$360,957, an increase in five and one half years of \$223,286, all of which has been largely brought about by the use of labor saving machinery installed during Mr. Shannon's first term.

The Superintendent of State Printing proposes to ask you for an appropriation to purchase three Mergenthaler machines, a gathering machine, a casing-in machine, two Miehle presses, a cloth-cutting machine, and several other machines that are necessary, and all of which I approve, if we are to continue the printing office any longer. There is no use making the State Printing Office the storehouse of old junk and out-of-date machinery. If it is to be run at all it should have the best and latest machinery. Then the one in charge can give no excuse for excessive cost of printing.

STATE PRISONS.

Our State Prisons are being carefully and economically managed, and the very best of order and discipline exist in both. The building for the criminal insane now under course of construction at Folsom will soon be completed and ready for occupancy. The prison wall around Folsom, which was very much needed, is satisfactorily progressing.

Plans have been adopted for a new prison building at San Quentin and the same is now being constructed. When this building is completed the congested condition existing there will be relieved, and we will have a very much needed up-to-date prison.

At the close of the fifty-eighth fiscal year there were 1,549 prisoners at San Quentin, and at the close of the last fiscal year the number had increased to 1,702, a gain of 153.

The Board of Prison Directors, in their biennial report to me, make a statement concerning the sale of jute grain bags, which is as follows: "We regret to report that the sale of grain bags during the past year has been much below the usual number, and, as a consequence, we have had to carry over from last year an excess of more than 2,000,000 bags. The reason we have been unable to dispose of this useful product of the jute mill has not been due to the fact that the price was excessive, but may be ascribed to the fact that the last legislature passed a law limiting our action and placing so many restrictions on the sales of bags that it is almost impossible to dispose of them. We believe the law defeats its own purpose. We believe that this law should be repealed and that the matter of the sale of the jute mill product at San Quentin should be entrusted to this board, giving them power to make rules and regulations for the sale of grain bags, subject to the approval of an advisory board consisting of the Governor, the Secretary of State, and the Attorney General." If the law passed by the last legislature has had the effect of preventing the sales of grain bags because of its provisions, then I recommend that the question of amending the bill as suggested by the Board of Prison Directors be considered.

At the commencement of my term of office I found many applications for clemency not acted upon by preceding Governors. In addition, there have been several hundred new applications made. To properly pass upon these, so that justice might be done, would occupy the entire time of the Executive to the exclusion of all other business. As a consequence, many cases fail to receive the attention they deserve, and some mistakes are necessarily made.

Our credit system furnishes a constant incentive to good conduct on the part of a prisoner. It may be accepted as a fact that a convict while under restraint, freed from the ordinary temptations of life, closely conforms to the prison rules. His daily gain of credits, his hope of parole and ultimate pardon, all tend to restrain him from wrongful acts.

Our present prison management, conducted along humane lines, working solely toward the material and moral welfare of those in their charge, has given this office extreme gratification. We must also attempt to devise a system which will tend to aid and assist a discharged prisoner to gain and retain the respect of his fellowmen.

The ordinary prisoner, upon release, is given clothing, five dollars, and a ticket to the place from whence he came. He may leave the prison with the best intentions, fully determined to redeem his past and

regain his former standing among men. It is a matter of common knowledge, how society lines up against him, how he is hounded from pillar to post, branded as an outcast, until finally losing all hope, he is driven back to crime and prison.

The parole system overcomes much of this. The prisoner goes directly from the prison to employment. He must refrain from entering saloons, or drinking liquor, must avoid evil companions and be frugal and saving. The good results of this system have been manifest. One paroled prisoner whom I pardoned had accumulated \$3,500 worth of property; another, now on parole, I understand has \$4,500 deposited in a bank. The combined bank deposits of all paroled prisoners aggregate \$39,776.03, a most creditable showing, in view of the fact that few have been on parole more than two years and many but a few months. At the same time, their conduct has been such that infractions of the rules have been reduced to the minimum. Less than 10 per cent have violated their parole since the adoption of this system, while 90 per cent have made good, and are now conducting themselves as honest, upright, and industrious men.

So striking were the results attained by this system, that I adopted the rule, as an additional incentive, that all paroled prisoners who conducted themselves as honest and upright men for a period of not less than two years, should receive a pardon after recommendation therefor by the Board of Prison Directors.

At the same time I adopted the further rule that no person eligible to parole, other than one establishing his innocence of crime, should be pardoned until he had first applied for and received a parole. The advantages of this rule are manifest. It places pardons under the merit system, removing all question of undue influence or improper motives. A prisoner receives his parole solely because his prison life has been such as to justify the prison board and prison officers in believing his conduct outside the prison walls will be commendable, and that he will make good in every respect. He receives his pardon because he has shown that their confidence was not misplaced. Both parole and pardon are based upon previous good conduct and nothing else.

Under our laws, the only prisoners eligible to parole are first termers. A second termers can not be paroled. This should be remedied. Equal privileges should be extended to all classes of prisoners, leaving to the Prison Board the determination of the suitability of the particular individual to receive parole. There is no reason to believe that this Board will abuse any discretion reposed in it, and there is much reason to expect good results from the release of many second termers under the wise provisions of the parole laws and regulations.

Prisoners confined in county jails and city prisons can only be

released after sentence, by pardon or commutation at the hands of the Governor. Many of these cases are meritorious, but the method of procedure is entirely too cumbersome, and the results in many cases unsatisfactory. Even when properly presented, the Executive is placed at a great disadvantage in giving a correct judgment. Some simpler means for obtaining a release, beneficial alike to the prisoner and to the people, should be provided. I would suggest that laws be passed vesting in county boards of supervisors and municipal legislative officers the power, under appropriate regulations and conditions, to parole prisoners confined in county jails or city prisons.

STATE ENGINEERING DEPARTMENT.

At the last regular session of the legislature an act was passed consolidating the Department of Highways and the Board of Public Works under the name of Department of Engineering. In addition to the duties devolving upon these former commissions there was delegated to said Department the duty of providing plans and specifications for and supervising all State work of every kind and character. As State Engineer, I appointed Nathaniel Ellery, former Commissioner of Highways. He immediately proceeded to organize the different departments under one general head. On account of inadequate office accommodations, the vast amount of new work due to the earthquake, the many new buildings provided for by law, and the necessity of carrying on work already undertaken by the former commission, his task has been herculean. At the present time, however, much of the work has been completed, and with one or two exceptions the balance is under construction.

A fair idea of the enormous amount of work devolving upon this Department may be had by the statement that plans and specifications, with full detail drawings, have been prepared for fifty-nine buildings at an estimated cost of construction of \$2,769,782. In addition thereto many other public works have been undertaken by this Department, notably the dams at Napa and the Veterans' Home, a water tank at Mendocino, a steel smoke stack and oil tanks at Agnews, and alterations in the San Francisco Ferry Building, besides all river and road work provided for by past legislatures.

In preparing plans and specifications the Department has exercised extreme care, and made the same most complete. Detail drawings, which are usually omitted by architects, have been prepared in every instance.

As an illustration of the thoroughness of this feature, I may say that upon the contract work at Agnews, amounting to over \$500,000, the extra work will be considerably less than \$1,000. This matter of extra work

has been a source of great expense to the State and much criticism by the public. It is the means ordinarily resorted to by the contractor to mulct the State upon public work, and I am happy to say that under this Department it has been practically eliminated. Detail drawings are usually prepared by the contractor and the cost of such preparation is figured as a part of the contract price. The completeness of the plans furnished by this Department is shown by the fact that where similar work has been done for the State and twelve sheets of drawings have been furnished, this Department has supplied twenty-five. The drawings at the State Normal School at San Jose alone covered 129 sheets. This has enabled contractors to estimate more closely the probable cost of buildings and has resulted in enormous saving to the State. Although the plans and specifications have been most elaborate and thorough, yet the cost has been kept well within the ordinary charges of architects. Upon new work the private architects' fees are 5 per cent, and would have been \$138,489 for the new buildings planned for the State. The expenses for architectural services under the Department of Engineering upon the above buildings have been \$71,307, with a resultant saving to the State of \$67,182.

In addition thereto, through the purchase of cement, there has been a further saving of \$83,000, basing the ordinary price of cement at \$2.10 a barrel in car load lots. These two items alone have justified the creation of this Department.

River and road work has been forwarded with like economy. The Kripp break, 1,600 feet long, was closed for \$8,448; Brannon Island break, 3,000 feet, for \$22,081. Only one half of the cost of each was paid by the State.

In dredging it is possible to compare the work with that done in the past by the State and United States. The cost of dredging under the Engineering Department in San Rafael Creek was .0589 cents a cubic yard; at Yuba cut-off it is .0785. The State paid, in years past 12½ cents on the San Joaquin cut-off and 15 cents a yard at Snaggy Bend. Under the government of the United States the cost of dredging in the Mormon Channel was 14 cents a cubic yard.

All our State roads are being constructed in mountainous regions, where, from necessity, the season for work is short. Progress, however, has been as rapid as could be expected. Upon the Kings River road an experiment in construction has been made by the purchase of a steam shovel. This seems destined to work a revolution in road work. Although only in use one month, the saving in labor has been approximately 40 per cent under hand labor. With the steam shovel the road is materially straightened. Points in the road are cut through, instead of going around, and fills are made with the material excavated. The

labor cost per mile with the shovel was \$1,330, as compared with \$2,330 by hand.

The report of the State Engineer has recommended some changes in the law relating to his Department. These are all worthy of consideration.

I would recommend that the Department have full and absolute control of all work done by day labor, and particularly the purchasing of supplies therefor. Day labor is only resorted to when, in the opinion of the State Engineer, the contract price is too high. If he undertakes to do the work for less than the lowest bidder, he should be placed in a position where he can take advantage of all matters affecting the cost of the work. Under the present law, the purchase of materials is done by the particular institution having the work performed. Their buyer is generally unfamiliar with prices of construction materials, and may seriously handicap the Department in economical results.

The Engineer has also recommended further additions to the statutory employees. These men are now employed, but are paid by the institutions requiring the work, in proportion to the time devoted to the particular service. It has been found, however, that work is required in many instances where no appropriation has been made. In such cases there is no way to pay for such services. The Engineering Department is compelled to pay for the same from their contingent fund or refuse to do the work. This has resulted in a depletion of the contingent fund. As these men must be retained, their employment should be of a character which will permit the State to secure full measure and the best results from such service.

Another matter that has prevented the Department from securing the best results has arisen from the present method of paying employees other than those mentioned by statute. At present their claims are prepared by the Department and forwarded to the institution for which the work is being done. At a subsequent meeting of the managers or trustees such claims are allowed. This all requires time, and where work is only partially completed these delays sometimes cover months. All this is most unsatisfactory. It can be obviated by creating a revolving fund of \$10,000 for the payment of employees at stated intervals, such fund to be replenished by the payment of the amounts due for labor upon public work into the State treasury to the credit of this fund by the institution owing the same.

RAILROADS.

Our State has not kept pace with the majority of the states of the Union in the enactment of laws regulating railroads and their business as common carriers.

Section 21, article XII of the constitution, provides that "no discrimination in charges or facilities for transportation shall be made by any railroad or other transportation company between places or persons, or in the facilities for the transportation of the same classes of freight or passengers within this State, or coming from or going into any other State."

That this provision of the constitution might be properly enforced the framers of it, by section 22 of the same article, created a Board of Railroad Commissioners and vested it with certain powers. This section provides that "said commissioners shall have the power, and it shall be their duty to establish rates of charges for the transportation of passengers and freight by railroad or other transportation companies, and publish the same from time to time with such changes as they may make. * * * Any railroad corporation or transportation company which shall fail or refuse to conform to such rates as shall be established by such commissioners, or shall charge rates in excess thereof, shall be fined," etc.

The foregoing provisions of the constitution are very broad, and if properly enforced would settle most of the complaints now existing and being made against railroads and transportation companies doing business in this State. If our present laws do not meet the conditions existing, that is, if they are not broad and far-reaching enough to prevent rebates and discriminations, then under the constitution the legislature has the power to enact laws that will.

Section 24, article XII, provides that "the legislature shall pass all laws necessary for the enforcement of the provisions of this article." Notwithstanding this mandate of the constitution, no act of the legislature has been passed since the adoption of the constitution, except one approved April 15, 1880, entitled "An act to organize and define the powers of the Board of Railroad Commissioners." This act is entirely insufficient. It does but little more than to organize the Board, fix the salaries of the members, and of the secretary, bailiff and stenographer, locating its office in San Francisco, and providing for its meetings. The other provisions of the act have proven to be inadequate to afford sufficient relief or grant an adequate remedy against rebating and discriminations in the past, which is claimed to have been carried on by common carriers in this State. The act should therefor be amended, or entirely repealed, and a new law passed to take its place, which will contain the necessary provisions to meet the requirements of the con-

stitution, and put an effectual stop to rebating and discriminations that might hereafter occur. The acts constituting discriminations and rebates should be clearly defined and prohibited, and a penalty attached sufficient to prevent the same, such penalty to be applied alike to the company and to the shipper, for one who knowingly receives any advantages or favors which are not equally extended to other shippers, and which the law prohibits, should be held equally guilty with one who grants them. The violation of the law should be punished by fine or imprisonment, or by both. The law should be so drawn that an offense of rebating is committed when it appears that freight has been shipped at a cost less than the published rates. This is important because it may be impossible to secure any other evidence to show that a person has received favors which are denied to others, but if the offense has been committed when freight has been carried for a less rate than the published rate the proof can be easily secured. A schedule of rates to be charged by transportation companies should be posted in a conspicuous place in the office of the commissioners, where the public can have free access to it. The rates to be fixed should be fair, just and reasonable, affording a reasonable return to the companies for services rendered, and when so established should be strictly observed by the companies.

The question of transportation is a most important one in this State, and as our country develops, our population increases and our commerce expands, it will be one of the greatest problems our people will have to deal with. Our railroads are great factors in the development of the resources of our State. They bring communities together so they can quickly and cheaply do business with each other. They are common carriers whose duty it is to extend to one citizen the same advantages in shipping as are extended to others, and the public should at all times be in their confidence. But this can not be if secret rebates are to be given to a favored few, nor if facilities in transportation are to be granted to one and withheld from another. A common carrier possessing certain franchises and privileges granted by the sovereign power of a State, which others do not enjoy, is a public servant whose duty it is to serve every member of the public alike, and no favors or advantages should be extended to one which others are not to receive, as this will give the favored one an undue advantage over his competitor in business which he ought not to enjoy. The question of passes or free transportation should be covered by proper restrictions along the lines followed by Congress in the recent amendments to the Interstate Commerce Act. During the last few years there has been an abundance of legislation passed in the different states and by the National Government regulating railroads and their charges, and from these many acts it will be an easy matter to formulate a bill which will accomplish everything sought for, and which will be fair and just to

both the public and the transportation companies. Our State is very much in need of such legislation, and I trust the same may be enacted.

There should also be made a more liberal appropriation for the uses of the Commissioners than has been made in the past. There must not be a lack of funds if the Commissioners are expected to vigorously enforce the law. As to the amount required, the Commissioners and Attorney General can give the necessary information; but it should be sufficient to enable the officers of the law to properly enforce it. The penalties fixed for the violation of the law should be sufficiently large to insure its observance, and to justly punish those who break it.

GOOD ROADS.

For some time there has been an agitation in this State in favor of good roads, and I believe that the sentiment of the people to-day strongly favors the construction of a system of State highways running through the center of the State and along the coast, connecting all the counties and principal centers of population. There is no state in the Union that would derive a greater benefit from a system of good roads than California. We are engaged in raising products that require great care in transportation. Our fruit is easily injured, and to prevent bruising and great damage good smooth roads should be constructed over which to transport it to the markets of the State, or to the railroads for shipment. No state can be more favorably situated than ours for such a system, and no place offers greater advantages. Starting from the north a road can be built through the great Sacramento and San Joaquin valleys, connecting with San Francisco, and also crossing the mountains to Los Angeles. From this city roads can be constructed to the east and south touching all important places, and down the coast to San Diego. Another road can start from Los Angeles and pass along the coast, traversing the Salinas and Santa Clara valleys and continuing north through the bay counties and along the northern coast to the Oregon line. Such a system of highways will reach the most important and most populous parts of the State. They will develop the country through which they pass and will offer a great inducement to settlers to locate along their route and build homes.

There is no way of estimating the great advantages of such a system, and the part it will play in the development of the rural portions of our State, and the increased wealth it will add to the sections through which it passes. The conditions for constructing and maintaining such highways are very favorable. The climate is all that can be desired; there is no frost and frozen earth to contend with, the soil is all that can be asked for, and there is an abundance of good rock and plenty of cheap oil to build the very best of roads. Such a system of roads would annually induce thousands of tourists to visit our State for the pleas-

ures of automobilizing. No country in the world offers such opportunities and advantages for this pleasure as our State does. There are no storms, no rough and unsettled weather, but from spring until late in the fall there is constant sunshine and balmy air. The tourist can ride for miles through our orange groves, our vineyards, our orchard bearing fruit of every kind, through our beautiful valleys, along the coast and shores of the ocean, into our immense forests, and lastly to the Yosemite and across the mountains to Tahoe. Many, on such trips, would be impressed with the wonders and beauty of our State, and would invest here and make their homes among us, adding largely to our wealth and population. That such a system will be of great advantage to our State no one can well deny. If we wait for our counties to build a system of good roads many years must pass, and when completed the roads will not be uniform and many not go where they should, but might pass along some less desirable route, because some interested supervisor wanted them there. If the State undertakes to build the roads they will be completed within a reasonable time, constructed of good material, the work will be under the charge of skilled and experienced road builders, and will be laid out along the most favorable route without regard to individual interests. To build such a system of roads will require the expenditure of about \$18,000,000. This amount can be raised by a State bond issue, and it can be so arranged that the principal shall be paid by the State and the interest by the counties through which the highway passes, based upon the exact amount of money expended in that county for the construction of such highway. The supervision and maintenance of the roads, when completed, should always be under State control to insure necessary repairs and to maintain them in a proper and suitable condition. The question of bonding should be submitted to a vote of the people, and I recommend that legislation for that purpose be enacted. The State will never feel the burden of the bonds, and the wealth which such a system will directly add to our State will far exceed the amount invested, to say nothing of the great advantages such highways will be to our people. The necessary legislation to carry out the building of such a system will be submitted to you for your consideration and you will be asked to pass the same, thereby submitting the whole question to the voters of the State for their approval.

BANKS.

During the summer and fall of 1907 a money stringency existed all over the country and was also felt largely in foreign nations. It came at a time when the country was apparently in a most prosperous condition, when the people were well to do, when all lines of industry were active and large returns were being received from abundant crops of every character. Our State was affected equally with other places,

and we found ourselves without sufficient funds to carry on our ordinary business and none at all for new enterprises. Our money was locked up in the East and Eastern bankers refused to return it to us. Several banking institutions of the State were forced to close their doors and their affairs are now in the hands of a receiver and are being settled for the benefit of the depositors. In order to protect our banks and prevent great financial distress among the people, it became necessary to declare a series of holidays, and finally to call an extra session of the legislature. At this session a joint committee, composed of members of the Senate and Assembly, was appointed to investigate the causes of this money stringency, and more particularly to examine the banking laws of the State and to propose such amendments thereto as might be necessary. This committee has held meetings in different parts of the State, and has been greatly aided in its work by the legislative committee of the California Bankers' Association. This joint committee will present to the legislature a draft of a bill to regulate the business of banking, which, if enacted into law, will cure many of the evils heretofore existing and will give to this State a code of banking laws unexcelled anywhere.

Our State has been very backward in the enactment of laws affecting banking, and it is very important that this business, which means so much to the welfare and prosperity of a community, and which controls and handles the money of the people, shall be so safeguarded and regulated by law that the depositor will be fully protected and the business and various enterprises of the State not injured by unnecessary bank failures.

Every commercial bank, individual banker, and every trust company doing a banking business should always have on hand, at all times, a sufficient reserve in money to secure its safety, and this reserve should be kept in the State and not sent abroad, as has too often been the case. The present law requires that every commercial bank shall have always on hand an amount equal to 15 per centum of its deposits, but there is no penalty provided for its failing so to do. This amount should be increased to at least 20 per cent, and a severe penalty imposed for a violation of the law. During the late financial stringency some of the banks of this State had on hand as low as 5 per cent of their deposits, and many had less than 15 per cent, as required by law—a most dangerous condition for any bank to be in, and one showing an utter disregard for the safe protection of its depositors.

I have inquired of many of the leading bankers of this State how large a percentage of the deposits should always be kept on hand to insure safe and conservative banking, and their answers range invariably from 20 to 30 per cent. This being so, it is quite evident that 15 per cent is entirely too small. It is true that the laws of New York fix the amount

at 15 per cent, but the laws of the United States regulating National banks fix the sum at 25 per cent in some cities and 20 per cent in others. Twenty per cent is certainly small enough, and this gives to the banks 80 per cent of the people's money, together with their capital stock and surplus, to do business on, and this should be sufficient.

While we are enacting laws for the protection of the public, as well as for the security of the banks, we should do so along safe and conservative lines. As before stated, this reserve fund should be kept in this State and not deposited in Chicago, New York, or in some other city outside of the State, because the banker depositing it there can realize a good rate of interest thereon. This money is for the protection of the depositors, and should be where it can be reached upon short notice. At least three fifths thereof should remain in the bank's vaults, and not more than two fifths deposited in other banks in this State, and only then in such banks approved by the Superintendent of Banks as a depository of lawful money reserve; and such bank should be required to have on hand at all times not less than 25 per cent of its deposits, exclusive of State, county, and municipal deposits.

One of the great evils in banking has been the loaning of the funds of the bank to its officers and employees. To this practice can be traced the cause of most bank failures. No money of a bank should be loaned to any of its salaried employees, and the making of such a loan should be penalized, and the directors who consented thereto or acquiesced therein should be held personally responsible therefor.

I do not believe that it would be good policy to enact a law absolutely prohibiting a bank from loaning money to any of its directors, because this would tend to keep our most progressive and best business men off the Board of Directors, and the business of banking would be injured thereby; but such restrictions should be placed around such a loan as will fully protect the bank from loss, and the amount which such an officer can borrow should be limited to a certain per cent of the bank's paid-up capital and surplus. If loans are to be made to the directors of a bank, or to a stockholder owning at least one third of the capital stock, then such a loan should be reported at once to the Superintendent of Banks, together with a list of the securities given by the borrower. If the Superintendent shall deem the securities insufficient, he may require other security to be given, and if this is not done he should have the power to require the loan to be called in at once and canceled. The Superintendent should also have the authority to require every officer and director of a bank borrowing money therefrom to submit to him a sworn statement of his assets and liabilities.

Some limitations should be placed upon the amount of money any person, company, corporation, association, or firm can borrow from a bank; otherwise a bank may have all of its funds practically loaned to

one concern, and if it becomes involved in losses or fails in business then the bank fails, too. No person or company should be permitted to borrow altogether more than 25 per cent of the capital stock of any bank actually paid in and surplus, and on all loans in excess of 10 per cent thereof security should be given worth at least 15 per cent more than the loan. If more than such an amount is loaned, or if it is loaned upon security less in value than the loan, then the directors who permitted it or acquiesced therein should be severally and jointly liable for any loss which the bank might suffer therefrom.

There are many important matters which are to be considered in drafting proper banking laws which can not be considered in this message, and I trust that you will give the questions your most serious consideration, and enact only those laws which will be fair to all interests and which will give the best protection possible to the depositor. Our State is badly in need of such legislation, and I shall expect good results from this session.

STATE FARM AND SCHOOL FOR ORPHANS.

One of the most important and serious questions confronting our State is the care, education, and training of our orphan and dependent children. There are now in orphan asylums about five thousand children, and outside of asylums and supported by boards of supervisors about two thousand more. During the last four years the State has expended for the support of these children an average of \$432,792 per year. Under the law State aid ceases when the child reaches the age of fourteen, and the different institutions caring for them, no longer receiving this aid, naturally get rid of them as soon as possible. Some find homes with good families, while many are left to drift about, caring for themselves as best they can. None of them have the age or experience to look out for themselves properly, and they are easily led into ways of life that are bad for them, with the result that many of the girls find homes in Magdalen asylums, or worse places, while many of the boys are sent to reform schools or prisons, and once more become a public charge.

The State should do everything it can to help these unfortunate children, and make of them good and useful citizens. When a boy or girl reaches fourteen years of age they ought not to be turned out into the world without friends, money, or advice, to commence the struggle of life alone, but should be placed in some institution where an education can be secured and a trade or some useful occupation learned.

In my judgment the State ought to purchase a tract of good farming and dairying land, build thereon homes and schools for these children, teach the boys trades and instruct them fully in agriculture, horticul-

ture, and viticulture; instruct the girls in domestic science and fit them for useful lives. Our State offers splendid opportunities to those who desire to engage in agricultural pursuits, and no greater service can be rendered these children than to educate them to appreciate country life, and to induce them to settle in rural districts and help to develop the wonderful resources of our rich valleys. The girls, after a four years' course in domestic sciences, can find employment anywhere in good families, and with their training and experience will be well equipped to enter into the life of our State and perform their duties as servants or mothers. What we want is a high-class citizenship, and the foundation for this is a good education and the knowledge of some useful employment. As parents we are doing our duty toward our own children in fitting them for life, and as a great State we will not be doing our duty unless we give to our orphan children that fostering care and education which will fit them for the responsibilities of good citizenship.

A school of the kind referred to would have from five to seven hundred in attendance, and if properly managed and conducted and favorably situated upon good and fertile land would be self-supporting, or nearly so. But no matter what the cost might be, the good results that would flow therefrom would more than compensate this State for any sums of money expended in its support.

In carrying out such a plan I recommend that an appropriation of \$125,000 be made with which to purchase a site and to prepare plans for necessary buildings, and that a commission be appointed by the Governor to select the same and report thereon. After this has been done, the necessary steps can be taken to improve the place and carry out the proposed purposes, and when completed the State will have finished an institution which will be productive of better results than any institution we now have.

IMPROVEMENT OF OUR NAVIGABLE STREAMS.

Ordinarily the improvement of a state's navigable bays and rivers is carried on by the Government, and this has been generally done in our State. But conditions may exist where it is for the best interests of the State to give assistance in this public work by offering to bear a portion of the expense. Such a condition now exists in our State with reference to the Sacramento and San Joaquin rivers. These two large streams form splendid waterways for the great valleys which they drain, and every year are growing in importance from a commercial standpoint. Much work is required to put them in a condition to properly carry the large tonnage which in a few years will be produced upon their very banks, and to so prepare them improvements should

begin at once in deepening their channels, straightening their courses, and performing such other work as may be necessary to maintain and preserve such channels.

The improvement of these streams will encourage the reclamation of thousands of acres of fertile lands lying along their banks; and it may safely be said that by the time the rivers are dredged the adjoining lands will be reclaimed. This will add greatly to the wealth of our State, and will provide homes for thousands of families and wonderfully increase the population of these valleys. Nowhere can richer and more fertile soil be found than that lying along the Sacramento and San Joaquin rivers; a soil capable of producing all kinds of cereals, vegetables, and fruits in large abundance, and here some day will be the most populous and wealthiest sections of our State.

The Sacramento and San Joaquin rivers will be the great arteries that will carry the commerce of this most prosperous section to the sea, and some day their capacity will be taxed in so doing.

United States engineers have recommended that the improvement of these two rivers be carried on jointly with the State, and a bill is now pending in Congress appropriating the sum of \$400,000 to be available upon the State appropriating a like amount. Last winter I went before the River and Harbor Committee of the House and urged the passage of this bill, and assured the members thereof that if this amount was appropriated the State of California would do its part. This would provide a fund of \$800,000 to commence the work, and further appropriations can be made from time to time until it has been entirely completed and the two rivers put in splendid shape for navigation.

I trust that we may not be disappointed in this great public improvement, and that everything may be done on the part of the State necessary to be done to accomplish the result desired. I know of nothing that can bring better returns to our State than the dredging of these rivers and the reclamation of the thousands of acres of fertile soil which must inevitably follow this work. The scheme will be too large for the State alone to handle or for private parties to undertake, but can be easily accomplished when the Federal Government, State, and private interests work together.

THE STATE BOARD OF EQUALIZATION.

This Board has compiled a very comprehensive and statistical report touching upon all matters falling under its jurisdiction. I particularly invite the attention of the legislature to that portion of the report on the subject of equalization of county assessments, beginning on page 12. There is no doubt a great disparity exists in the assessments as between the several counties. This is fundamentally wrong. Each county should contribute its just share of taxes for support of the State government,

but to do this we must have equality and uniformity of assessment. I am aware, also, that this Board is seriously handicapped for funds with which to prosecute its work in collecting data in the several counties, and in proving the reports of railroad companies made to the Board. The Board should be authorized by law to employ experts for these purposes and to pay them a reasonable compensation for their services. I, therefore, recommend that the legislature make a reasonable appropriation for these purposes and place the same at the disposal of this Board.

REVISION OF REVENUE LAWS.

In my inaugural message I urged upon the legislature "the advisability of changing or amending our revenue laws and substituting a system which is more modern and which will meet the conditions of to-day." Pursuant to this suggestion the legislature submitted to the people an amendment to the constitution of the State designed to separate State from local taxation as to sources of revenue. This amendment was carefully prepared by the State Commission on Revenue and Taxation, and would, in my opinion, have been approved by the people had it been fully understood by them. It met with defeat by a narrow margin.

The large vote in favor of this amendment, taken together with the statements made in the public press and elsewhere by those opposed to certain features of the measure, shows conclusively that there is a widespread and intense desire to get away from the old and unequal system of taxation under which the people now suffer. Moreover, the essential feature of the amendment, namely, the selection of sources of revenue for the State, separate from those used by the local governments, appears to have met with almost universal approval. In fact, a very large and influential group of opponents objected to the amendment on the ground that it did not expressly provide for complete and permanent separation. It appears, therefore, that if an amendment to this end can be drafted which will eliminate some or all of those comparatively minor features contained in the old one, to which specific objections were raised, it will meet with the hearty approval of the people. While these objections may not be valid, they appear to be put forward in all sincerity, so that if they can be removed without sacrificing the main feature of the scheme, namely, separation, it may be wise to make such concessions.

The necessity for this reform remains just as strong as ever. The farmers, especially, in many parts of the State, and to a lesser extent the small real estate owners in the cities, are still heavily overtaxed. Many classes of corporations are very inadequately taxed, and there are glaring inequalities between different corporations in the same class. The counties and cities are still hampered in their efforts to improve

their local or home finances by the necessity of always having to consider the danger lest they may have to pay too great a share of the State tax. The old system is still full of rank injustice, which no amount of zeal on the part of the assessing officials can remove because of the restrictions in the law. It is moreover capable of abuses for which no adequate remedy exists.

To be sure, much good has already resulted from the discussion of the evils in our present system of taxation and from the revelations of shocking inequalities therein as a result of the investigations made by the Commission on Revenue and Taxation. Thus, for example, the taxes paid by the steam railroads and the street railroads have been largely increased during the past two years by the efforts of the State Board of Equalization, and of the assessors, who have acted in accordance with the suggestions made by the Commission. The taxes on the property of these groups of corporations are now very nearly equal to, and in some cases probably in excess of, those paid on real estate in general and on such other classes of property as are fully taxed under the present system. It is estimated that this partial application of the ideas formulated by the Commission has added upwards of two million dollars annually to the aggregate revenues of the State, counties and cities from sources heretofore undertaxed. But that these results will be permanent if the old system of taxation is continued is more than doubtful. Judged in the light of our past experience and by the experience of other states it will not be so. A relapse into the old state is to be expected as soon as the temporary stimulus is removed. The sporadic character of those improvements is itself a condemnation of the old system of taxation. What we need is a system of taxation simple, uniform, certain, and sure.

Furthermore, the improvement is not universal. It is limited to some conspicuous classes of corporations. Under the present system the banks are taxed unequally, one with another, and in many cases very inadequately. No remedy for this is possible without a constitutional amendment. It is equally impossible, under the present system, to impose adequate taxes upon express companies, car companies, telegraph and telephone companies, and the light, heat, and power companies. Nothing is clearer than that the business and property of these classes of corporations should be taxed as a unit. The attempt to assess such property piecemeal, where it may be found, scattered about in several counties, results in an assessment, as if it were mere old junk, of property which when used by a going concern has a far different value.

It is my conviction that the system of taxation embodied in the amendment voted upon by the people at the last election would have remedied these evils to a very large extent, and would have opened the

way to still more effective reform in the future. This conviction is based upon the following facts:

First—Complete separation of State from local taxation would have been possible under this amendment, even the first year. That is to say, the sources of revenue set apart for the State would have yielded in 1908 over \$7,500,000, and the ad valorem tax levy for that year was \$7,188,799. Hence, if the new system had been in force in 1908 no State tax levy on general property would have been necessary.

Second—Very considerable relief would have been afforded the over-taxed farmer and small real estate owner, especially in those districts which had heretofore suffered most under the inequalities of the old system. There would in 1908 have been an average saving of 18 cents per \$100 assessed valuation in the county tax rates. If the State tax rate had been up to the normal of 50 cents, and if complete separation had been achieved, the average saving to the small taxpayers would have been 28 cents in tax rate.

In this connection it is permissible to digress long enough to point out that the State tax rate in 1908, 40 cents per \$100, was the lowest adequate State tax rate in the history of the State. The only lower State tax rate ever levied was that of 1902, amounting to 38.2, and that one was so inadequate that it left the cupboard absolutely bare and forced the government to all sorts of makeshifts to meet its obligations. The low tax rate of 1908 is due to the wise economy exercised by the legislature under my advice in making appropriations for the current fiscal year. Yet every branch of the State government has had sufficient funds for all necessary purposes. The legislature of 1907 and the executive departments may both take a pardonable pride in this unsurpassed record of economy achieved without loss of efficiency.

Third—The new system would have automatically equalized the burden of taxation among the different classes of taxpayers.

Separation of State from local taxation is not a new scheme in this country. It has been tried out in many states, and others are moving in the same direction. The plan has the endorsement of the great National Tax Reform Association, which is composed of the leading tax experts in the country, together with the official representatives of the different state governments. Practical separation, in one form or another, has already been achieved in the following states: Pennsylvania, New York, New Jersey, Connecticut, Wisconsin, Minnesota, Ohio, Michigan, and Virginia, while Missouri, Louisiana, and several others are moving in the same direction. The subjects selected for state taxation vary from state to state, and the methods of determining the taxes to be paid by the subjects so selected vary also. Each state builds on its own historical foundations and develops a system suited to its own peculiar conditions.

The degree of separation attained differs also from state to state. In some it is complete, in others it is only partly so. A small tax on the subjects which contribute to the support of local government is not regarded as in any way lessening the advantages of separation. Thus Wisconsin boasts of being a "taxless state" in the sense that individual property owners do not contribute to the support of the state government in the narrower sense. But she nevertheless imposes a general tax for school purposes known as the "mill tax" (10 cents per \$100 of assessed valuation), the proceeds of which are distributed among the schools in a manner similar to that in which our State school funds are distributed.

Some states which have separation and some which do not, notably Maine, tax public service corporations on the basis of gross earnings, others on the basis of a valuation or appraisalment of their property. The latter depends for its success mainly upon the personnel of the board which makes the valuation. It appears to be successful, at least for the time being, in Wisconsin, where it is administered by a strong board of very highly paid men appointed by the Governor for a long term, and retiring from office, one at a time, in such manner that it would take several administrations to entirely change the complexion of the board. The Wisconsin board is vested with most extraordinary powers. New Jersey has recently inaugurated a plan similar in its main features but different in detail, which bids fair to be quite successful. The same system in Michigan is, however, an admitted failure, the board in charge being hampered by too many restrictions in the law and by lack of power. The former system, namely, taxes based on gross receipts, has much to commend it in the way of simplicity and efficiency. By my advice the State Commission on Revenue and Taxation sent its secretary, and the State Board of Equalization likewise sent its secretary, to St. Paul, Minnesota, and to Madison, Wisconsin, to study the operation of the tax systems of those states. They returned, bringing a very glowing report of the success of the gross earnings tax in Minnesota, where it has been in operation for many years. The Governor of that state, the State Auditor, and the Railroad and Warehouse Commission, which have active charge of the administration of the tax, were unanimous in giving the system a most hearty endorsement. The only objection to the gross earnings tax seems to be that the average taxpayer and voter has difficulty in understanding that a gross earnings tax can be levied which is equivalent to the taxes levied on the basis of a valuation of property. He is prone to demand that the same method of taxation and the same rates shall be applied to all classes of property, and fails to realize the great difficulty involved in making a valuation of such complex properties as those used by public service

corporations. It is probable that this feeling on the part of voters contributed largely to the adverse vote on the last amendment.

In view of the foregoing considerations, and feeling that tax reform is one of the most urgent matters requiring your attention, I have, in my capacity as ex officio chairman of the State Commission on Revenue and Taxation, called upon that body to draft a new amendment to the constitution providing for a new system of taxation. This will be submitted to you at this session, and I recommend it to your most careful consideration, trusting that you will give it your best thought. The Commission is, as you know, composed of able, careful, conservative men, who have been earnestly and diligently studying this problem for over three years. They have gathered all the data necessary to reach a wise conclusion, and their recommendations are entitled to great respect. Were it not for the existence of this Commission, with its accumulation of knowledge and experience, it would not perhaps be wise to propose a new amendment at this time. But under the circumstances it is not necessary to delay the matter for further investigation. The taxpayers should be given another chance to obtain the needed relief at once and while their attention to the matter is aroused.

I further recommend that an appropriation be made to continue this Commission for another two years. If a new amendment is submitted to the people by you the Commission can, in the interval which must necessarily elapse before it is adopted by the people, prepare the statutes necessary to put it into effect and gather the data necessary to show to the people how the plan will work.

INSURANCE.

The last legislature passed some very important insurance laws regulating insurance companies and insurance business in this State. The passage of these laws, as anticipated, has accomplished all that was hoped for.

There was also enacted a law presenting a standard form of policy of insurance to be used by all companies writing insurance in this State. This law contained many excellent features, but also contained certain provisions that were opposed alike by the insurer and insured. Many of the best companies doing business in the State threatened to withdraw their agencies if the act in that form became a law, and the large business interests of San Francisco also strenuously opposed its passage. When the bill was before me for consideration, and was being bitterly opposed because of certain provisions which it contained, I asked Mr. Jones, an expert employed by the State to draft proper insurance laws and a standard form of policy, if he had been left alone to follow his own judgment as to what was fair and right, if he would

have prepared the standard form which he was then advocating and which the legislature had passed, and he very frankly admitted that he would not. Being then firmly of the opinion that the contract of insurance as contained in this proposed law was wrong in some of its most important provisions, and further because those most directly interested in insurance laws, because of their large property interests upon which heavy insurance was being carried were opposed to the law in its then form, I vetoed the same. Last summer I requested the Clearing House, Chamber of Commerce, Board of Trade, Merchants' Association, and other civic bodies of San Francisco to appoint a representative to meet with the Insurance Commissioner and a representative appointed by the Underwriters of San Francisco and agree upon a standard form of policy to be used in this State. Such representatives were appointed and many meetings have been held, and the question of a standard form has been most carefully and thoroughly considered. This committee will prepare a draft of a bill containing the form agreed upon, which will practically follow the New York standard form, which is in use in nearly all of the states of the Union, and whose every provision has been clearly defined and limited by decisions of the highest courts in the country. I trust that the form of policy presented will meet with your approval, and that you enact it into law.

There are many other matters of greater or less interest to the people of this State, but which on account of my physical condition I am unable to submit to you at this time. From time to time as occasion requires I will be pleased to submit to you those matters I deem to be of especial importance.

J. N. GILLETT,

Governor.

APPENDIX.

LIST OF PARDONS, COMMUTATIONS, AND REPRIEVES.

During the past two years I have granted forty-eight pardons, thirty-four commutations of sentence, and reprieves to seven prisoners under sentence of death. I have endeavored to use extreme care in granting clemency, and in only one instance has a prisoner proven unworthy. Pardons and commutations have been granted for reasons appearing to me to be sufficient, but I am free to confess that under the system in vogue in the past the Executive is extremely likely to err in his judgment. I have, therefore, attempted to adopt a plan by which a prisoner can earn his pardon by good conduct. He is first required to obtain a parole, which is never granted except for exemplary prison life. His conduct on parole is used as a basis to determine his fitness for a pardon. So far as I have been able to apply this rule it has produced most excellent results. As you will observe, many of the pardons issued have been based solely upon good conduct while on parole.

Following is a list of all cases where clemency has been granted, a brief history of each case, and my reasons for acting favorably thereon:

PARDONS.

MARCH 5, 1907. MAUDE SHEELA, convicted in Fresno County in November, 1906, of misdemeanor, and sentenced to six months in the county jail. At the time pardon was granted Maude Sheela had served one month of the sentence imposed by the court, and it was represented that she would leave the State if pardoned, and upon the recommendation of Herbert F. Briggs, Judge of the Police Court of the city of Fresno, and Denver Church, District Attorney of the county of Fresno, pardon was granted.

APRIL 3, 1907. NICHOLE MARCHI, convicted in Humboldt County in May, 1906, of the crime of assault with a deadly weapon, and sentenced to serve sixteen months in the county jail. Marchi had served eleven months of his sentence, made a most exemplary prisoner, acquiring an English education during the time he was in jail, and a pardon was granted him upon the recommendation of Otto C. Gregor, District Attorney, and G. W. Hunter, Judge of the Superior Court.

APRIL 11, 1907. STANLEY J. MARTIN, convicted in the county of Kern in January, 1905, and sentenced to a term of five years at Folsom State Prison. It appeared that Martin was only nineteen years old at the time of the commission of this offense, and the judge, unaware of his youth, sentenced him to a longer term than he felt to be justified, after he learned his true age. The relatives of Martin agreed to remove him from the State, and the same was done as soon as the pardon was granted. Clemency was recommended for him by the Hon. J. W. Manon, Judge of the Superior Court of the county of Kern, and by the entire congressional delegation representing California in the national halls of Congress.

APRIL 27, 1907. WONG GOW, convicted in San Francisco of robbery, and sentenced for twenty years. In October, 1903, Wong Gow was paroled, and thereafter his conduct was most exemplary. Upon the recommendation of the State Board of Prison Directors he was pardoned.

JUNE 20, 1907. LOUIS SOSSMAN, convicted in the Police Court of the city of Los Angeles, February, 1907, of the crime of misdemeanor, and sentenced to one hundred and fifty days in the city jail. Sossman had made a good record while imprisoned in jail, and there were many mitigating circumstances connected with the case and new evidence was discovered too late to be used by the petitioner. His pardon was recommended by Hon. Wm. Frederickson, Judge of the Police Court; E. J. Fleming, Prosecuting Attorney; G. W. Pearson, Assistant District Attorney, and J. W. McCouly, Chief Jailer.

JULY 26, 1907. PILAR CARRILLO, convicted in Los Angeles County of the crime of assault with a deadly weapon, and sentenced to one year in the State Prison at San Quentin. Carrillo, prior to the commission of the offense, bore a good reputation, and the crime was committed while under the influence of liquor. He had, at the time, a wife and three children, who were left in destitute circumstances. His pardon was recommended by the Hon. B. N. Smith, Judge of the Superior Court; J. D. Fredericks, District Attorney; Thomas J. Conaty, Bishop of Monterey and Los Angeles, and many other prominent citizens.

AUGUST 20, 1907. MICHAEL J. LYONS, convicted in San Francisco of the crime of forgery, and sentenced to one and a half years at San Quentin. Lyons was afflicted with a fatal illness, and a pardon was granted him so that he might die outside the prison walls. His pardon was recommended by Thomas F. O'Neil, Sheriff of San Francisco; Wm. P. Lawlor, Judge of the Superior Court, and W. H. Langdon, District Attorney.

SEPTEMBER 30, 1907. MICHAEL A. STOKES, convicted in Siskiyou County of the crime of robbery, and sentenced to twenty years at San Quentin. Stokes was paroled in 1905, and in view of his exemplary conduct thereafter, and upon recommendation of the State Board of Prison Directors, he was pardoned.

DECEMBER 2, 1907. ALEX P. RUSSELL, convicted in Santa Clara County, December, 1890, of the crime of rape, and sentenced to forty-five years in San Quentin. Russell was released on parole in February, 1905, and his conduct thereafter was most exemplary. On the recommendation of the Board of Prison Directors he was pardoned.

DECEMBER 17, 1907. WILLIAM T. HYNES, convicted in September, 1907, in the Justice Court of Ukiah Township of the crime of petit larceny. Hynes was afflicted with a disease impossible to treat in jail with any degree of success, and owing to conditions therein he was a source of great danger to the other prisoners. He was pardoned upon the recommendation of Robert Duncan, District Attorney; R. E. Donohoe, Sheriff of Mendocino County, and Judson Litchfield, County Physician.

DECEMBER 20, 1907. FRANK MCAULLIFFE, convicted in October, 1907, of the crime of petit larceny, and sentenced to six months in the county jail of Solano County. McAulliffe was but eighteen years old at the time of the commission of this offense, which consisted of the stealing of a second hand pair of shoes, valued in the complaint at \$2.50. As the punishment inflicted for said crime seemed to be out of proportion to the seriousness thereof, and as he had served a considerable part of his sentence, I issued him a pardon. The same was recommended by L. G. Harrier, Judge of the Superior Court of Solano County; J. J. McDonald, Sheriff; W. W. R. Reeves, Sr., Justice of the Peace, and Joseph M. Raines, District Attorney.

DECEMBER 21, 1907. CLAUDE E. CURRY, convicted in Yolo County, in October, 1907, of the crime of furnishing intoxicating liquors to a minor, and sentenced to imprisonment for one hundred and fifty days in the county jail. The liquor was furnished to a Miss Barnett, whom Curry afterwards married. It appearing that

no further good could be done by compelling Curry to serve his full sentence. I issued him a pardon. This action was recommended by the Hon. E. E. Gaddis, Judge of the Superior Court; W. A. Anderson, District Attorney; E. T. Lampton, Justice of the Peace who pronounced the sentence, and many other of the more prominent people of Yolo County.

DECEMBER 24, 1907. PETER CASTRO, convicted in the Superior Court of Monterey County in May, 1899, of the crime of burglary in the first degree, and sentenced to a term of fifteen years at San Quentin. Castro was paroled September 26, 1905, and thereafter his conduct was most exemplary. In pursuance of my policy to grant pardons to those paroled prisoners who had faithfully observed the parole laws and had shown that they had become industrious, sober, and upright men, I issued Castro a pardon upon the recommendation of the State Board of Prison Directors.

JANUARY 2, 1908. FRED FENTON, convicted in the Justice Court of Suisun Township, county of Solano, in October, 1907, of the crime of petit larceny, and sentenced to six months in the county jail of Solano County. Fenton was a joint defendant with Frank McAulliffe, mentioned above, and was but sixteen years of age. A pardon was granted to him upon the same recommendations and for the same reasons as those granted Frank McAulliffe.

JANUARY 2, 1908. ELSIE SHERWOOD, convicted in San Francisco in October, 1907, of the crime of vagrancy, and sentenced to six months in the county jail. At the time of her conviction Elsie Sherwood was a victim of the opium habit, acquired from her husband, who died prior to her conviction. A pardon was recommended by the judge who sentenced her. It appearing to me that she had been cured of the opium habit, and upon the promise of her father to remove her from San Francisco and to surround her with beneficial and uplifting influences, I granted her a pardon.

JANUARY 24, 1908. JOHN HURLEY, convicted in San Francisco in the month of January, 1906, of the crime of robbery, and sentenced to five years at San Quentin. Hurley, prior to the commission of this offense, had always been a quiet and industrious citizen. The circumstances showed the crime was committed while under the influence of liquor, without criminal intent. Hurley attempted to take an appeal to the Appellate Court, but all his papers were destroyed by the fire in San Francisco. During the fire Hurley rendered heroic services in aid of the officers of the jail in the preservation of property and the restoration of order in said city. His pardon was recommended by the Hon. W. H. Langdon, District Attorney, and by many of the prominent citizens of that city.

FEBRUARY 4, 1908. THOMAS HENRY BAGSHAW, convicted in the Justice Court of Sausalito Township, Marin County, in the month of February, 1907, of the crime of carrying on business without having first procured a license so to do. He was sentenced to pay a fine of \$300 or be imprisoned in the county jail of Marin County at the rate of one day's imprisonment for each two dollars of the fine. It appeared that many others were arrested for similar offenses at the same time, and Bagshaw's case was made a test. Bagshaw was a laboring man, dependent upon his daily earnings for the support of himself and family, and was unable to pay said fine or any part of it. His pardon was recommended by the Superior Judge of Marin County, the District Attorney, and many other prominent citizens.

FEBRUARY 4, 1908. HENRY C. MILLER, convicted October, 1905, in Shasta County of the crime of rape, and sentenced to imprisonment at Folsom for life. Miller was convicted upon the testimony of his two daughters, both of whom appeared before me, and I am satisfied from their statements and from other matters connected with said charge, that Miller was innocent. His pardon was recommended by Hon. T. B. Dozier, District Attorney of the county of Shasta at the time of the prosecution of Miller, and by hundreds of the citizens of Shasta County.

FEBRUARY 11, 1908. L. L. CALLENDINE, convicted in Sacramento County, August, 1896, of the crime of robbery, and sentenced to thirty years at Folsom. Callendine was paroled December 23, 1903, and thereafter his conduct was always most exemplary. In pursuance of my policy of granting pardons to those paroled prisoners who had faithfully observed the rules and had shown themselves capable of taking their places in the walks of life, and upon recommendation of the Prison Board, I granted him a pardon.

FEBRUARY 14, 1908. CHARLES GREENFIELD, convicted in December, 1907, in the Police Court of the city of Los Angeles of the crime of vagrancy, and sentenced to ninety days in the city jail. At the time of the arrest Greenfield had just arrived in the city of Los Angeles and was engaged in looking for work, and was not a vagrant within the meaning of the law. In addition thereto, the city jail of Los Angeles at that time was overcrowded, unclean, and extremely unhealthy, and it would have been improper to have longer compelled him to remain in such a place.

FEBRUARY 18, 1908. WALTER HUTCHINSON, convicted in January, 1908, in the Police Court of the city of Los Angeles of the crime of petit larceny, and sentenced to six months in the city jail. Hutchinson was in poor health and afflicted with tuberculosis, and under the conditions existing in said jail it would be impossible for him to recover should he be compelled to complete his sentence.

MARCH 7, 1908. RICHARD FELLOWS, convicted in the county of Santa Barbara in April, 1882, of the crime of robbery, and sentenced to imprisonment for life. Fellows' conduct while in prison had always been exemplary, and his influence was of the best among the younger convicts. Pardon was recommended by a majority of the Judges of the Supreme Court of the State of California, by the District Attorney who prosecuted the case, members of the jury and by the officials of Wells-Fargo Company, the prosecuting witness in such case. It was agreed that Fellows should be taken to his old home in Kentucky, where he would be cared for by relatives. For the foregoing reasons a pardon was issued to Fellows by Acting Governor Porter, during my absence from the State.

MARCH 12, 1908. WILLIAM F. BOEHLE, convicted in San Francisco in January, 1885, of murder, and sentenced to State Prison for life. Boehle was paroled December, 1904, and thereafter his conduct was most exemplary. In pursuance of my general policy with paroled prisoners, a pardon was issued to him by Acting Governor Porter.

MARCH 12, 1908. LOUIS PIPER, convicted in April, 1905, in San Francisco of the crime of robbery, and sentenced to nine years' imprisonment at San Quentin. Piper was mistaken for a negro by the name of Brown, and it appears from affidavits made by the police officers of San Francisco, that Piper was not the perpetrator of said crime, but that the crime was actually committed by a man by the name of Brown, to whom Piper bore a close resemblance. Piper was in no way connected with the commission of the crime.

MARCH 12, 1908. TOBIAS RICHARDS, convicted in March, 1882, in the Superior Court of Tuolumne County of the crime of murder, and sentenced for life. Richards was paroled February, 1905, and thereafter faithfully observed all the requirements of the parole law.

MARCH 12, 1908. J. H. GRANDE, convicted in August, 1907, in the county of San Joaquin of the crime of forgery, and sentenced for a term of two and one half years at San Quentin. It was extremely doubtful whether Grande was guilty of crime, or simply violated the civil duty which he owed to his employer, the Frank Simpson Fruit Company. After conviction the Frank Simpson Fruit Company requested clemency for Grande. The conviction of Grande left his family in destitute circumstances, which so preyed upon his mind that he was in danger of going insane. Under these circumstances Acting Governor Porter considered it proper that he should be granted clemency.

MARCH 21, 1908. VINCENT DI PALMI, convicted in November, 1895, in San Francisco of the crime of murder in the second degree, and sentenced to fifty years. Palmi was released on parole in December, 1902. As his conduct thereafter was most exemplary, and in view of the policy of this office to extend pardons to those prisoners who had faithfully observed the parole laws, Acting Governor Porter granted him clemency.

APRIL 2, 1908. JOHN L. MAZINGO, convicted in May, 1880, in the county of Lake of the crime of murder in the first degree, and sentenced to life imprisonment. On March 11, 1905, Mazingo was released on parole by the State Board of Prison Directors. Thereafter his conduct was in strict accord with all the prison rules, and upon the recommendation of the Prison Board he was pardoned.

APRIL 30, 1908. DAVID I. BEAZLEY, convicted in November, 1907, in the Superior Court of the county of Los Angeles of the crime of bigamy, and sentenced to one year in the State Prison at Folsom. Beazley had obtained a divorce from his first wife and married the second one three days before the year had expired after the issuance to him of an interlocutory decree. Beazley claimed that he had forgotten the exact date, but the same was no excuse under the law. Beazley was recommended by many of the most prominent people of Los Angeles, and by all of the members of the police department of that city. It would seem that this offense was not committed with criminal intent, as Beazley, prior to its commission, had always borne a very good reputation.

MAY 2, 1908. ANGELE DELBOS, convicted in August, 1905, in the Superior Court of the county of San Francisco of the crime of grand larceny, and sentenced for a term of two years in the State Prison at San Quentin. It appears that the defendant's bill of exceptions served in the case of *The People vs. Delbos*, and the People's amendments thereto to be used upon appeal in that case, were destroyed in the fire of San Francisco. That it was thereafter impossible for defendant to take her case to the Appellate Court. From the time of her conviction in August, 1905, she remained in the county jail in San Francisco, and at the time of her pardon had been imprisoned for a considerable longer period than the term of sentence. The Assistant District Attorney of San Francisco recommended her pardon, and stated that he is certain she does not belong to the criminal class, that she had borne a good reputation and merited executive clemency.

MAY 12, 1908. HENRY WILSON, convicted in July, 1907, in the Police Court of the city of Los Angeles of the crime of vagrancy, and sentenced to serve a term of ninety days in the city jail. It appears that said crime was caused by evil associations at the time, from which Wilson has since broken away, and at the time he received a pardon he was living an honest and upright life, and was the sole support of an aged grandmother. His pardon was recommended by the Hon. Joseph F. Chambers, Police Judge of the city of Los Angeles; H. P. Alexander, Assistant Prosecuting Attorney; E. J. Fleming, Prosecuting Attorney of Los Angeles, and many others.

MAY 21, 1908. DYER HELLAM, convicted in February, 1907, in the Superior Court of Monterey County, and sentenced to imprisonment at San Quentin for a term of twenty-five years. Hellam was afflicted with consumption and his death was imminent. His relatives agreed to take him back to Texas, where they could give him a home and care for him. He was recommended by the State Board of Prison Directors, the Prison Physician, B. V. Sargent, Superior Judge of Monterey County, and J. A. Bardin, District Attorney.

JUNE 12, 1908. THOMAS M. GALVIN, convicted in November, 1902, in the Superior Court of the city and county of San Francisco of the crime of perjury, and sentenced for a term of nine and one half years. In October, 1905, Galvin was released on parole by the State Board of Prison Directors, and thereafter his conduct was of the best. Galvin's pardon was recommended by the State Board of Prison Directors and by the majority of the Supreme Judges of the State of California.

JUNE 9, 1908. E. H. ELLSWORTH, convicted in April, 1899, in the Superior Court of Siskiyou County of the crime of murder in the second degree, and sentenced to a term of twenty-two years in San Quentin. In March, 1905, Ellsworth was released upon parole. His conduct thereafter was in strict conformity with the regulation prescribed by the State Board of Prison Directors, and upon their recommendation a pardon was granted.

JULY 16, 1908. FRANK DURAZO and EDWARD DURAZO were convicted in the month of May, 1908, in the Justice Court of Woodland Township, Yolo County, for the crime of petit larceny, and sentenced to six months in the county jail of Yolo County. Both of these young men were under the age of sixteen years, and had been under the control of their mother who, at the time, was living separate and apart from the father. The father was an honest, hard working man, and this pardon was granted upon his express promise to assume control of the boys and give them a suitable education. This pardon was recommended by W. A. Anderson, District Attorney of Yolo County, and by Samuel Montgomery, Sheriff.

JULY 29, 1908. GIACOMO LEGARBO, convicted in February, 1889, in the Superior Court of Santa Clara County of the crime of murder in the second degree, and sentenced to a term of thirty-three years. The State Board of Prison Directors released Legarbo in September, 1905, on parole, all the provisions of which he had faithfully kept, and had conducted himself as an honest, sober, and upright man. After Legarbo had proven his thorough reformation, the Prison Board recommended executive clemency.

JULY 31, 1908. CHARLES LYONS, convicted in the Police Court of the city of Sacramento of the crime of disturbing the peace, and sentenced to three months in the county jail. Lyons had an invalid wife dependent upon him for support, and he was pardoned upon condition that should he ever be again convicted for drunkenness or disturbing the peace, his pardon should be void and he should be compelled to serve the remainder of the sentence cut short by said pardon. Clemency was recommended by S. Luke Howe, City Attorney.

AUGUST 21, 1908. S. C. BURWELL, convicted in the Police Court of the city of Eureka of the crime of assault, and sentenced to a term of thirty days in the county jail. Burwell was an honorably discharged veteran of the civil war and his past life had been most exemplary. The assault upon which he was convicted was committed under very considerable provocation, caused by wrongs committed against said Burwell.

SEPTEMBER 15, 1908. EDWARD FERGUSON, convicted in Contra Costa County of the crime of rape, and sentenced to a term of twenty-five years in the State Prison at San Quentin. In April, 1907, Ferguson was released upon parole by the State Board of Prison Directors and proceeded to San Francisco and proved himself an industrious, sober, and upright man. At the time this pardon was granted, Ferguson had an opportunity to obtain contracts of considerable magnitude in San Francisco, and clemency was extended to him so that he might be enabled legally to enter into the same. This was recommended by the State Board of Prison Directors.

SEPTEMBER 16, 1908. BERNARD WARD, convicted in December, 1899, in the city and county of San Francisco of the crime of embezzlement, and sentenced to a term of seven years in the State Prison at San Quentin. He was received in the prison in February, 1904. In January, 1907, Ward was released upon parole. His conduct thereafter was in strict conformity with the parole laws. Ward's sentence would have expired on November 20th. In view of his good conduct, attested by nearly two years of liberty on parole, I felt moved to grant him clemency prior to the expiration of his term. This action was recommended by the State Board of Prison Directors.

SEPTEMBER 23, 1908. OWEN N. WILSON, convicted in May, 1904, in the Superior Court of the county of Kings of the crime of rape, and sentenced to undergo an imprisonment of ten years. In 1907 Wilson was released upon parole

by the State Board of Prison Directors. Thereafter his conduct was most exemplary, and he had proven himself to be an industrious, sober, and upright man. Wilson had become engaged to an estimable young woman who had been thoroughly informed of his past, but under parole regulation he was unable to marry her. The Prison Board recommended that in view of all the circumstances it would be well to grant Wilson clemency.

SEPTEMBER 24, 1908. PETER W. MCGLADE, convicted in July, 1901, in the Superior Court of the city and county of San Francisco of the crime of forgery, and sentenced to imprisonment for a term of eight years in the State Prison at San Quentin. In July, 1906, McGlade was released upon parole by the State Board of Prison Directors. Thereafter he lived an industrious, sober, and upright life, in strict conformity with the rules prescribed by the State Board. The Board recommended this application.

SEPTEMBER 30, 1908. CHARLES O'BRIEN, convicted in the county of Sacramento of murder in the first degree, in November, 1882. O'Brien was sentenced to imprisonment for the term of his natural life. O'Brien during more than twenty-six years' actual time in the prison had committed but one infraction of the rules. He had become old and feeble, and being an ex-soldier, was entitled to admission in the Soldiers' Home. He was also offered a position, where he would have support, by the Prefect of St. Mary's College. Clemency was recommended by the State Board of Prison Directors and by a majority of the Justices of the Supreme Court.

SEPTEMBER 30, 1908. F. F. JOHNSTON, convicted in the Justice Court of Chico Township, Butte County, of the crime of battery, and sentenced to imprisonment for six months in the county jail. From petitions received at this office, signed by numerous citizens of Butte County, it appeared that Johnston had entered a plea of guilty to the offense under the belief that he would receive a light sentence. It appeared that the sentence was excessive and out of proportion to the offense committed. Clemency was recommended by the Justice of the Peace who had sentenced Johnston.

NOVEMBER 7, 1908. J. E. RODLEY, convicted in February, 1900, in the Superior Court of the county of Butte of the crime of perjury, and sentenced to imprisonment for a term of twelve years in the State Prison at San Quentin. Rodley was released upon parole in February, 1906, and thereafter his conduct was most exemplary. Clemency was recommended by F. H. DePue, Director of the State Bureau of Criminal Identification; John C. Gray, Superior Judge of Butte County, and many of the prominent citizens of the county who were familiar with Rodley's conduct while on parole.

NOVEMBER 7, 1908. SMITH A. BRANDON, convicted in April, 1908, in the Superior Court of the county of Alameda of the crime of assault with a deadly weapon, and sentenced to serve one year in the county jail of Alameda County. From certificates of physicians it appeared that Brandon's health was in a very dangerous condition, and that his life would be imperiled should he be longer incarcerated. Recommendations for clemency were filed by the Hon. T. W. Harris, Judge of the Superior Court, and the Hon. Everett J. Brown, then District Attorney of the county of Alameda.

NOVEMBER 17, 1908. GEORGE M. SPALDING, convicted in the Superior Court of the county of Humboldt in July, 1905, of the crime of forgery on two charges, and sentenced to undergo an imprisonment of three years on each. Spalding's conduct in prison was most exemplary, and secured for himself the recommendation of the warden of the said prison. Clemency was recommended also by a majority of the Judges of the Supreme Court of the State of California, and by Otto C. Gregor, District Attorney of Humboldt County.

DECEMBER 8, 1908. STEPHEN WEAVER, convicted in the Superior Court of the county of Contra Costa in April, 1904, of the crime of attempt to rape, and sentenced to imprisonment for a term of eight years. In December, 1906, Weaver

was released upon parole by the State Board of Prison Directors. His conduct thereafter was always most exemplary, and he faithfully lived up to all the rules prescribed by the State Board of Prison Directors. Upon their recommendation, and in pursuance of my usual policy to pardon paroled men who had shown by their conduct that they had completely reformed, I granted a pardon to Weaver on the above date.

COMMUTATIONS.

FEBRUARY 7, 1907. FRED RAABE, JR., convicted in May, 1904, in the city and county of San Francisco of the crime of robbery upon two counts, and was sentenced to undergo an imprisonment at the State Prison at Folsom for ten years on each count, making an aggregate term of twenty years. Raabe's term was ordered commuted by Governor Pardee for the reasons stated in his message to the Legislature of the State of California at its thirty-seventh session. At the time of the expiration of Governor Pardee's term the recommendation had not yet been received from the Justices of the Supreme Court. Upon its receipt I granted Raabe a commutation in conformity with the order of Governor Pardee.

MARCH 26, 1907. GEORGE CAMERON, convicted in San Francisco in September, 1898, of burglary, with a previous conviction of felony, and sentenced to life imprisonment. In this Governor Pardee had also made an order for a commutation of his sentence, and upon receipt of the recommendation from a majority of the Judges of the Supreme Court, this commutation was issued in conformity with such order.

JULY 24, 1907. ABE G. SCHWARTZ, convicted in April, 1905, in the Superior Court of the city and county of San Francisco of the crime of grand larceny, and sentenced to undergo a term of four years in the State Prison at San Quentin. Prior to the commission of the offense upon which his conviction was based, Schwartz had always borne a good reputation, and his conduct and behavior up to the time of the commission of such offense was beyond reproach. It was the belief of those who recommended clemency, that if given his liberty he would make a good citizen and profit by the punishment he had received. Recommendations were received from Hon. Frank W. Dunne, Judge of the Superior Court before whom Schwartz was tried; Lewis F. Byington, Assistant and Deputy District Attorney of San Francisco, and Hon. J. V. Coffey, Charles L. Weller, Hon. Edward I. Wolfe, Hon. Samuel L. Beckett, and many other prominent citizens of that city.

SEPTEMBER 30, 1907. ALBERT WEBB MELOLING, convicted in the month of June, 1905, in the county of Los Angeles of the crime of burglary in the second degree, and sentenced to undergo an imprisonment for five years in the State Prison at Folsom. At the same time and place his wife was sentenced to undergo an imprisonment of three years. It appears that his wife was solely dependent upon Meloling for a livelihood, and that it was necessary for her welfare and protection that her husband be at liberty to assume the responsibility of protecting and providing for her. Recommendations for clemency were presented by the Hon. B. N. Smith, before whom Meloling was tried, and the Hon. J. D. Frederichs, the District Attorney who secured his conviction. It was represented by the Hon. J. D. Frederichs that the sentence of Meloling was too severe under the circumstances, and his sentence was accordingly cut short so that he might be released from prison at the same time his wife regained her liberty.

OCTOBER 1, 1907. N. H. MCLEAN, convicted in May, 1900, in the county of Los Angeles of the crime of embezzlement, and sentenced to undergo an imprisonment of ten years. During his imprisonment he had proven himself a model prisoner and rendered most faithful service to the State. In view of this fact, the State Board of Prison Directors felt moved to recommend the commutation of his sentence. This was also concurred in by the Hon. B. N. Smith, Judge of the Superior Court, who presided at the time of his conviction. Mr. McLean was offered a position by his former employer in Chicago, and upon his release immediately proceeded to that place.

OCTOBER 10, 1907. H. H. KAUFFMAN, convicted in the county of Inyo, in June, 1906, of the crime of embezzlement, and sentenced to undergo an imprisonment of two years in the State Prison at San Quentin. Prior to his conviction Kauffman had always borne a good reputation as a hard working, honorable man. The offense was committed while Kauffman was intoxicated, and was not the result of a deliberate and premeditated design to steal. Recommendations for clemency were received from the Superior Judge of Inyo County, the District Attorney, and many of the more prominent citizens of the vicinity.

DECEMBER 11, 1907. JOHN G. VAN TINE, tried and convicted in June, 1898, in the Superior Court of the county of Sacramento of the crime of robbery, and sentenced to a term of twenty years in the State Prison at San Quentin. Van Tine had suffered a previous conviction for burglary. Van Tine's record in prison had been such as to commend him strongly to the Board of Prison Directors, and there was every reason to believe from his prison conduct that he had thoroughly reformed and repented of the errors of his ways. They accordingly presented a recommendation that his term be commuted from twenty years to fifteen years. His sentence was commuted so that he should regain his liberty on the first day of January, 1908. Recommendations for clemency were also received from a majority of the Judges of the Supreme Court of the State of California and from the Hon. E. C. Hart, Judge of the Superior Court of the county of Sacramento; eleven of the twelve jurors who tried Van Tine, and from many other prominent citizens of Sacramento County. I wish to say that the confidence reposed in Van Tine was misplaced, for shortly after his release he proceeded to the State of Nevada, committed highway robbery, was tried and sentenced to a term of ten years in the Nevada State Prison.

DECEMBER 11, 1907. ORRIN BEAN, convicted in the Superior Court of the city and county of San Francisco of the crime of burglary in the second degree, and sentenced to undergo an imprisonment of five years. On the same day he was convicted of a second charge of burglary in the second degree, and sentenced to two years. On the same day he was convicted of a third charge of burglary in the second degree, and sentenced to undergo an imprisonment of two years, and on the same day he was convicted of the crime of grand larceny and sentenced to undergo an imprisonment of one year, such sentences not to run concurrently, but one to follow the termination of the other. At the time Bean was sentenced, it was the custom to allow credits for the aggregate period of time, to wit, ten years. Afterwards, acting under an opinion of the Attorney General, credits were allowed for each separate sentence. The result from this change of the method of computation was to increase the sentence of Bean very considerably. Upon representation of the Hon. Carroll Cook, who sentenced Bean, it was shown that it was his intention in imposing the sentence that Bean should receive the full credits based upon the entire time he was to serve. In other words, he intended to impose judgments equal to a single ten-year sentence. In view of these circumstances, a majority of the Judges of the Supreme Court of the State of California recommended that Bean's term be commuted so that he would serve only such time as he would have served had he been given a single ten-year sentence. I, therefore, commuted the sentence of Bean, so that he would obtain his liberty on the first day of October, 1908.

DECEMBER 11, 1907. CLARENCE T. MILLER, convicted in April, 1904, of the crime of rape in the county of San Bernardino, and sentenced to imprisonment for seven years. Thereafter Miller received a parole from the State Board of Prison Directors. From the time of his release his conduct was uniformly good, and petitions were received at this office recommending that his sentence be commuted, giving as reasons therefor that Miller, since his release on parole, had obeyed the law and all the terms of the same. That he had three children living in Upland that required his support, and under the terms of his parole it was difficult for him to keep constantly employed, as the business of the town was of such a character that it rendered it necessary to make frequent changes of employment. Recommendations of similar character were received from Benjamin F. Bledsoe, Judge

of the Superior Court of San Bernardino County, and L. M. Sprecher, District Attorney of said county. In pursuance of such recommendations I commuted Miller's sentence so that the same would expire on the 25th day of December, 1907.

DECEMBER 11, 1907. CHARLES BUCHANAN, convicted in the Superior Court of the city and county of San Francisco of the crime of burglary in the second degree, and sentenced to five years in the State Prison at San Quentin, and on the same day and date was convicted of the crime of assault with a deadly weapon, and sentenced to two years in the State Prison, the latter sentence to take effect on the termination of the former one. This case of Buchanan's conforms in all respects to the case of Orrin Bean, and for the same reasons and upon the statement of the Superior Judge and the recommendation of the Supreme Court, his sentence was commuted to the same length as a single term seven-year sentence.

DECEMBER 16, 1907. JOHN MEYERS, convicted in the Justice Court of the city of Vallejo of the crime of disturbing the peace, and sentenced to thirty days in the county jail. Meyers was a recruit in the United States Navy, and his vessel, the U. S. S. Maryland, was to sail from Vallejo December 21st. On petition of Captain Chauncey Thomas, commanding the U. S. S. Maryland, Meyers was released on December 20th, so that he might be able to join his ship prior to its leaving upon a cruise.

FEBRUARY 14, 1908. EDWARD ROWE, convicted in May, 1904, in Amador County of the crime of assault to murder, and sentenced to ten years in San Quentin. Rowe, at the time of the commission of this offense was but eighteen years of age. His conduct while in prison was of the best. Since his imprisonment his father died, leaving his mother and her three children in destitute circumstances. Favorable action was recommended by Hon. R. C. Rust, Superior Judge of Amador County, and C. P. Vicini, District Attorney, and by many others who were cognizant of the circumstances surrounding the offense and of the present condition of the family.

MARCH 12, 1908. ARTHUR RISHER, convicted in May, 1904, in the Superior Court of the city and county of San Francisco of the crime of burglary in the second degree, and sentenced to seven years in San Quentin. Risher's prison life was most commendable, and he gave every promise of having completely reformed. The State Board of Prison Directors recommended that his sentence be commuted to such term as should be equitable and reasonable under the circumstances. The Justices of the Supreme Court recommended that the sentence be commuted so as to entitle him to his discharge at once. In view of these recommendations and others on file, Acting Governor Porter commuted his sentence in accordance with the recommendation of the Supreme Court.

MARCH 12, 1908. PHILIP B. NELSON, convicted in San Francisco in August, 1905, of the crime of forgery and sentenced to twelve years at San Quentin. The State Board of Prison Directors recommended that Nelson's term be commuted to such time as should seem reasonable to the Governor. A majority of the Judges of the Supreme Court joined in a further recommendation that such sentence be commuted to a term of three and one half years. In view of these recommendations Acting Governor Porter commuted Nelson's sentence to the term of three and one half years, conditioned that said Nelson should immediately leave the State of California and never return thereto.

MARCH 12, 1908. JOSEPH FITZGERALD, convicted in August, 1900, in the city and county of San Francisco of the crime of arson, and sentenced to twenty years at San Quentin. Fitzgerald, during his term in prison, rendered valuable and material services to the State, and his conduct therein was uniformly good. Under these circumstances the Board of Prison Directors recommended that the said Joseph Fitzgerald be pardoned, and that his sentence be commuted as the Governor might elect. Sentence was accordingly commuted to take effect immediately.

MARCH 12, 1908. HORACE J. DOBBINS, convicted in January, 1901, of the crime of murder in the first degree, in Solano County, and sentenced to imprisonment for the term of his natural life. Dobbins' prison conduct was uniformly good, and it further appeared that Dobbins had saved the life of one J. H. Murray, officer of the prison at San Quentin, who was murderously assaulted by a prisoner condemned to death. In doing so Dobbins risked his own life in the protection of said officer. The Prison Directors cordially recommended that the sentence of Dobbins be commuted, and Acting Governor Porter, in pursuance of such recommendation, ordered that the same be commuted to a term of twenty years.

MARCH 12, 1908. EDWARD MORRELL, convicted in April, 1894, in Fresno County of the crime of robbery, and sentenced to the term of his natural life at San Quentin. The Board of Prison Directors recommended that Morrell's sentence be commuted to such time as would entitle him to immediate release. His application was also strongly recommended by the officers of the prison, the Judge who tried the case, the District Attorney who prosecuted the same, and the City Marshal of Fresno, upon whom the crime was committed. A majority of the Judges of the Supreme Court also joined in the recommendation that such commutation be made. In accordance with such recommendation Acting Governor Porter commuted his sentence to take effect immediately.

MARCH 12, 1908. EDWARD S. BOESE, convicted in March, 1907, of the crime of assault with a deadly weapon, and sentenced to a term of two years in San Quentin. Recommendation for a commutation of sentence was made by the Board of Prison Directors in view of his exemplary conduct while in prison, his good behavior, and their further reasonable belief that Boese would make a good citizen, if released. Acting Governor Porter accordingly granted him a commutation of sentence upon such recommendations.

MARCH 20, 1908. GEORGE C. CONTANT, convicted November, 1898, in the county of Fresno of the crime of robbery, and sentenced for the term of his natural life. Contant rendered most valuable aid to the State in the conviction of John Sontag and Chris Evans, and in consideration of his testimony there given, it was agreed by the representatives of Wells-Fargo's Express Company, and the Southern Pacific Railroad Company, against which corporations said crime was committed, and by the Warden of the State Prison at Folsom, that in consideration of the evidence to be given against said Sontag and Evans, they would use their influence to have the sentence of said Contant commuted after he had served a reasonable length of time. Relying upon said promise, Contant, in good faith, appeared at said trial and gave testimony concerning the crime of Sontag and Evans which secured their conviction. It appeared right and proper to Acting Governor Porter that good faith should be kept with said Contant, and that the promise so made to him should be carried out on the part of the State. Accordingly, a commutation was ordered which entitled him to be released immediately.

MARCH 20, 1908. JOHN GRAHAM, convicted in October, 1901, in the county of Napa of the crime of murder in the second degree, and sentenced to a term of twenty years in the State Prison. Graham's conduct after admission to the prison was uniformly good, and prior thereto he had always borne a good reputation, and was a hard working, honorable man, an ex-sailor of the civil war, and one of the seamen on board Farragut's flagship "Hartford" during its memorable battle. Clemency was recommended for Graham by the Hon. Theodore Bell, former District Attorney of Napa County, who prosecuted him. In view of such conduct and of the recommendations filed in Graham's behalf, Acting Governor Porter commuted his sentence so that he was released immediately.

MARCH 20, 1908. A. H. SHERMAN, convicted in July, 1901, in Fresno County of the crime of rape, and sentenced to eleven years in the State Prison. Sherman was released upon parole in the year 1906, and subsequent to that time his conduct was most exemplary, and he proved himself to be a sober, industrious, and upright man. In view of these circumstances Acting Governor Porter ordered that his sentence be commuted to take effect immediately.

MARCH 31, 1908. HENRY RILEY, convicted in June, 1881, of the crime of robbery, and sentenced to the term of his natural life in the State Prison. Riley's prison life was most commendable, and he gave every promise of having completely reformed. The Board of Prison Directors recommended that his sentence be commuted to a term of forty-five years, in which recommendation they were joined by a majority of the Judges of the Supreme Court of the State of California. In accordance therewith Acting Governor Porter commuted the term of Henry Riley from that of life imprisonment to a term of forty-five years.

MAY 21, 1908. EDWARD MANASSE, convicted in August, 1906, in Sacramento County of the crime of murder in the first degree, and sentenced to be hanged. Manasse's crime was committed under considerable provocation, and prior thereto he had always borne an excellent reputation for peace and quiet. A commutation of sentence was recommended by the District Attorney of Sacramento County, the Sheriff of said county, the Warden of the State Prison at Folsom, together with nearly all the jurors who sat in judgment upon his case. In view of these circumstances, I commuted the sentence of Manasse from hanging to life imprisonment.

JUNE 8, 1908. HARRY SCHWERIN, convicted in Los Angeles County in June, 1906, of the crime of uttering and passing fictitious checks, and sentenced to five years in the State Prison. A majority of the Judges of the Supreme Court of the State of California recommended that Schwerin be granted executive clemency. Recommendations were also received from the Hon. Julius Kahn, member of Congress of California; Hon. M. H. Flint, Postmaster of the city of Los Angeles; Hon. Chas. T. Dunwell, Wm. M. Calder, George R. Malby, and Charles B. Law, members of Congress from the State of New York. Commutation was granted Schwerin so that his sentence would expire on the first day of July, 1908, and it was conditioned that immediately upon his release he would depart from the State of California and never return thereto.

JULY 15, 1908. FRANK H. ROLFE, convicted in Tuolumne County in April, 1882, of the crime of robbery and prior conviction, and sentenced for the term of his natural life at San Quentin. Recommendations for clemency were received from the State Board of Prison Directors, and from a majority of the Judges of the Supreme Court. These recommendations were based upon Rolfe's general good character, worthy conduct as a prisoner, that he had served the equivalent of a 43-year sentence, and upon a promise made by State Senator J. B. Curtin that he would provide a home for him in case of his release. Commutation was granted by which his sentence was fixed at the term of forty-three years.

AUGUST 5, 1908. W. B. MARVIN, convicted in March, 1900, in the Superior Court of the city and county of San Francisco of the crime of burglary in the second degree, and sentenced to a term of four years in the State Prison; and on the same day and date was convicted of the crime of burglary in the second degree, and sentenced to a term of four years in the State Prison; and on the same day and date was convicted of the crime of burglary in the second degree, and sentenced to a term of four years, such terms running consecutively. This case conforms in all respects to the case of Orrin Bean, referred to above, and upon the recommendation of a majority of the Judges of the Supreme Court the sentence of Marvin was commuted to equal a single term sentence of twelve years.

AUGUST 8, 1908. RICHARD KENNER, convicted in February, 1876, in Tehama County of the crime of murder in the second degree, and sentenced for the term of his natural life in the State Prison at San Quentin. On March 14, 1908, the State Board of Prison Directors adopted a resolution recommending the commutation of the sentence of Kenner. In this recommendation the action of the Board was concurred in by a majority of the Judges of the Supreme Court, who recommended the granting of such application. In accordance with such recommendation, Kenner's sentence was commuted to a term of fifty-four years.

SEPTEMBER 15, 1908. JOHN CRAIG, convicted in March, 1908, in Orange County of the crime of burglary, and sentenced for a term of ten years in the State Prison at San Quentin; and at the same time and place was convicted of the crime of burglary in the second degree, and sentenced to an additional term of five years. Craig saved the life of a fellow-prisoner from the murderous assault of Jacob Oppenheimer, and by so doing undoubtedly saved the lives of others, as well as some of the officers. In view of his conduct in such matter, the Prison Board recommended that he receive executive clemency. A majority of the Judges of the Supreme Court also recommended that the application of the prisoner for a commutation of his sentence be granted to the extent that he be discharged upon the expiration of his ten years' sentence. In accordance with such recommendation, it was directed that Craig be discharged upon the expiration of such sentence.

OCTOBER 2, 1908. EARL G. WESTMORE, convicted in March, 1902, in San Francisco of the crime of assault to murder and sentenced to imprisonment for eight years, and on said day and date was convicted of an assault with a deadly weapon and sentenced to undergo an imprisonment of two years, the second sentence to take effect on the termination of the preceding one. Westmore's case conformed in all respects to that of Orrin Bean referred to above, and for the reasons therein given his sentence was commuted so that he would be entitled to his discharge at the time he would have been discharged had he received a single ten years' sentence.

OCTOBER 9, 1908. WM. R. RAYMOND, convicted in San Francisco in October, 1891, of the crime of murder in the second degree, and sentenced to a term of thirty-five years in the State Prison at San Quentin. During Raymond's term of imprisonment he rendered most unusual and valuable service to the State, and his prison conduct was most exemplary. These facts moved the Board of Prison Directors to recommend his case for executive clemency. The same recommendation was also made by a majority of the Justices of the Supreme Court. In pursuance of such recommendations and in consideration of the valuable services that had been rendered to the State by Raymond, I commuted his sentence so that he would be entitled to his release at once.

OCTOBER 14, 1908. EDWARD H. DAY, convicted in May, 1904, in San Francisco of the crime of burglary in the second degree, and sentenced to imprisonment for three years, and on said day and date was convicted of the crime of burglary in the second degree, and sentenced to an imprisonment of three years, the second sentence to take effect on the termination of the preceding one. Day's sentence conforms in all respects to that of Orrin Bean stated above. In view of these circumstances the Board of Prison Directors and a majority of the Judges of the Supreme Court recommended a commutation of sentence. Commutation was accordingly directed so that his sentence would expire at the time the same would have expired had he been sentenced to a single term of six years.

OCTOBER 28, 1908. ROBERT WHITE, convicted in the county of San Joaquin in July, 1907, of the crime of forgery, and sentenced to a term of six years in the State Prison at San Quentin. White was in the last stages of consumption, and could live but a short time. He had received an offer of a home for the remainder of his life and would not become a public charge or expense to the State of California. Under these circumstances a majority of the Judges of the Supreme Court felt moved to recommend him for clemency, and in accordance with such recommendation his sentence was commuted so that he would be discharged immediately.

OCTOBER 28, 1908. JAMES LEDGER, convicted in San Francisco in November, 1894, of the crime of burglary in the first degree, and sentenced to a term of thirty years in the State Prison at San Quentin. On the 20th day of June, 1908, the Board of Prison Directors recommended that the sentence of Ledger be commuted for the reason that Ledger had been a model prisoner, that there was reasonable ground to believe that he would never again violate the criminal laws and that in the opinion of the Board he had been sufficiently punished. In this view they were

joined by a majority of the Justices of the Supreme Court, who also recommended Ledger for clemency. Under these circumstances a commutation was ordered releasing Ledger at once.

OCTOBER 28, 1908. BERNARD P. TAYLOR, convicted in December, 1907, in the county of Alameda of the crime of assault with a deadly weapon, and sentenced to imprisonment in the county jail for a period of eighteen months. Prior to the commission of said offense Taylor had always borne a good reputation as a peaceable, quiet, and law-abiding citizen. Recommendations for clemency were received from the Hon. Claude A. Swanson, Governor of the State of Virginia; Frank Barnet, Sheriff of the county of Alameda, and many of the employees of the county jail and citizens of the county of Alameda. It further appears that the offense was committed under very considerable provocation, and there is no probability of conditions arising that would lead Taylor to again violate the law. Accordingly a commutation was granted him by which he was ordered discharged on the 31st day of December, 1908, after he had served a full year of his sentence.

REPRIEVES OF SENTENCE.

MARCH 25, 1907. LEON SOEDER, convicted in the city and county of San Francisco of the crime of murder in the first degree, and sentenced to be executed in San Quentin Prison on Friday, the 22d day of March, 1907. I ordered a reprieve in the above case so that I might have a better opportunity to determine the propriety of the above sentence. There appearing to be no sufficient reason why the sentence of the court should be modified, Soeder was executed on the 29th day of March, 1907, the date fixed by said reprieve.

APRIL 29, 1907. FRANK WILLARD, convicted in the Superior Court of the county of Mendocino of the crime of murder in the first degree, and sentenced to be hanged in the San Quentin Prison. Willard was reprieved until the 31st day of May, 1907. Thereafter, and on the 28th day of May, 1907, I granted a second reprieve until the 14th day of June. These reprieves were granted in order that the court might be enabled to determine Willard's sanity at that time. On the 7th day of May, 1907, a jury impaneled for the purpose of determining his sanity rendered a verdict that he was sane. Willard was executed on the date of the expiration of the last reprieve.

APRIL 15, 1908. EDWARD MANASSE, convicted in the Superior Court of the county of Sacramento in August, 1906, of the crime of murder of the first degree, and sentenced to be executed at Folsom Prison on the 26th day of October, 1906. Manasse appealed said case, and upon the determination of such appeal he was resentenced to be executed on the 24th day of April, 1908. A petition was filed in this office for Manasse's reprieve and commutation of sentence, signed by the District Attorney and Sheriff of Sacramento County, and by many of the jurymen who tried Manasse. Also requests of like nature were received from Hon. E. C. Hart, Judge of the Superior Court of Sacramento County before whom Manasse was tried, and from Hon. W. H. Reilly, Warden of the Folsom Prison. On the 21st day of May, 1908, I granted a commutation of sentence.

APRIL 15, 1908. J. W. FINLEY, convicted in the Superior Court of the county of Sacramento in December, 1906, of the crime of assault with a deadly weapon with malice aforethought, defendant then being a prisoner undergoing a life sentence in the State Prison. As punishment therefor, Finley was sentenced to be executed at the State Prison at Folsom, the 2d day of March, 1906. Finley thereafter appealed his case to the Supreme Court of the State, which appeal was denied. The Superior Court of Sacramento County thereafter ordered that Finley be executed on the 17th day of April, 1908. By reason of my absence from the State I had no opportunity to examine the matters submitted to this office upon his application for clemency. I therefore reprieved him until the 15th day of May, 1908. Subsequent reprieves were made on May 14th, May 27th, June 10th, and August 12th to enable Finley to apply for a writ of error to appeal to the Supreme Court of the United States.

JULY 28, 1908. CONSTANTINO BORSEI, convicted in the Superior Court of Los Angeles County of the crime of murder in the first degree, and sentenced to be executed at San Quentin Prison on the 12th day of August, 1908. Representations were made to me by the Italian Consul, and others, that it was desired to determine the mental competency of said Borsei. To enable this to be done a reprieve was granted until the 11th day of September, 1908. There being no reason to believe at that date that Borsei was of unsound mind, the sentence was duly executed.

DECEMBER 9, 1908. FRANCISCO QUIJADA, convicted in the month of December, 1905, in the Superior Court of the county of Sacramento of the crime of assault with a deadly weapon with malice aforethought, defendant being at the time of the commission of said assault a life prisoner in the State Prison, and sentenced to be hanged. Quijada was convicted under the provisions of Section 246 of the Penal Code, and as the constitutionality of such section was in question in the case of the People vs. J. W. Finley, on appeal to the Supreme Court of the United States, I ordered a reprieve until the 12th day of February, 1909, so that he might not be executed until the constitutionality of such section was determined.

DECEMBER 9, 1908. THOMAS P. FALLON, convicted in the Superior Court of the city and county of San Francisco in the month of October, 1904, of the crime of murder in the first degree, and sentenced to be hanged on December 11, 1908. It appeared that Fallon had filed a petition in the Supreme Court of the State of California for a certificate of probable cause to determine the validity of the warrant of execution. At the time of such filing the Supreme Court was not in session, and I granted a reprieve in order to have this matter properly presented before the Supreme Court, and to give them due time for the consideration thereof. Execution of the judgment, by such reprieve, was stayed until Friday, January 8, 1909.

REPORT

OF THE

STATE BOARD OF EXAMINERS

TO THE

THIRTY-EIGHTH SESSION OF THE LEGISLATURE
OF CALIFORNIA.

1909.

STATE BOARD OF EXAMINERS:

JAMES N. GILLET ^T ,	- - - - -	Governor.
CHAS. F. CURRY,	- - - - -	Secretary of State.
U. S. WEBB,	- - - - -	Attorney-General.

B. B. DEMING, Secretary and Ex Officio Member.

SACRAMENTO:

W. W. SHANNON, : : : : : SUPERINTENDENT STATE PRINTING.

1908.

REPORT OF THE STATE BOARD OF EXAMINERS.

OFFICE OF THE STATE BOARD OF EXAMINERS,

SACRAMENTO, CAL., December 5, 1908.

To the Senate and Assembly of the State of California:

We have the honor to herewith submit a report of the transactions of the State Board of Examiners since December 8, 1906.

During this period 16,798 claims have been presented to this Board, aggregating.....	\$16,319,137 58
Total amount allowed	\$16,183,980 39
Total amount rejected	3,467 50
Total amount deducted for errors.....	51,227 52
Total amount withdrawn and withheld from action	80,462 17
	<hr/> \$16,319,137 58

STATEMENT BY FISCAL YEARS.

For the Fifty-eighth Fiscal Year, ending June 30, 1907.

Total claims presented, 7,301, aggregating.....	\$7,262,977 54
Total amount allowed	\$7,208,761 52
Total amount withdrawn, deducted, and rejected	54,216 02
	<hr/> \$7,262,977 54

For the Fifty-ninth Fiscal Year, ending June 30, 1908.

Total claims presented, 8,803, aggregating.....	\$8,425,691 90
Total amount allowed	\$8,368,458 93
Total amount withdrawn, deducted, and rejected	57,232 97
	<hr/> \$8,425,691 90

WHERE NO APPROPRIATION IS AVAILABLE.

Expenses in Foreclosing Delinquent School Land Purchases.

Under the law, the first payment of principal and interest made by purchasers of state school lands is available to cover the expenses incurred by the district attorneys in instituting foreclosure proceedings in cases where delinquency occurs. In many cases this first payment is inadequate to meet the necessary expense, and this fact is probably one of the chief reasons why there is such laxness in the commencement and

completion of proceedings to foreclose delinquent purchasers of school lands throughout the state.

This Board, in passing upon the expense claims of various district attorneys during the past two years, has been unable to allow the following amounts due the respective prosecutors because of lack of funds. These are just claims, and we recommend that an appropriation be made to pay the same.

Name.	County.	Amount.
Fredericks, J. D.....	Los Angeles	\$12 02
Kerr, M. C.....	Plumas	41 46
Laird, J. W. P.....	Kern	227 69
Nelson, Albert	San Luis Obispo	428 28
Rankin, R. M.....	Lassen	85 86
Tillotson, W. D.....	Shasta	36 73
		<hr/>
		\$832 04

Southern Construction Company.

This company has presented a claim against the State Normal School at San Diego for the grading of Campus avenue, fronting the property of that State institution, which arose under the following conditions, according to information submitted to this Board:

During the year 1905, the common council of the city of San Diego determined that it was necessary to grade Campus avenue, in said city, from the west line of Park boulevard to a point 325 feet north of the north line of Madison avenue, and on the streets intersecting it between said lines, and duly passed and adopted its resolution of intention to order said work done under the Vrooman act. Notices to this effect were posted in accordance with law, and the district affected by the proposed work was properly determined, to which actions of the council no protest or appeal was made or taken. The work was thereupon ordered done, bids were advertised for, and the contract for grading said Campus avenue was let to the Southern Construction Company, which was the lowest bidder. The total cost of said work was \$3,303.98, of which amount the state property was assessed \$713.48, and the percentage which said property should bear of the crossings and terminations \$158, making a total assessment of \$871.48, as shown by assessment No. 134. The contract was completed and accepted by the superintendent of streets of said city on the 9th day of June, 1906. The warrant, assessment, and diagram were delivered to the Southern Construction Company, who made demand on the property for payment on the 6th day of July, 1906, and returned said warrant, assessment, and diagram to the office of the superintendent of streets on the 7th day of July, 1906, and under the law said claim bears interest at the rate of 10 per cent per annum from the day of the return of said warrant.

The claim in question now amounts to the sum of \$1,077.23—principal

\$871.48, and interest to November 7, 1908, \$205.75—and has been presented to this Board duly attested and approved by the board of trustees of the State Normal School at San Diego. We recommend that an appropriation be made to pay the same.

DEFICIENCIES.

By virtue of the provisions in section 5 of the General Appropriation Act of 1907, and also in the act approved March 23, 1893 (Stat. 1893, page 285), this Board has given consent to the creation of the following deficiencies, and has approved claims against the same as appears in the following tables. These deficiencies have been allowed after careful investigation and in only such cases as urgent necessity demanded. We recommend the payment of the same by this legislature.

	Amount Permitted.	Total Claims Presented.
Veterans' Home of California—Support fifty-ninth and sixtieth fiscal years	\$42,000 00	\$11,093 06
State Printing Office—Improvements, etc. (Stat. 1905, Chapter 212)	479 57	479 57

Arrest of Criminals Without the State.

As shown by the above figures, there was for the fifty-ninth fiscal year a deficiency of \$2,331.74. If the demands on this appropriation continue for the rest of the sixtieth fiscal year as they have run to date, there will be an added deficiency of about \$4,000. The amount appropriated for these two fiscal years was \$10,000, which, together with the probable deficiency, will make a cost of between \$16,000 and \$17,000.

We believe that under the present law, if adequate provision is made to meet this expense, there should be appropriated at least \$20,000 for the next two fiscal years. This seems a large increase, but there have

always been deficiencies in this appropriation, and it does not seem right that state agents should be appointed, expend their own money for the necessary expenses of the service and be compelled to wait a year or more for payment.

There is no doubt that the State is imposed upon to some extent in this matter, and is without recourse. In some instances, agents who are asked for by the county will be unable to return the criminals after going to the expense of a long trip, and in other cases when the criminals are brought back, they will either not be placed on trial, or the evidence against them will be insufficient. We believe there would be greater care taken by the county officials and less requisitions petitioned if the counties were required to at least pay the expenses in all cases where the criminal is not returned or not placed on trial or convicted. This would mean a considerable saving to the State, and would not work any injustice.

Transportation of Prisoners, Children, and Insane.

The expense of transporting prisoners, insane, and delinquent and feeble-minded children to the different institutions is becoming a considerable burden to the State. The appropriation for this purpose has never been made adequate for the needs, and every year there have been deficiencies to be met.

The cost of prisoners and delinquent children has especially increased since the beginning of the fifty-ninth fiscal year, in spite of the fact that the average per capita cost has decreased. This increase is occasioned by the unusual increase in the number delivered to the prisons and schools. In the fifty-seventh fiscal year there were 2,376 prisoners and children transported, at a cost of \$33,557.88; in the fifty-eighth fiscal year 2,404, at a cost of \$34,937.96; and in the fifty-ninth fiscal year 2,976, at a cost of \$44,714.31.

With the insane and feeble-minded the number and cost have also increased. In the fifty-seventh fiscal year there were 1,502 patients delivered, at a cost of \$36,877.02; in the fifty-eighth 1,522, at a cost of \$38,031.64; and in the fifty-ninth 1,597, at a cost of \$41,199.45.

The total appropriation for transportation of prisoners, insane, and feeble-minded children for the fifty-ninth fiscal year was \$70,000. The total cost was \$85,913.76, leaving a deficiency of \$15,913.76. The cost for the present fiscal year, up to December 1st, is a little more than it was last year for the same period. On this basis, provision should be made for a deficiency appropriation of at least \$33,000 for the two years. Figuring on the basis of the fifty-ninth and sixtieth fiscal years, there should be appropriated for the sixty-first and sixty-second fiscal years, at the least estimate, the sum of \$175,000.

This seems a considerable increase over what was appropriated last session, but under the present law there is no adequate remedy for it.

The cost of transporting prisoners and children has gradually been made uniform and equitable, and this Board sees little chance for improvement in this service as now conducted. The present system of transporting insane and feeble-minded is not altogether satisfactory, but we hope with the coöperation of the sheriffs to further improve this service and place it on a basis entirely fair to the sheriffs and at the same time fully protect the interests of the state and the rights of the patient.

Under the law the relatives of insane persons, if they have any property or means, must bear all the expense of transporting the patient to the hospital. It is, therefore, but fair that these expenses should be kept down as low as possible, and it has been our constant endeavor to reduce these expenses to the lowest equitable point consistent with the law and at the same time fully recognizing the rights of the sheriffs.

With the exception of two or three counties, this service is now in a satisfactory condition, and the compensation allowed sheriffs is uniform and equitable. The question of the proper per diem to be allowed to the sheriffs in these two or three counties where only a very small portion of a day is used is still unsettled, but we expect soon to agree with the Sheriffs' Association on a schedule fixing the per diem to be allowed all sheriffs to each of the state hospitals, thereby placing all sheriffs without question upon an equal basis. We hope to solve the problem and devise an entirely equitable and satisfactory system without the aid of additional legislation unless the entire system of transportation should be changed.

We give herewith a tabulated statement of the expense of transportation of insane and feeble-minded during the fifty-ninth fiscal year, showing the cost per county, segregated into the four principal divisions, sheriff's per diem, assistant's per diem, expenses of assistant and expenses of sheriff or deputy and patient. This table is self-explanatory.

Statement of the Expense of Transportation of Insane and Feeble-Minded.

County.	Sheriff's Per Diem.	Assistant's Per Diem.	Traveling Expenses of Assistant.	Traveling Expenses of Sheriff and Patient.	Total.

SUPPORT OF DEPENDENT CHILDREN.

There was appropriated for the fifty-ninth and sixtieth fiscal years the sum of \$950,000 to be expended for the support of dependent orphans, half orphans, and abandoned children. Against the one half of this sum, available for the fifty-ninth fiscal year, there have been audited claims for the support of children to the amount of \$405,483.34 and traveling expenses to the amount of \$1,353.24. For the fifty-eighth fiscal year claims were audited for these purposes to the amount of \$434,384.58. This shows a reduction for the fifty-ninth year of \$27,548. The total claims presented for the fifty-ninth year for support of children amounted to \$422,865.66, showing a deduction on the face of the claims of \$17,382.32.

These deductions for the fifty-ninth fiscal year can be accounted for to a great extent by the fact that the legislature of 1907 allowed this board an expert who, commencing with the first of July, 1907, has been continually visiting the different counties and state institutions drawing aid for the support of dependent children. He has made frequent reports on the conditions of the various institutions and has checked up their accounts and the accounts of the counties, besides making hundreds of personal investigations where there seemed to be doubt of the need of the claimants.

New and uniform methods of accounts and other changes have been installed, all tending toward the creation of a healthy condition in the matter of state aid. It is not probable that the present year's expenditures will be reduced beyond that of the fifty-ninth fiscal year. While there are still some excesses, which are being gradually eliminated, there is of necessity a natural increase in legitimate calls for aid in a state situated as California is and increasing as it is in population.

It has been the aim, not only to protect the state from impositions, but at the same time to see that proper care is rendered the unfortunate children and that they are receiving such support as the law grants them.

The number of children supported, and the amount of aid given to institutions and counties for the past two years, is shown as follows:

Fifty-eighth Fiscal Year.

	No. of Children.	Amount Paid.
Institutions	5,080	\$326,145 12
Counties	2,094	108,239 46
Totals	7,174	\$434,384 58

Fifty-ninth Fiscal Year.

	No. of Children.	Amount Paid.
Institutions	4,827	\$300,660 01
Counties	2,135	104,823 33
Totals	6,962	\$405,483 34

In the following tables we give a detailed statement of the amount which each institution and county received for the fifty-eighth fiscal year, ending June 30, 1907, and the fifty-ninth fiscal year, ending June 30, 1908.

BONDS FOR BENEFIT OF STATE SCHOOL FUND.

During the past two years this Board has completed the purchase of bonds for the benefit of the State School Fund in the amount of \$1,777,100, as shown in detail in the table of bonds following, which bonds were purchased on an average net income basis of 4.124 per cent. We have also purchased, but not received, \$70,000 5 per cent Wilmington municipal improvement bonds to net 4.89 per cent; the \$25,000 5 per cent issue of Porterville School District bonds (Tulare County), to net 4.50 per cent; the \$60,000 5 per cent issue of Covina Union High School District bonds (Los Angeles County), to net 4.46 per cent; and the \$25,000 6 per cent issue of Brawley School District bonds (Imperial County), to net 5.75 per cent.

As a matter of general information and a concise and permanent record, we have compiled a complete tabular statement of all the investments of the proceeds from sales of State school lands since the State first received its allotment of lands from the Government for permanent school purposes.

The legislature first took definite action in this matter when it passed an act in 1852 providing that State Debt bonds when redeemed should be purchased out of receipts from school land sales and interest continued thereon for the benefit of the State School Fund. Up to May 1, 1858, there was received into the State treasury in cash from these sales the sum of \$475,520, which should have been placed in the School Land Fund and invested as the statute above provided. This was not done, however, but the money was turned into the General Fund and used for expenses of State government, and in lieu of the proper investment, the legislature from year to year appropriated from the General Fund interest on the amount so diverted at the rate of 7 per cent per annum.

On February 7, 1859, a State School Land Fund account was first opened on the books of the State Treasurer and Controller. From that time on the receipts from school land sales were placed in that fund. On March 8, 1859, the State Board of Examiners made its first purchase of bonds from that fund for the benefit of the school fund.

Until 1863 the State paid interest on the full amount of diverted school land money. The legislature of that year passed another act, requiring that when any State Funded Debt bonds of 1857 and 1860 were redeemed they were not to be canceled, but were to be continued in force as an investment for the benefit of the School Fund, up to the amount of a redemption value of \$475,520. In 1865 the Treasurer's report shows that \$606,000 of State Debt bonds were held for the benefit of the School Fund, of which amount the Board of Examiners had purchased \$119,000, and the balance of \$487,500 was deposited in

redeemed bonds in accordance with the above-mentioned act of the legislature.

The bulk of these State bonds, with others afterwards purchased, were held as an investment until 1873, when they were exchanged for the Funded Debt bonds of that year bearing 6 per cent interest, which bonds to the amount of \$1,526,500 are still held for the benefit of the School Fund.

In 1907 the legislature transferred \$250,000 from the State School Land Fund to the General Fund for the relief of the San Francisco Harbor Fund, upon which the latter fund pays to the General Fund for the benefit of the School Fund interest at the rate of 4 per cent per annum. The amount of principal so borrowed is being returned to the State School Land Fund at the rate of \$50,000 per annum.

The following table gives a detailed statement of the bonds and moneys which, from time to time, have been held as investments for the School Fund. This shows that the average net income from these investments, since the beginning, has been at the rate of 5.084 per cent.

There was, on the first day of December, 1908, \$5,898,775 of State school land moneys invested for the benefit of the School Fund, with an average net income of 4.524 per cent.

[illegible]

ESTATES OF DECEASED PERSONS FUND.

There is at present the sum of \$113,196.21 in the Estates of Deceased Persons Fund. In addition to this is the sum of \$80,000, which was transferred from this fund to the General Fund by act of the legislature in 1891, making a total sum of \$193,196.21 belonging to the Estates of Deceased Persons Fund.

Under section 4, article IX of the constitution, this money "shall be inviolably appropriated to the support of common schools throughout the State," but so far none of the receipts into this fund have been turned over into the State School Land Fund for investment, as they eventually will be upon final escheatment.

We believe that under the constitution this money should now be available for investment for the benefit of the common schools, and to that end we recommend that the \$80,000 be returned from the General Fund, and that the Board of Examiners be given the power to invest the Estates of Deceased Persons Fund in bonds for the benefit of the School Fund up to such amount only as will leave sufficient money in the fund for the incidental expenses against it.

Respectfully submitted.

J. N. GILLETT,
Governor,
C. F. CURRY,
Secretary of State.
U. S. WEBB,
Attorney-General.

REPORT

OF THE

BOARD OF STATE CAPITOL COMMISSIONERS

TO THE

THIRTY-EIGHTH SESSION OF THE LEGISLATURE OF CALIFORNIA.

1909.

BOARD OF STATE CAPITOL COMMISSIONERS:

HON. JAMES N. GILLET,	- - - - -	GOVERNOR.
HON. CHARLES F. CURRY,	- - - - -	SECRETARY OF STATE
HON. W. R. WILLIAMS,	- - - - -	STATE TREASURER.
E. F. MITCHELL, SECRETARY.		

SACRAMENTO:

W. W. SHANNON, : : : : SUPERINTENDENT STATE PRINTING.

1908.

REPORT

OF THE

BOARD OF STATE CAPITOL COMMISSIONERS.

SACRAMENTO, December 1, 1908.

To the Senate and Assembly of the State of California.

The Board of State Capitol Commissioners has the honor herewith to submit a report of its work during the past two years.

In accordance with the act of the legislature approved by the governor on March 18, 1905, entitled "An act authorizing and directing the Board of State Capitol Commissioners to remodel and repair the State Capitol Building, making the same fireproof, rendering all space therein available, and making an appropriation therefore," this commission took charge of the work after the architects had been engaged, plans accepted, and after all the contracts had been let. The inconvenience suffered by the public and the two sessions of the legislature and by such departments as retained offices in the building while the Capitol was undergoing repairs was very great. The work progressed slowly. Many delays were occasioned by some of the contractors being unable to procure material—this necessarily delayed the contractors who had their material, but could not go on and finish their work until the same was made ready for them. One contractor, the painter, abandoned his work after practically finishing the outside of the building; the interior was finished by the Commissioners under the able management of its superintendent, Mr. Getchell, whose report on all divisions of the contract is herewith submitted:

To the Honorable Board of State Capitol Commissioners.

GENTLEMEN: The remodeling of the State Capitol having been completed, I hereby submit my report. After consulting this commission and the architect, we found it necessary to make a number of changes deviating from the plans and specifications in order to accommodate the different occupants of the building.

Division 1—We found it necessary to make the following changes: In the area way, an oil pit was dug and tank installed eight feet below the level of the basement floor. First floor, two vaults were left remaining and several extra openings were cut through, and three piers were built. Second floor, two piers and one extra opening.

Third floor, two piers and extra opening. Granite coping was provided for around the area on the north, south and west sides of the building. Fourth floor, six extra windows were cut through.

Division 2—We found it necessary to add several beams and strengthen trusses throughout different parts of the building, also window guards.

Division 3—In this division we have made the following changes: First floor, hall, two rooms, several, doors, one window, and large transom. Second floor, two halls, several openings, and two large transoms; also under gallery of Senate and Assembly chambers changed from plain walls to columns. Third floor, four rooms and five doors were added.

Knob and bushing work changed to a strictly conduit system throughout the building. This change was made, as we found it impossible to use the knob and bushing. In the Senate and Assembly chambers we have doubled the lighting capacity; also in the State Library on the second and third floors, and the rotunda and main entrance. Extra base plugs have been provided for desk lights on the first and second floors; twelve arc lights at the top of dome; two circuits were run on the second floor in order to light the great seal of the state of California; extra circuits were also run to the archives, doubling the capacity in those rooms. Newel posts on main stairway have been provided with lights; several rooms and hallways have been provided with lights throughout the building which do not show on the plans; also burglar alarm system installed in Treasurer's office.

Division 4—Wash basins and toilets were changed in different parts of the rooms. thirty-nine extra basins were added on the fourth floor, one on the first floor, and Governor's toilet on first floor. A vacuum cleaning system has been installed on the first, second, and third floors; also six urinals were added for the use of the members of the Senate and Assembly.

Division 5—Several radiators have been changed in different parts of the rooms, one radiator added, one large boiler, auxiliary boiler and oil tank in basement.

Division 6—One fireproof partition on first floor, concrete floor, fireproof partition on mezzanine, one hall partition. Second floor, two hall partitions. Third floor, one hall and three rooms partitioned. Fourth floor, one closet partition.

Division 7—Painter, after finishing outside of building and part of inside, abandoned the contract and the Commission was compelled to finish the painting.

Division 8—No changes from plans and specifications.

Division 9—Metal jib panels were provided under main stairs, second and third floors; brass railing under gallery in Senate and Assembly chambers.

Division 10—On second floor corridors, terrazo floor was changed to marble mosaic; two marble panels were provided under stairway of first floor, and marble back of the Senate and Assembly chambers.

On third floor, we have tinted twenty-two rooms; second floor, seven rooms and four decorated; first floor, Governor's three rooms decorated; Secretary of State, three rooms; Treasurer's, three rooms; Controller's, four rooms; Attorney General's, three rooms; Board of Equalization, two rooms; Judges' chambers, three rooms; Clerk of the Supreme Court, two rooms tinted; Appellate Court, one room tinted; corridors on first, second, and third floors tinted, and galleries under Senate and Assembly tinted and lincresta.

All of the above is extra work not called for in the plans and specifications.

All other work has been done according to plans and specifications.

S. W. GETCHELL.

Dated, Sacramento, California, August 31, 1908.

This Commission calls the attention of the legislature to its arrangement of the rooms, for the President of the Senate (the Lieutenant-Governor), the Speaker of the Assembly, the Sergeant-at-Arms, the bill filers, and bill clerks of each body, which immediately adjoin each

legislative hall, a convenience for the legislature not found in many capitols, not even excepting our magnificent Capitol at Washington, where these officials are distributed and widely separated over three floors. By moving the State Printer from the first to the second floor another convenience was gained for the legislature as well as the Printer—especially will this be true during the closing hours of the session.

Below is given the amount paid to and the name of the contractors for each subdivision of the work:

John Hayes, masonry.....	\$53,886 00
Russell Vail Engineering Co., heating, etc.....	17,100 00
Geo. S. Smith & Sons, painting.....	9,740 00
Jas. Campbell, carpentering.....	\$1,805 00
R. Dalziel, Jr., Company, plumbing.....	19,800 00
Chas A. Palm, steel work.....	39,000 00
Roebing Construction Company, roof, etc.....	48,400 00
Bryan Elevator Company, elevators.....	9,755 00
Columbia Marble Works, marble work.....	13,985 44
A. Merle Company, ornamental work.....	30,680 00
Scott, Lyman & Stack, gas and electric fixtures.....	6,002 80
Electric Supply Company, gas and electric fixtures.....	2,584 92
	<hr/>
	\$332,739 16
Sutton & Weeks, architects	16,202 53
	<hr/>
	\$348,941 69
	<hr/>
The Legislature of 1905, on March 18th, appropriated.....	\$352,925 00
The Legislature of 1907, on March 11th, appropriated.....	20,000 00
	<hr/>
Total	\$372,925 00

The balance of \$23,983.31 was used for labor and material for temporary winter roof during construction, for salary of superintendent and extras.

CAPITOL PARK.

The removal of the State Fair Pavilion from the Capitol grounds to the new State Fair grounds leaves a portion of the Capitol park to be put into proper shape either by refilling the excavation with dirt and loam and sowing to grass, roses, and shrubbery, or by filling with water, which, with the addition of one or two fountains and rockeries and planting of trees and shrubbery would beautify the park more than an additional lawn would.

The hiring of all extra men in the summer and the work of one regular man the year round could be dispensed with by the installation of an automatic water sprinkling system.

On December 1, 1908, the balances in the various funds under the control of the Commission were as follows:

Purchase of implements, etc.....	\$3,891 71
Water for Capitol grounds.....	600 00
Lighting for Capitol grounds.....	504 00

E. F. MITCHELL,
Secretary.

BIENNIAL REPORT
OF THE
SECRETARY OF STATE
OF THE
STATE OF CALIFORNIA
FOR THE
FIFTY-EIGHTH AND FIFTY-NINTH FISCAL YEARS

Beginning July 1, 1906, and Ending June 30, 1908

C. F. CURRY, Secretary of State

SACRAMENTO:

W. W. SHANNON, : : : SUPERINTENDENT OF STATE PRINTING.
1908.

REPORT OF SECRETARY OF STATE.

STATE OF CALIFORNIA—DEPARTMENT OF STATE,
SACRAMENTO, July 1, 1908.

*To His Excellency JAMES N. GILLETT,
Governor of the State of California.*

SIR: I have the honor to present herewith my fourth biennial report as Secretary of State, which contains a statement of all fees received by this office, namely, by the Corporation Department, Corporation License Tax Department, and Motor Vehicle Department, from July 1, 1906, to June 30, 1908, inclusive.

The report includes a list of all corporations, both foreign and domestic, that have filed certified copies of articles of incorporation in this office since June 30, 1906; also, the names of all architects who have been granted licenses under an Act of the Legislature approved by the Governor March 23, 1901, known as the "Architect's Law"; also, a list of Licensed Public Accountants, list of County Clerks, and list of Notaries Public of San Francisco, with date of their commissions. The report also shows the receipts and expenditures of this department.

Aside from the regular duties of the office, the Secretary of State is ex officio custodian of the Capitol Building, a member of the State Board of Examiners, the State Commission of Lunacy, the State Forestry Commission, the Ballot Machine Commission, and of the State Capitol Commissioners, who have charge of the Capitol grounds.

ACTS OF THE EXECUTIVE.

The records of this office show that the Governor has granted 32 pardons, 63 commutations of sentence, and 6 reprieves; has signed 675 restorations to citizenship; has issued 4 proclamations offering rewards, and 61 holiday and other proclamations; has granted 1,482 orders of release of prisoners from various State prisons under the Goodwin Act; has signed 611 land patents; has commissioned 2,952 notaries public and 40 commissioners of deeds; has made 551 executive appointments; has approved 55 official bonds; extradition refused, 1; transfer of prisoners, 1.

OFFICE WORK OF THE CORPORATION DEPARTMENT.

The following statement of the clerical work performed during the two fiscal years ending June 30, 1908, together with the financial statement, which is found farther on in this report, shows a very large

increase over previous years, particularly so in the filing, recording, and issuing of certificates of incorporation and the furnishing of certified copies thereof.

During the two years ending June 30, 1908, there were 7,487 articles of incorporation filed, recorded, and certificates issued, as against 6,303 during the two years preceding. During the last two years I have certified to 9,526 copies, as against 6,370 for the previous two years. The office made 3,037 certified copies of articles during the last two years, as against 1,010 for the previous two years. The filing of claims to trademarks has considerably increased.

In addition to the vast amount of work required to keep up the records of the office since the last session of the Legislature, I have compiled the fourth edition of the Corporation Laws, the amendments to the Election Laws, Pure Food Laws, a list of incorporated cities and towns, and the Constitution of the United States and State of California, and other State papers. The last-named book was in great demand for use in the public schools in studying civil government, and the supply was soon exhausted. A Blue Book or State Roster was published during 1907, and 7,500 volumes were issued and distributed throughout the State by the Senators, Assemblymen and the various State officials, and by the Secretary of State's office. The few at my disposal were distributed to newspapers, etc., and in my judgment to the best advantage, after supplying the various United States, State, city and county officials, high schools and libraries, as required by law.

Upon an examination of the financial statement it will be seen that the increase of the receipts amounts to \$131,847.97 over those of the previous two years, not including the receipts from the corporation license tax or the receipts from the issuing of motor vehicle seals and chauffeurs' licenses.

During the two years from July 1, 1906, to June 30, 1908, there were in this office—

FILED AND RECORDED.

Articles of incorporation (of these 882 were foreign and 87 were railroad)	7,487
Bonds	55
Trademarks (certificates).....	415
Rewards	4
Deeds	13

ATTESTED AND RECORDED.

Commutations of sentence.....	63
Pardons	32
Reprieves	6
Orders of release (of which 675 were restorations to citizenship) .	1,482
Land patents	611

FILED.

Designations of agents of foreign corporations.....	874
Certificates of creation of bonded indebtedness.....	210
Amended articles of incorporation.....	291
Certificates of increase or decrease of capital stock.....	522
Certificates of continuance of existence of corporations.....	9
Certificates of removal of principal place of business.....	200
Certificates of increase or decrease of number of directors.....	242
Certificates of change of name of corporations.....	265
Decrees of dissolution.....	34

ATTESTED COMMISSIONS.

Notarial	2,952
Commissioners of deeds.....	40
Executive appointments.....	551
Holiday and other proclamations.....	61

AFFIXING CERTIFICATES AND SEALS TO COPIES.

Copies made in this office.....	3,037
Copies furnished	6,489

In the appended tables there will be found a statement of the amount of stationery used by the Legislature during the regular and special sessions, and by the State officers for the two fiscal years, as supplied from the State Janitor's office.

A statement is hereto appended showing the receipts of the Corporation Department from July 1, 1906, to June 30, 1907, inclusive, amounting to \$313,366.75, while the salary list of the employes for said year amounted to \$20,720.00, exclusive of my salary of \$3,000.00, showing that this office turned into the State Treasury \$292,646.75 in excess of salaries paid for conducting the office.

For the fiscal year from July 1, 1907, to June 30, 1908, inclusive, the total receipts amounted to \$202,846.32, while the salary list of the employes amounted to \$23,200.00, exclusive of my salary, which shows that the office turned into the State Treasury \$179,646.32 in excess of the amount paid for salaries of the office.

This office filed eleven hundred (1,100) more copies of articles of incorporation during the fiscal year ending June 30, 1908, than were filed during the preceding fiscal year, but owing to the fact that the corporations were organized for smaller amounts of capital stock, the receipts were \$110,520.43 less than during the fiscal year ending June 30, 1907.

The total receipts of the office, exclusive of the corporation license tax and Motor Vehicle Department, for the fifty-eighth and fifty-ninth fiscal years, amounts to \$516,213.07; the receipts for the fifty-sixth and fifty-seventh fiscal years amounted to \$384,365.10, showing an increase in the last two years of \$131,847.97.

Appended to this report will be found a copy of the fee bill of the Secretary of State's office.

CORPORATION LICENSE TAX DEPARTMENT.

The corporation license tax law was amended and approved June 13, 1906, making the license tax on all corporations \$20.00. All corporations which became delinquent in the payment of said \$20.00 tax became liable for a penalty of \$10.00 in addition. Under this law as amended the following amounts were collected, to wit: For the period commencing July 1, 1906, and ending June 30, 1907, inclusive, the sum of \$305,190.00 was collected, segregated as follows:

12,790 corporations paid the sum of \$20.00	\$255,800 00
1,405 corporations paid the sum of \$20.00 and \$10.00 penalty.....	42,150 00
158 corporations paid the sum of \$35.00 for revivor licenses.....	5,530 00
38 corporations paid the sum of \$45.00 for revivor licenses.....	1,710 00
<hr/>	
14,391 Total	\$305,190 00
The expenses for the year were.....	8,886 55
<hr/>	
The net gain to the State was.....	\$296,303 45

The total number of domestic corporations which forfeited their charters and of foreign corporations which forfeited their rights to transact business in this State for their failure to pay the license tax for the period above referred to was 2,444.

The number of corporations that filed articles during this year and were exempted under section 7 of the license tax law was 469.

On March 19th and 20th, 1907, the corporation license tax law was amended by placing the license tax on a graduated scale, payable according to the amount of the authorized capital stock of corporations, the amount of the tax ranging from \$10.00 up to \$250.00. The amount of penalty for delinquency was left at the same amount, \$10.00.

Under the law as amended there was collected during the period commencing on July 1, 1907, and ending on June 30, 1908, inclusive, the sum of \$672,300.00, segregated as follows:

12,364 corporations paid the graduated tax in the sum of.....	\$553,775 00
1,617 corporations paid the graduated tax and \$10.00 penalty	89,915 00
66 corporations paid \$30.00 for revivor licenses under section 6 of the law	1,980 00
58 corporations paid \$45.00 for revivor licenses under section 6 of the law	2,610 00
1,201 licenses were issued under the provisions of section 10b at \$20.00.	24,020 00
<hr/>	
15,306 Total.....	\$672,300 00
The expenses for salaries of clerks, materials, stationery, etc., were....	14,643 18
<hr/>	

Leaving a net gain to the State of..... \$657,656 82

The number of domestic corporations which forfeited their charters and of foreign corporations which forfeited their rights to transact business in this State was 2,756.

The number of corporations that filed articles during this year and were exempted under the provisions of section 7 of the license tax law was 303.

The following is the corporation license tax schedule, and is due and payable annually between July 1st and September 1st. From September 1st until December 1st a penalty of \$10.00 is added. Corporations failing to pay tax by December 1st forfeit their charters and rights to do business in the State.

When capital stock is not over \$10,000, license is.....	\$10 00
Over \$10,000 to \$20,000, license is.....	15 00
Over \$20,000 to \$50,000, license is.....	20 00
Over \$50,000 to \$100,000, license is.....	25 00
Over \$100,000 to \$250,000, license is.....	50 00
Over \$250,000 to \$500,000, license is.....	75 00
Over \$500,000 to \$2,000,000, license is.....	100 00
Over \$2,000,000 to \$5,000,000, license is.....	200 00
When capital stock is over \$5,000,000, license is.....	250 00

Corporations filing from July 1st to December 1st, inclusive, are required to pay a license tax of \$20.00 irrespective of the capitalization.

SUMMARY OF RECEIPTS OF OFFICE FOR THE TWO YEARS ENDING JUNE 30, 1908.

Receipts of Corporation Department.....	\$515,213 07
Receipts of Corporation License Tax Department.....	977,490 00
Receipts of Motor Vehicle Department.....	33,267 50
Total	\$1,525,970 57

THE STATE CAPITOL.

The Legislature of 1905 made an appropriation of \$352,925, and the Legislature of 1907 an additional appropriation of \$20,000 to be expended in painting, repairing, and remodeling the State Capitol, the same to be done under the direction of the State Capitol Commissioners. The work was commenced on the 13th of April, 1906, and is about completed. For the condition of the Capitol Building I refer you to the report of the State Capitol Commission, as the building is in its charge during the repair and remodeling work.

INDEX TO LAWS.

The Code Commissioner prepared an index to the laws from 1850 to 1907 which was badly needed, the previous index having been made up to 1893. The books are now on sale by this office. The Board of Examiners fixed the price at \$3.00 a copy, 36 cents added for postage or expressage.

STATE ARCHIVES.

The archives and records of the Secretary of State's office are valuable beyond estimation, and should be protected against any possible danger from fire, and, therefore, I recommend that the wooden boxes and cases in which they are kept be replaced with metal furniture and cases.

STATEMENT SHOWING RECEIPTS OF THE OFFICE BY FISCAL YEARS COVERING THE PERIOD OF MY INCUMBENCY.

From July 1, 1898, to June 30, 1899.....	\$27,518 30
From July 1, 1899, to June 30, 1900.....	36,135 25
From July 1, 1900, to June 30, 1901.....	92,340 00
From July 1, 1901, to June 30, 1902.....	133,172 99
From July 1, 1902, to June 30, 1903.....	156,537 10
From July 1, 1903, to June 30, 1904.....	152,251 15
From July 1, 1904, to June 30, 1905.....	170,087 10
From July 1, 1905, to June 30, 1906.....	373,339 50
From July 1, 1906, to June 30, 1907.....	635,053 25
From July 1, 1907, to June 30, 1908.....	891,917 32
Total	\$2,668,351 86

Respectfully submitted.

C. F. CURRY,
Secretary of State.

FINANCIAL STATEMENT.

RECEIPTS OF OFFICE.

Fifty-eighth Fiscal Year—July, 1906, to June, 1907.		Fifty-ninth Fiscal Year—July, 1907, to June, 1908.	
July	\$21,322 50	July	\$17,939 25
August	25,866 35	August	19,560 00
September	21,800 35	September	17,473 95

Secretary of State.

FEE BILL OF SECRETARY OF STATE'S OFFICE.

CHAPTER 281.—*An Act to amend section four hundred and sixteen of the Political Code, relating to the fees of the Secretary of State.*

[Approved March 18, 1907.]

The People of the State of California, represented in Senate and Assembly, do enact as follows.

SECTION 1. Section four hundred and sixteen of the Political Code is hereby amended to read as follows:

§ 416. The Secretary of State, for services performed in his office, must charge and collect the following fees:

1. For a copy of any law, resolution, record, or other document or paper on file in his office, twenty cents per folio.

2. For comparing a copy of any law, resolution, record, or other document or paper with the original, or the certified copy of the original, on file in his office, five cents per folio.

3. For affixing certificate and seal of state, unless otherwise provided for, two dollars.

4. For filing articles of incorporation, if the capital stock amounts to twenty-five thousand dollars or less, fifteen dollars; if the capital stock amounts to over twenty-five thousand dollars, and not over seventy-five thousand dollars, twenty-five dollars; if the capital stock amounts to over seventy-five thousand dollars, and not over two hundred thousand dollars, fifty dollars; if the capital stock amounts to over two hundred thousand dollars, and not over five hundred thousand dollars, seventy-five dollars; if the capital stock is over five hundred thousand dollars, and not over one million dollars, one hundred dollars; if the capital stock is over one million dollars, fifty dollars additional for every five hundred thousand dollars or fraction thereof of capital stock over and above one million dollars; for filing articles of incorporation without capital stock, except coöperative associations, five dollars; for filing articles of incorporation of coöperative associations, formed under the Act of eighteen hundred and ninety-five, and Acts supplementary thereto or mandatory thereof, fifteen dollars.

5. For recording articles of incorporation, twenty cents per folio.

6. For issuing certificate of incorporation, three dollars.

7. For filing certificate of increase of capital stock, five dollars for every fifty thousand dollars or fraction thereof of such increase.

8. For filing certificate of decrease of capital stock, five dollars.
9. For filing notice of removal of principal place of business, five dollars.
10. For filing amended articles of incorporation, unless otherwise provided for, five dollars.
11. For filing certificate of creation of bonded indebtedness, or increase or decrease thereof, five dollars.
12. For issuing certificate of increase or decrease of capital stock, three dollars.
13. For filing certificate on continuance of existence, five dollars.
14. For issuing certificate of continuance of existence, three dollars.
15. For filing claim to trademark, and issuing certificate of filing, five dollars.
16. For issuing certificate of filing of any document, not otherwise provided for, three dollars.
17. For filing certificate of increase or decrease of number of directors, five dollars.
18. For issuing certificate of increase or decrease of number of directors, three dollars.
19. For receiving and recording each official bond, five dollars.
20. For filing notice of appointment of agent, five dollars.
21. For each commission, passport, or other document signed by the governor and attested by the secretary of state (pardons, military commissions, and extradition papers excepted), five dollars.
22. For each patent for land issued by the governor, if for one hundred and sixty acres or less, one dollar; and for each additional one hundred and sixty acres, or fraction thereof, one dollar.
23. For issuing certificate of official character, two dollars.
24. For recording miscellaneous documents or papers, twenty cents per folio.
25. For filing certified copy of order and decree of court, changing name, or certified copy of order and decree of court, dissolving a corporation, five dollars.

No member of the legislature or state officer shall be charged for any search relative to matters appertaining to the duties of their office; nor shall they be charged any fee for a certified copy of any law or resolution passed by the legislature relative to their official duties.

All fees collected by the Secretary of State must, at the end of each month, be paid into the State Treasury. Three thousand five hundred dollars of such monthly returns shall be credited to and constitute the State Library Fund, and the balance shall be paid into the General Fund of the State.

FOREIGN CORPORATION LAW.

- SEC. 405. Designation of person on whom process may be served. Service on the Secretary of State, when valid.
- SEC. 406. Foreign corporations, statute of limitations in favor of. Proof of corporate existence. Change of designation.
- SEC. 407. Foreign railway corporations, rights of in this State.
- SEC. 408. Foreign corporations to file certified copies of articles of incorporation.
- SEC. 409. Foreign corporations, fees to be paid by, on filing certified copies of articles of incorporation.
- SEC. 410. Foreign corporations, penalty for failure to file certified copies of articles of incorporation.

§ 405. Every corporation other than those created by or under the laws of this State must, at the time of filing the certified copy of its articles of incorporation, file in the office of the Secretary of State a designation of some person residing within the State upon whom process issued by authority of or under any law of this State may be served. A copy of such designation, duly certified by the Secretary of State, is sufficient evidence of such appointment. Such process may be served on the person so designated, or, in the event that no such person is designated, then on the Secretary of State, and the service is a valid service on such corporation.

§ 406. Every corporation which complies with the provisions of this chapter is thereafter entitled to the benefit of the laws of this State limiting the time for the commencement of civil actions, but no corporation not created by or under the laws of this State is entitled to the benefit thereof, nor can any such corporation maintain or defend any action or proceeding in any court of this State until the corporation has complied with the provisions of the preceding section. In any action or proceeding instituted against any body styled as a corporation, but not created by nor under the laws of this State, evidence that such body has acted as a corporation, or employed methods usually employed by corporations, must be received by the court for the purpose of proving the existence of such corporation, the sufficiency of such evidence to be determined by the court with like effect as in other cases. Every corporation which has complied with the laws then in force, requiring it to make and file a designation of the person upon whom process against it may be served, need not make or file any further designation. Any designation heretofore or hereafter made may be revoked by the filing by the corporation with the Secretary of

State of a writing stating such revocation. Within forty days after the death or removal from the State of any person designated by the corporation, or after the revocation of the designation, the corporation must make a new designation, or be subject to the provisions and penalties of this chapter.

§ 407. Every railway or other corporation organized for the purpose of carrying freight or passengers under or by virtue of the laws of the United States, or of any state or territory thereof, may build railroads, exercise the right of eminent domain, and transact any other business which it might do if it were created and organized under or by virtue of the laws of this State, and has the same rights, privileges, and immunities, and is subject to the same laws, penalties, obligations, and burdens as if created or organized under and by virtue of the laws of this State. Nothing contained in this section shall be construed to exempt any corporation from any duty or liability imposed upon it by any of the provisions of this chapter.

§ 408. Every corporation organized under the laws of another state, territory, or of a foreign country, which is now doing business in this State, or is maintaining an office herein, or which shall hereafter do business in this State or maintain an office herein, or which shall enter this State for the purpose of doing business herein, must file in the office of the Secretary of State of the State of California a certified copy of its articles of incorporation, or of its charter, or of the statute or statutes, or legislative, or executive, or governmental act, or acts creating it, in cases where it has been created by charter, or statute, or legislative, or executive, or governmental act, duly certified by the Secretary of State, or other officer authorized by the law of the jurisdiction under which such corporation is formed to certify such copy, and a certified copy thereof, duly certified by the Secretary of State of this State, in the office of the county clerk of the county where its principal place of business is located, and also where such corporation owns property.

§ 409. For filing and issuing a certified copy as required in section four hundred and eight of this code, corporations formed under the laws of another state, or of a territory, or of a foreign country, must pay the same fees as are paid by corporations formed under the laws of this State.

§ 410. Every corporation organized under the laws of another state, territory, or of a foreign country, which shall neglect or fail, within ninety days from the taking effect of this section, to comply with the conditions of sections four hundred and eight and four hundred and nine of this code, shall be subject to a fine of not less than five hundred dollars, to be recovered in any court of competent jurisdiction; and it

is hereby made the duty of the Secretary of State, as he may be advised that corporations are doing business in contravention of sections four hundred and eight and four hundred and nine of this code, to report the fact to the Governor, who shall instruct the district attorney of the county wherein such incorporation has its principal place of business, or the Attorney General of the State, or both, as soon as practicable, to institute proceedings to recover the fine provided for in this section, and the amount so recovered must be paid into the State treasury to the credit of the general fund of the State; in addition to which penalty, no foreign corporation which shall fail to comply with sections four hundred and eight and four hundred and nine of this code can maintain any suit or action in any of the courts of this State until it has complied with said sections; *provided*, that any such corporation which, prior to the 8th day of March, 1901, shall have complied with the provisions of the Act entitled "An Act to amend 'An Act in relation to foreign corporations,' approved April 1, 1872," approved March 17, 1899, is exempted from the provisions of this section and the two sections next preceding.

NOTE.—"An Act to amend 'An Act in relation to foreign corporations,' approved April 1, 1872," approved March 17, 1899, provided that a foreign corporation could enter this State and do business on filing a designation of agent, and did not require, as does the present law, that it must in addition thereto file a certified copy of its articles of incorporation with the Secretary of State, and a copy, duly certified by the Secretary of State of this State, in the office of the county clerk where its principal place of business is located, and also where such corporation owns property.

REPORT.

To His Excellency JAMES N. GILLET,.

Governor of California.

Herewith find a report of the transactions in the office of the State Treasurer during the fifty-eighth and fifty-ninth fiscal years, from July 1, 1906, to June 30, 1908, inclusive. As will be seen by a comparison with previous reports from this office, the volume of business is constantly increasing, the receipts for the two years being \$3,320,984.85 and the payments \$4,051,163.22 in excess of the two preceding years.

The total cash receipts were \$30,153,299.67 and the total cash payments were \$29,356,196.74, the receipts exceeding the payments by \$797,102.93 and the balance in the treasury June 30, 1908, was \$7,305,045.96.

The San Francisco Depot Sinking Fund and the San Francisco Seawall Sinking Fund are both in good condition. The present value of the Depot Sinking Fund is \$79,466.02 in excess of the statutory transfers made to insure the redemption of the bonds at maturity. The first investment made for the benefit of the Seawall Sinking Fund was made by me on October 25, 1907, in the sum of \$20,000.00 and was made on a basis to earn $4\frac{1}{4}\%$, and on June 24, 1908, I invested an additional \$10,000.00 on a basis to earn $4\frac{1}{2}\%$. This fund is still small, as it has only been open for a little over two years, but as I am permitted to invest the accumulations in municipal bonds, the surplus will rapidly accrue, and both the Depot Sinking and Seawall Sinking funds will eventually have a considerable amount to return to the Harbor Improvement Fund.

In accordance with your proclamations dated February 6, 1908, and May 27, 1908, directing the sale of an additional \$500,000.00 of the seawall bonds, I, on May 29, 1908, fixed the 2d day of July, 1908, as the day of sale, and caused the publication of the proper notice of sale to be made; and on said July 2d I sold the entire \$500,000.00 of bonds to the State of Nebraska at par.

The Legislature at the regular session of 1907 passed an act permitting the depositing, in banks, of moneys belonging to the State, which act was approved by you on February 28, 1907. Owing partly to the fact that it was something new, the banks were slow in applying for deposits, but on July 9, 1908, the first deposit was made, and gradually the amount of deposits increased until the time of the financial flurry

of last year, at which time I refrained from making further deposits for awhile. During the flurry I did not call on the banks to return the deposits; but in a few instances, where the securities had depreciated below what I considered absolutely safe, I required the banks to either return a part of the deposit or increase the securities. Statement No. 12 shows the amount on deposit at the end of each month since deposits were first made, the amount on June 30, 1908, being \$3,668,150.00. This amount was secured by bonds, as provided by law, of the par value of \$4,108,222.50, upon which was placed the market value of \$4,034,965.00. The amount of interest on deposits collected to June 30, 1908, was \$48,890.09, which did not, however, include the interest for June, amounting to \$6,190.83; and making a total of \$55,080.92 for the year. As the deposits are still increasing (the amount at this date being \$4,257,350.00) the yearly interest should be not less than \$85,000.00.

While the present method of handling the State's money is far better than the old one, of keeping it all in the vault, still the best results can not be obtained under the present laws governing the handling of the State's finances. There are no good reasons why the State should not handle its money as intelligently as any commercial institution would, and certainly no commercial institution would handle its funds as the State does. I am of the opinion that the law providing for the depositing of State money should be amended so that *all* of the money belonging to the State could be deposited under term agreements, and that all necessary laws governing the handling of State funds should be amended so that settlements with the State might be made through its various depositaries, and all warrants paid by check on the same, and I earnestly recommend such amendments. By this means the State would get interest on *all* of its money and all warrants could be paid at the place where the claim against the State originated, and a great saving in transportation charges would be had for all concerned. Were the public moneys in this State handled in the same manner as they are in most of the Eastern States, I am convinced that the bankers of this State would not have insisted on a special session of the Legislature last year for the purpose of extending the time for the payment of taxes.

Respectfully submitted.

W. R. WILLIAMS,
State Treasurer.

Dated, Sacramento, California, September 8, 1908.

STATEMENT No. 1.

Receipts, Payments, Transfers and Balances condensed, for the Fifty-eighth and Fifty-ninth Fiscal Years.

STATEMENT No. 39.

Transactions under Acts of Congress approved August 30, 1890, and March 4, 1907, and an Act of the Legislature of California, approved March 31, 1891, expressing assent of the State of California to the Act of Congress approved August 30, 1890, entitled "An Act to apply a portion of the proceeds of the public lands to the more complete endowment and support of the colleges for the benefit of agriculture and the mechanic arts, established under the provisions of an Act of Congress, approved July 2, 1862," and to the purposes of the grants of moneys authorized thereby, and to all the provisions thereof, during the fifty-eighth and fifty-ninth fiscal years.

The University of California, having the only established college in this State for the benefit of agriculture and the mechanic arts, receives, through its treasurer, all moneys received by the State of California under the above Act. The money is not paid into the State Treasury, but is turned over to the University as received from the United States Government.

Date Received.	Date Paid.	Amount.
July 13, 1906	August 1, 1906	\$25,000 00

REPORT OF STATE CONTROLLER.

CONTROLLER'S DEPARTMENT, STATE OF CALIFORNIA,
SACRAMENTO, December 15, 1908.

To HON. JAMES N. GILLETT, *Governor of California.*

SIR: I have the honor to submit herewith, in accordance with law, the report of this department for the fifty-eighth and fifty-ninth fiscal years, the biennial period commencing July 1, 1906, and ending June 30, 1908.

In addition to the usual statistical exhibits, as well as several new ones, the estimates of expenditures for the next two years, and various suggestions regarding legislation affecting the revenue laws, I have deemed it proper to include an estimate of values of property owned by the State, and also a detailed comparison of the public expenditures ten years since and at the present time.

THE RECEIPTS AND DISBURSEMENTS.

Receipts for fifty-eighth fiscal year.....	\$16,189,227 86
Receipts for fifty-ninth fiscal year	16,345,898 43
Total receipts for fifty-eighth and fifty-ninth fiscal years	\$32,535,126 29
Disbursements for fifty-eighth fiscal year.....	\$15,705,275 23
Disbursements for fifty-ninth fiscal year.....	16,318,053 59
Total disbursements for fifty-eighth and fifty-ninth fiscal years	\$32,023,328 82
Excess of receipts over disbursements for the two fiscal years	\$511,797 47

Included in the above totals are transfers and canceled warrants to the following amounts:

Fifty-eighth fiscal year—	
Transfers.....	\$1,550,287 45
Canceled warrants	442 21
	\$1,550,729 66
Fifty-ninth fiscal year—	
Transfers	\$828,273 31
Canceled warrants	2,823 65
	\$831,096 96

TEN YEARS OF RECEIPTS AND DISBURSEMENTS.

The following is a record of receipts and disbursements for each of the last ten years (transfers excluded) :

Fiscal Year.	Receipts.	Disbursements.	Excess Receipts.	Excess Disbursements.
Fiftieth (1898-9)-----	\$7,706,330 74	\$8,410,882 61	-----	\$704,551 87
Fifty-first (1899-1900)-----	10,858,917 26	9,229,321 55	\$1,629,595 71	-----
Fifty-second (1900-1)-----	9,541,359 88	9,487,378 47	53,981 41	-----
Fifty-third (1901-2)-----	9,772,269 52	9,643,013 07	129,256 45	-----
Fifty-fourth (1902-3)-----	8,960,358 26	10,446,773 36	-----	1,486,415 10
Fifty-fifth (1903-4)-----	13,105,599 43	11,993,171 78	1,112,427 65	-----
Fifty-sixth (1904-5)-----	13,598,510 98	13,144,487 46	454,023 52	-----
Fifty-seventh (1905-6)-----	13,235,236 62	11,945,862 73	1,289,373 89	-----
Fifty-eighth (1906-7)-----	14,638,940 41	14,154,987 78	483,952 63	-----
Fifty-ninth (1907-8)-----	15,517,625 12	15,489,780 28	27,844 84	-----

In two years out of the ten the disbursements largely exceeded the receipts, but in the other eight years the receipts were in excess in amounts ranging from \$27,844.84, which was the excess for last year, to \$1,629,595.71 for the year 1899-1900.

STATE OF THE FUNDS.

The exhibits, A and B, which follow, show the Controller's ledger balances in the several funds at the close of the fifty-eighth and fifty-ninth fiscal years, and also the outstanding warrants; in parallel column are shown the State Treasurer's balances, which equal the sum of the Controller's balances together with the outstanding warrants.

EXHIBIT A.

GENERAL FUND RECEIPTS IN DETAIL.

The most comprehensive of the sixty or more funds which have been created by law for the proper management of the State's finances is the General Fund, into which pass by statutory provision all moneys not specifically appropriated to other funds, and from which are met the ordinary expenses of the State Government, not including those chargeable against the State School Fund.

The following statements show the receipts into and disbursements from the General Fund for each of the two fiscal years.

EXHIBIT G.

FIFTY-EIGHTH FISCAL YEAR.

Receipts.

From property tax	\$3,644,914 48
From property tax on railroads	196,856 32
From inheritance tax	297,509 18
From counties, care of inmates at Whittier School	36,097 30
From counties, care of inmates at Preston School	26,779 17
From counties, care of inmates at Home for Feeble-Minded Children	55,897 50
From Secretary of State	599,500 90
From Insurance Commissioner	266,934 49
From Warden, San Quentin Prison	161,970 65

STATE SCHOOL FUND.

The amounts of the State moneys devoted to the support of common schools during the fifty-eighth and fifty-ninth fiscal years will appear from the following statement:

For the fifty-eighth fiscal year the tax levy for school purposes was	\$2,851,786 00
The amount actually collected was	\$2,971,501 66
From other sources the receipts were	1,190,762 89
Making an aggregate for the year of	\$4,162,264 55
For the fifty-ninth fiscal year the tax levy for school purposes was	\$3,086,419 00
The amount actually collected was	\$3,211,296 58
From other sources the receipts were	1,182,494 58
Making an aggregate for the year of	\$4,393,791 16

The amount apportioned to the several counties in the fifty-eighth fiscal year was \$4,133,670.26, equal to \$9.56 per census child and \$250 per teacher employed (numbering 8,100). In the fifty-ninth fiscal year the amount was \$4,235,141.90, equal to \$9.98 per census child and \$250 per teacher employed (8,027).

The census returns for the year ending June 30, 1908, reported to the State Controller in August, as required by law, give the total number of census children as 457,048, an increase of 16,131 over the number reported two years ago.

The amount necessary to be raised by the tax levy for school purposes for each of the next two fiscal years, the sixty-first and sixty-second, is \$3,199,336.

The following shows the receipts into and disbursements from the State School Fund for the two fiscal years covered by this report:

EXHIBIT H.

FIFTY-EIGHTH FISCAL YEAR.

<i>Receipts.</i>	
Balance from fifty-seventh fiscal year	\$1,345,405 39
Property tax	2,819,201 28

The interest on the bonds reported in the foregoing statement is the yield from securities of common schools, consisting of bonds of the State of California, aggregating \$1,726,500, together with bonds of the various counties of this State amounting to \$2,186,800 and bonds of various municipalities of this State amounting to \$1,438,775, and described in detail as follows:

STATE BONDS.

State Funded Debt Bonds of 1873—six per cent	\$1,526,500 00
San Francisco Depot Bonds—four per cent	200,000 00

\$1,726,500 00

COUNTY BONDS.

Alameda County (Oakland School District) Bonds—four per cent	296,000 00
Fresno County (Roeding School District) Bonds—five per cent	10,000 00
Glenn County Bonds—four and one half per cent	11,000 00
Humboldt County Bonds—seven per cent	10,000 00
Kern County Bonds—four and one half per cent	235,000 00
Lake County Bonds—five per cent	37,000 00
Los Angeles County (Court House) Bonds—five per cent	55,000 00
Los Angeles County (Pomona City District High School) Bonds—four per cent	41,250 00
Los Angeles County (Pasadena City School District) Bonds four per cent	50,000 00
Marin County Bonds—four per cent	86,000 00
Mendocino County Bonds—four per cent	80,000 00
Merced County (School) Bonds—four per cent	43,000 00
Monterey County Bonds—four per cent	86,000 00
Placer County Bonds—five per cent	7,000 00
Plumas County (Bridge and Highway) Bonds—four per cent	100,000 00
Riverside County Bonds—four per cent	150,000 00
Sacramento County (Capital School District) Bonds—four and one half per cent	32,000 00
Sacramento County Bonds—four and one half per cent	206,000 00
San Benito County Bonds—four and one half per cent	42,000 00

San Bernardino County (Redlands, Lugonia, and Crafton High School)

Bonds—five per cent	\$60,000 00
San Francisco City and County School Bonds—three and one half per cent	89,800 00
San Joaquin County (Hospital) Bonds—five per cent	4,000 00
Santa Clara County (San José School District) Bonds—four per cent	220,000 00
Santa Clara County (San José High School District) Bonds—four per cent	167,000 00
Sonoma County (Healdsburg School District) Bonds—four per cent	29,750 00
Stanislaus County (Oakdale Union High School) Bonds—five per cent	19,000 00
Tulare County (Porterville High School) Bonds—five per cent	20,000 00

\$2,186,800 00

MUNICIPAL BONDS.

Antioch Town Water Works Bonds—five per cent	24,400 00
Bakersfield City (Improvement) Bonds—four per cent	27,000 00
Bishop Town (Improvement) Bonds—six per cent	39,600 00
Long Beach City (Pier) Bonds—five per cent	90,000 00
Los Angeles City (School) Bonds—three and three-fourths per cent	420,000 00
Mountain View Town Bonds—four and one half per cent	25,900 00
Napa City (School) Bonds—four per cent	29,400 00
Sacramento City (Levee and Sewer) Bonds—four per cent	150,000 00
San Buenaventura Town Bonds—five per cent	12,000 00
Yreka Town (Water Works) Bonds—five per cent	37,500 00
Pomona City (Park and School) Bonds—four per cent	52,500 00
Santa Clara Town (Water, Light, and Power Works) Bonds—four and one half per cent	20,475 00
Los Angeles City (Water Works) Bonds—four per cent	510,000 00

Total

\$1,438,775 00

Total amount Bonds of all classes.....\$5,352,075

During the past two fiscal years bonds held in trust for the support of common schools have been redeemed to the amount of \$539,925, and in the same time county and municipal bonds have been purchased to the amount of \$1,155,000.

STATE HIGH SCHOOL FUND.

Fifty-eighth Fiscal Year.

Receipts	\$237,120 54
Disbursements	239,458 57

Fifty-ninth Fiscal Year.

Receipts	\$334,172 75
Disbursements	302,592 89

The daily average attendance in all the high schools for the year ending June 30, 1908, was 24,267; an increase of 2,872 over the attendance reported two years ago.

The amount to be raised for the State High School Fund for the sixty-first and sixty-second fiscal years is \$364,005 for each year, being at the rate of \$15 per pupil.

INCREASE IN SCHOOL FUND.

Under the provisions of the constitution the proceeds of the sale of lands granted by the United States and moneys derived from the estates of persons dying without heirs and leaving no will are made "a per-

petual fund" for the support of the common schools. It is gratifying to be able to report that in the last two years the increment of the perpetual fund was more than a million dollars. By far the greater portion of this large addition was made by the payment to California by the United States under the provisions of the congressional act of June 27, 1906, of five per cent of the proceeds of sales of the public lands. Six installment payments have been made between July, 1906, and January, 1908, of which the first three were reported by the Controller in his preceding biennial report. The latest payments were as follows:

Feb. 21, 1907—For 5 per cent of net proceeds of public land sales in State of California from July 1, 1882, to June 30, 1892, \$379,847.50, less exchange \$291.00.....	\$379,556 50
Not including sales of Redding Land Office from July 1, 1890, to June 30, 1892.	
April 9, 1907—From July 1, 1892, to June 30, 1906, including sales of Redding Land Office from July 1, 1890, to June 30, 1902, \$165,073.48, less exchange \$82.50.....	164,990 98
Dec. 27, 1907—From July 1, 1906, to June 30, 1907. \$16,852.31, less exchange \$12.60.....	16,839 68
Total.....	\$561,387 16
Previously reported.....	428,261 61
Aggregate of payments to date.....	\$989,658 77

The exhibit which follows shows the growth of the perpetual fund in recent years. Bonds purchased for the benefit of the State School Fund constitute the invested portion of the fund, and the moneys in the State School Land Fund are the uninvested portion:

Year.	Invested.	Uninvested.	Total of Fund.	Interest Received.	Average Interest on Investment.
1896.....	\$3,788,800 00	\$115,599 34	\$3,904,399 34	\$200,179 07	5.28
1898.....	3,835,700 00	210,026 36	4,045,726 36	194,425 58	5.06
1900.....	3,778,700 00	573,639 86	4,352,339 86	188,352 46	4.98
1902.....	3,527,200 00	1,106,477 51	4,633,677 51	170,820 99	4.84
1904.....	4,294,750 00	792,128 98	5,086,878 98	188,446 87	4.38
1906.....	4,737,000 00	526,834 42	5,263,834 42	221,558 38	4.67
1908.....	5,532,075 00	841,940 73	6,374,015 73	228,890 14	4.14

Unfortunately, the progressive increase in the amount of the perpetual fund has been largely offset by a steady decline in the rate of interest realized on investments in bonds, and, as the table shows, there was for a number of years a falling off in the revenue derived from the fund, due in part to so large a portion of the moneys being uninvested and in part to the lower rate of interest received. It illustrates the importance of keeping the moneys closely invested and also of purchasing the best paying sound bonds which are obtainable. If for any reason the State buys low-rate bonds when better investments could be made, the public schools suffer in consequence. On \$1,526,500 of its

own bonds, although their maturity long since passed, the State is paying the school fund 6 per cent interest, amounting to \$91,590 each year, and but for this and the holding of a few other high-rate bonds, the average return would be less than it is.

Since the 30th of June, 1908, the date of the latest figures in the table, considerable purchases of bonds have been made, and the uninvested portion of the perpetual fund has correspondingly diminished.

The legislature, at the time of the extraordinary session held in 1906, passed an act directing the transfer from the State School Land Fund to the General Fund of \$500,000, to be used for the purchase of a site and the erection of a State building in San Francisco. Interest for the benefit of the State School Fund was to be paid at the rate of 4 per cent a year by transfers from the General Fund. A transfer of the \$500,000 was made in accordance with the act, but subsequently the Attorney General advised me that he considered the act directing the transfer was unconstitutional, and thereupon the \$500,000 was retransferred to the State School Land Fund.

ESTATES OF DECEASED PERSONS' FUND.

This fund, which contains both moneys which have been escheated to the State and moneys of estates not yet formally escheated, has increased but slowly, the total increment in three years being but \$18,976.95. At the end of the fifty-ninth fiscal year the amount in the fund was \$111,221.55. Believing that there are considerable sums in the hands of county treasurers which should be paid in, I recently called upon all county treasurers for a statement, and at the time of the next semi-annual settlement I shall request treasurers to include in such settlement all moneys held by them on account of estates of deceased persons except in cases in which there is some ground for believing heirs may be found at an early day.

The history of this fund has been a rather strange one. A provision of the constitution of 1879, as already recited in this report, requires that the estates of persons leaving no heirs or will shall be devoted to the support of public schools. But in the twenty-nine years since the adoption of the constitution not one dollar from this source has ever found its way, so far as I can discover, into the School Fund. On the other hand, a large sum which had accumulated in the Estates of Deceased Persons' Fund was diverted to other uses, and has never been returned.

By the year 1891 the accumulations had grown to be more than \$90,000, but the legislature then passed an act directing the transfer of \$80,000 to the General Fund. This was intended as a temporary loan, but even as such it was a very questionable transaction, because

it violated the spirit, if not the letter, of the constitution, which creates an inviolable trust in favor of the schools. But the amount then borrowed has not been returned to its proper fund, although Hon. E. P. Colgan, for so many years Controller of State, urged repeatedly that the unjust, if not illegal, diversion of the money should be corrected by an act authorizing its retransfer. More than once the legislature has passed a bill to accomplish this purpose, but it has not yet become a law.

No arguments should be needed to show that every obligation of good faith requires that legislation shall be enacted for the retransfer of the \$80,000 from the General Fund to the Estates of Deceased Persons' Fund. After this retransfer there would be approximately \$200,000 in the latter fund, and another act should be passed authorizing the investment by the State Board of Examiners of the greater part of the amount in public bonds, the interest to be paid into the State School Fund. Inasmuch as occasional drafts are made upon the fund to meet the demands of heirs who establish their claims to the satisfaction of the courts, a sufficient sum in cash to meet these calls should be always available.

THE STATE REVENUES.

The growth of the State's revenues and the principal sources from which they are derived are shown in the tables which follow. In the first table are exhibited the total net revenues, the amounts derived from the ad valorem property tax and from all other sources and the rate of State taxation for eleven years.

Fiscal Year.	Total Net State Revenue.	Revenue from Property Tax.	Revenue from All Other Sources.	Rate of State Tax.
Forty-ninth.....	\$7,199,551 15	\$5,292,604 06	\$1,906,947 09	.51
Fiftieth.....	7,204,912 14	5,150,651 70	2,054,260 44	.488
Fifty-first.....	10,290,865 68	6,797,033 73	3,493,831 95	.601
Fifty-second.....	8,943,265 31	5,924,157 47	3,019,107 84	.498
Fifty-third.....	9,123,750 22	5,686,435 22	3,437,315 00	.48
Fifty-fourth.....	8,095,039 30	4,697,859 80	3,397,179 50	.382
Fifty-fifth.....	12,225,937 39	8,219,911 51	4,006,025 88	.561
Fifty-sixth.....	12,668,035 14	7,879,330 04	4,788,705 10	.535
Fifty-seventh.....	12,270,749 12	7,590,387 67	4,680,361 45	.49
Fifty-eighth.....	13,556,210 99	7,139,022 90	6,417,188 09	.476
Fifty-ninth.....	13,959,842 40	7,761,821 99	6,198,020 41	.445

The term net revenues as used above means the total of receipts in the State treasury less transfers and less the counties' portion of the railroad taxes. Inasmuch as the State acts merely as a collector of that portion of the railroad taxes which is paid over to the counties, it should not be considered a part of the State revenues proper. Strict accuracy would require that there also be deducted from the gross receipts the amount of canceled warrants and all sums drawn from the treasury

and subsequently returned, but as it has not been the practice in past years to do this, and as these amounts are too small to make any practical difference, they have not been excluded in this report.

For the fifty-ninth fiscal year the net revenues were approximately 94 per cent greater than for the forty-ninth fiscal year, which is a large increase to take place in ten years. Not only have the revenues greatly increased, but there has been considerable change in the sources from which derived; a much larger proportionate part of the revenues now comes from sources other than the property tax. While the aggregate of the State's revenues has increased 94 per cent, the amount raised by the property tax has increased only a little more than 46 per cent, and a largely increased assessment roll has made possible a gradual reduction of the tax rate, which for the present, or sixtieth fiscal year, is **only 40 cents on \$100.**

There has been in recent years a remarkable increase in the amount of taxes paid by the railroad companies which are assessed by the State Board of Equalization, but that increase has not so largely benefited the State's revenues as it has those of the counties. In the following table are given the comparative figures:

Fiscal Year.	State's Portion.	Counties' Portion.	Total of Railroad Taxes.
Forty-ninth.....	\$221,064 72	\$537,329 42	\$758,394 14
Fiftieth.....	216,446 24	501,418 60	717,864 84
Fifty-first.....	278,335 43	567,726 77	846,062 20
Fifty-second.....	239,052 77	598,094 57	837,147 34
Fifty-third.....	235,543 12	648,519 30	884,062 42
Fifty-fourth.....	250,598 72	865,318 96	1,115,917 68
Fifty-fifth.....	471,300 96	879,662 04	1,350,963 00
Fifty-sixth.....	372,732 18	930,475 84	1,303,208 02
Fifty-seventh.....	342,118 92	964,487 50	1,306,606 42
Fifty-eighth.....	385,611 52	1,082,729 42	1,468,340 94
Fifty-ninth.....	499,275 44	1,557,782 72	2,057,058 16

A lowered rate of State taxation and generally increased rates in the counties account for the greater proportionate gains of the latter.

In the next statement are given the revenue receipts from other important sources:

Fiscal Year.	Poll Tax.	Inheritance Tax.	Insurance Tax.	Corporation License Tax.	Sec'y of State, Fees, Sales, etc.
Forty-ninth.....	\$364,291 62	\$83,550 21	\$24,450 73	\$22,489 70
Fiftieth.....	340,432 12	157,734 54	33,825 96	25,935 50
Fifty-first.....	404,574 74	385,362 07	50,037 89	35,913 55
Fifty-second.....	428,907 05	243,586 44	46,664 13	72,644 75
Fifty-third.....	430,186 17	287,052 40	51,000 26	145,881 39
Fifty-fourth.....	447,251 81	290,447 44	65,101 03	152,490 25
Fifty-fifth.....	481,417 98	286,735 72	71,260 98	154,887 25
Fifty-sixth.....	528,914 35	532,760 16	165,243 45	172,359 65
Fifty-seventh.....	604,677 50	292,750 01	264,593 52	\$138,915 00	222,925 90
Fifty-eighth.....	502,694 23	740,940 81	278,184 49	303,545 00	332,155 90
Fifty-ninth.....	607,973 94	608,943 19	284,496 10	663,190 00	220,783 21

The receipts of the Secretary of State for fees, sales, etc., include the following amounts collected for automobile licenses: fifty-sixth fiscal year, \$7,857; fifty-seventh, \$11,240; fifty-eighth, \$15,830; fifty-ninth, \$16,970. From the corporation license tax, also collected by the Secretary of State, there has been received during the sixtieth fiscal year to date the sum of \$592,225.

In the ten years the growth in poll tax collections has been equal to 67 per cent, considerably exceeding the estimated rate of gain in population, and showing that this tax is, on the whole, better collected than in former years. But there is still room for improvement in some of the counties. From San Francisco city and county there was paid into the State treasury for poll taxes \$104,094.90 in 1905, but in 1907 only \$61,033.85, and in 1908 but \$61,951. In strong contrast with the latter figures was the payment by Los Angeles County in 1908 of \$150,613.28 of poll taxes.

It has been the policy of the State to allow assessors a commission on poll taxes in order to secure a close collection, but of late years the assessors in some of the counties, through amendments to the county government act, have been deprived of the commissions, and if this example should be generally followed, there would doubtless be a serious falling off in the State's revenue from this source.

Since the inheritance tax was made both direct and collateral, as was done by the law of 1905, there has been an important gain in the revenue from that source, and the statement made in this report two years since that this tax could be depended on to produce half a million dollars a year has proven to be well inside the facts. This year's receipts of inheritance taxes will equal or exceed the record of the fifty-eighth year, when \$740,940.81 was collected; to date there has been reported paid to county treasurers during the sixtieth fiscal year a total of \$610,000. In another portion of this report will be found a discussion of needed amendments to the inheritance tax law.

Insurance tax receipts are steadily increasing in amount, and the corporation license tax, which is the newest of all the State's taxes, has become one of the largest contributors to its revenues. It produced \$663,190 in the fifty-ninth fiscal year and will yield nearly as much in the sixtieth year. As the annual license tax is now proportioned to the capitalization of the companies taxed, there is a tendency to keep down the nominal capitalization of newly incorporated companies, and this has considerably reduced the receipts of the Secretary of State for the filing of articles.

A new source of revenue has been developed since the legislature at its last session passed the act regulating the deposit of State funds. In the fifty-ninth fiscal year the receipts from interest on such deposits

amounted to \$48,890.09. During the first four months of the sixtieth fiscal year there was received \$27,445.37.

A steady increase is noticeable in the receipts of some of the State institutions, boards and commissions. In the fifty-ninth fiscal year the five State hospitals and the Home for Feeble-Minded Children collected \$145,264.90, not including the payment by counties for the support of inmates of the latter institution. These figures may be compared with the corresponding receipts of the fiftieth fiscal year, which were only \$39,716.25.

From the two prisons there was received last year, including revolving fund receipts, \$320,043.38, as compared with \$171,442.57 in the forty-ninth fiscal year; but all of the increase has been at San Quentin, the earnings at Folsom Prison being less than they were ten years ago.

From the sale of hunting licenses, under the act of 1907, the Fish Commission received during the fifty-ninth fiscal year the large sum of \$116,569.11.

UNITED STATES FOREST RESERVE PAYMENTS.

Under a law of the United States which has been in force about two years a portion of the Government's receipts in the forest reserves is paid to the State to be distributed among the counties within whose boundaries the reserves are situated, to be used for the support of schools and the maintenance of roads. These payments are intended as partial compensation to the counties for the withdrawal of large areas from the public lands which otherwise would be open to settlement. Until recently ten per cent of the total receipts in the reserves was the proportion set aside for the benefit of the counties, and this amounted to \$8,183.61 in the fifty-eighth fiscal year and to \$16,052.24 in the fifty-ninth fiscal year. In the former year thirty counties shared in the division of the amount received, which division is made on the basis of the area of each county embraced in each reserve in which money is collected; in the last fiscal year thirty-nine counties shared the proceeds of the fund.

Congress at its last session amended the law, and henceforth the counties will receive twenty-five per cent, instead of ten per cent, of the total receipts, which, as the sale of lumber and other forest products increases, may be expected to become large in some of the reserves.

The reported area of forest reserves in the fifty-eighth fiscal year was 18,005.243 acres, and in the fifty-ninth 25,244.276 acres.

THE INHERITANCE TAX LAW.

The inheritance tax receipts, as has been shown elsewhere in this report, have become one of the State's largest revenue sources, and if properly conserved will grow in amount year by year. Inheritance taxation is so new a form of taxation in this country that no state has yet perfected its legislation upon the subject. California's present law, when it was adopted in 1905, was one of the most advanced, in several respects, which was then possessed by any state, but in its administrative features it was a close copy of the New York statute, which, as was subsequently discovered, New York was even then preparing to supersede by other provisions.

It was principally in the direction of securing accurate appraisements of estates subject to taxation and detecting attempted evasions of the tax that the original New York law developed weaknesses, and it is in the same way that the California statute has been a partial failure in operation. In other words, while a great deal of money is collected through the inheritance tax as now administered, a great deal is not collected which should be.

It is the intent of the law to tax not only estates devised by will or passing by the intestate laws of the State, but also property conveyed by deed, grant, sale, or gift made in contemplation of the death of the grantor or vendor, or intended to take effect in possession or enjoyment after such death; but as estates conveyed in the last mentioned ways do not pass through the probate court, they will not be discovered and taxed unless some one is alert and active in the interest of the State.

Early in the history of the law in New York it was discovered that there must be some centralization of authority if it was to be enforced uniformly and effectively in all the counties. There, as in California, it has always been a State tax, the entire proceeds going into the state treasury, but its enforcement was intrusted to county officers, as is the case in California to-day. The act requires that receipts issued for inheritance taxes by county treasurers shall be sent to the Controller for counter-signature, and this gives an opportunity to verify computations of the tax and to exercise, in a general sort of way, some kind of supervision over the operations of the law; but specific authority therefor is not conferred by any provision in the inheritance tax act, and, indeed, one of the District Courts of Appeal expressed the legal situation by saying in a recent decision: "The Controller * * * does not figure in any part of the machinery provided for the collection of the tax or its enforcement."

Yet such is the necessity for having some central bureau of information in such matters that the Controller's office is constantly being

applied to by lawyers, county treasurers, district attorneys, and even by judges, with reference to the rule of practice, and it has been found necessary to issue a circular of instructions on the method of making computations. In a number of instances the present Controller has looked up appraisements of estates, and where they appeared to be too low, has called such fact to the attention of the proper officers, or has assisted them in the discovery of estates which had been deeded or incorporated under circumstances which indicated that they were properly taxable. While so engaged in trying to secure for the State its dues he has more than once been reminded by lawyers that the Appellate Court has said the Controller has no authority in the premises, and such objections could only be met by directing attention to the section of the Political Code which makes it the Controller's duty to look after the collection of the State's revenues.

In the State of New York, where the inheritance tax revenues amount to upward of \$4,000,000 a year, systematic work is provided for by the organization of a bureau in the Comptroller's department, and by giving him authority to appoint appraisers and tax attorneys in the counties in which large amounts of inheritance tax revenue are collected. We have not yet reached the point in California where the revenues justify, or where the circumstances demand, such an extensive department, but the Controller should be given some distinct authority to supervise the administration of the law, and he should be authorized to appoint an inheritance tax attorney or examiner, who could visit the different counties, observe the work of the local officers and assist in preventing evasions. The additional revenue which would be brought in would be great enough to pay the officer's salary and expenses many times over.

The only expenses now attending the collection of the inheritance tax are for county treasurers' commissions and appraisers' fees. During the calendar year 1907, in which the amount of inheritance tax money paid to the State was \$614,120.99, there was paid for treasurers' commissions \$16,086.02, and for appraisers' fees \$6,614.41. Yet so unequally was the expense of appraisers' fees distributed that \$3,167.67, or 48 per cent of the total amount, was paid out in one county, in which county only about 15 per cent of the total revenue was collected.

As the law reads, the court is to appoint a special inheritance tax appraiser only when the value of an estate subject to tax is "uncertain," and this discretion is not ordinarily abused; the court in a large majority of cases takes the report of the regular probate appraisers as fixing the value of estates with sufficient certainty, and the appointment of special appraisers is restricted to cases in which the computation is intricate, or the estate is very large, or there are suspicious circumstances. But a few judges choose to assume that the value of estates

is uncertain in every instance, notwithstanding the sworn reports of the probate appraisers, and always appoint special appraisers. The amount of the tax may be only \$5, and if so it is eaten up by the appraiser's fee for one day's service; in other instances, the fees exceed the tax, and the State is brought out in debt. Occasionally, the work of making the appraisement is dragged out for a long period of time and \$5 allowed for each and every day. In New York the only remedy found for a similar state of affairs was to make the county treasurers the appraisers in all counties where special appraisers are not appointed by the State Comptroller.

Questions of greater or less importance concerning the proper interpretation of the law continue to arise, and several have been disposed of in the courts during the last year. In a series of cases involving the taxability of the community property passing to the wife on the husband's death, the Supreme Court has decided that as the wife takes the community property merely as an heir, it is taxable. This decision has brought in a large amount in taxes. In another case, which was tried in the Appellate Court, it was hoped that a decision would be obtained on the question whether a probate homestead is taxable, but the decision went off on another point. The same question has since been raised in another case not yet decided on appeal. In a case where a court made a family allowance of \$45,000 out of an estate valued at less than \$300,000 an appeal has been taken to determine whether under the statute the family allowance is not taxable, or, at least, whether there is not some limit to the power of courts to exempt property from taxation in this manner.

SPECIAL DISTRICT TAXES AND THE RAILROADS.

As long ago as 1902 the Supreme Court decided in the case of *San Bernardino County vs. The Southern Pacific Railroad Company*, that a county has no authority to collect taxes upon a railroad operated in more than one county which are due to a school district through which the railroad passes. Nevertheless, special school taxes and other special district taxes have continued to be collected by county tax collectors, and the railroad companies have uniformly paid without objection. More recently Judge Van Fleet of the United States Circuit Court, in the *Pullman Company vs. Nye, Controller*—which case is discussed elsewhere in this report—held that the true intent of the law is that special school and all other special district taxes shall be paid to the State Treasurer and not to county tax collectors.

But at the present time the law contains no provisions by which the amounts of special district taxes assessed against railroad companies operating in more than one county can be officially reported to the

Controller, and for this reason, and because a constitutional amendment which would have changed the whole plan of railroad taxation was pending, it was decided at the beginning of this year's tax collection period not to attempt a change in the method of collection of special district taxes during 1908. But the constitutional amendment has failed of adoption, and the courts have declared that the special district taxes are collectible by the State Treasurer and not by the county officers. It would, therefore, be well if the legislature would amend the law to provide the machinery of collection which is now lacking, so that the taxes in question may be legally collected by either the State Treasurer or the county tax collectors, but preferably the latter.

THE BURDEN OF TAX DELINQUENCY.

For the first time figures on tax sales to the State, and redemptions, and also sales by the State, have been compiled and made a part of this report. The subject is one which is deserving of careful study because of the very large and increasing number of persons to whom it is every year brought home in the form of unpleasant experience. Owing to reasons which it is not hard to understand in these times of multiplication of tracts and subdivisions in or near the large cities, the roll of tax delinquents is growing rapidly, although the percentage of delinquency to the total amount of taxes paid has diminished.

During the fifty-eighth fiscal year there were 20,963 sales of property to the State by county tax collectors, and during the fifty-ninth there were 22,980. These figures do not represent the total number of tracts or lots sold to the State, for sometimes as many as twenty-five or fifty subdivisions will be covered by a single sale.

The counties in which the largest number of sales to the State have occurred are naturally those in which the subdivision of tracts has been carried furthest: Los Angeles had in the fifty-ninth year 8,650 sales, or more than one third of all; Alameda County, with 1,963, was second; San Francisco had 1,402, and San Diego 1,198.

During the same years, the fifty-eighth and fifty-ninth, the totals of redemptions were 13,662 and 17,764, respectively. These were not all redemptions of sales of the same or immediately preceding years; some of them extended back for long periods of time. Including both years, the total amount collected on redemption was \$490,158.42, of which \$145,984.98 was for the State and the remainder for the counties. During the present, or sixtieth, fiscal year, the number of redemption receipts issued from the Controller's office will doubtless exceed 20,000.

Neither the State nor the county suffers greatly from tax delinquency, because the tax is sure to be collected eventually through redemption or sale of the property; but the taxpayer does suffer, and in some

instances most grievously. By comparison with the old plan of selling tax-delinquent property to private speculators the system of sale to the State is an improvement; but the complications—perhaps the necessary complications—of the tax laws are such that many persons every year are put to large expense or lose their property, when delinquency on their part was entirely unintentional. Errors of description in assessment are responsible for a part of the trouble. In other instances, the neglect of assessors and tax collectors to stamp on the roll and on tax bills the words “Sold for taxes” has resulted in sale by the State and irrevocable loss to the owners of property on which they had failed to pay their taxes only a single year and upon which they supposed they had paid every year. Such causes of delinquency as the foregoing are remediable and should be remedied, but there are others, such as the endless multiplication of tracts, the increasing number of non-resident owners and the creation of many special district taxes, which are bound to swell the ranks of the tax delinquents, and which causes can not well be removed. All that can be done is to simplify as much as possible the whole system of collecting and assessing taxes in order that errors may be reduced to a minimum.

Sales by the State of property which had been acquired by sale and deed on account of nonpayment of taxes were made in the fifty-eighth fiscal year in forty counties, 663 tracts being disposed of, and \$40,554.81 received for the same; in the fifty-ninth year there were 585 sales, distributed among forty-two counties, and the total amount received was \$56,809.53.

Since the Supreme Court has rendered decisions confirming tax titles in a number of instances, purchasers have acquired renewed confidence, applications for sales are increasing, and the prospect is that most of the property which has been deeded in past years for tax delinquency will be sold off and thereby restored to the assessment roll.

THE DEPOSIT OF PUBLIC FUNDS.

One of the new statements appearing in the Controller's report this year shows the extent to which the laws of 1907, permitting and regulating the deposit in banks of State and county funds, were taken advantage of during the last fiscal year and the rates of interest received or fixed. At the date of the latest returns thirty-two of the fifty-eight counties had funds on deposit in the banks, the rate of interest paid being generally two per cent, although in a few instances higher rates were received. In some counties the rates appear to have been fixed so high that the banks would not accept deposits and give the securities which the law calls for. Approximately one third of the total available cash of county treasurers on June 30, 1908, was on deposit in the banks,

and it is anticipated that the practice of depositing instead of hoarding county and municipal funds will steadily advance as its advantages come to be better appreciated.

The facts with regard to State deposits will be found more fully stated in the report of the State Treasurer. The Governor and Controller have acted with the Treasurer in passing judgment upon the applications for deposits and the securities offered, as required by the law. The statute has been found satisfactory so far as it goes, and no one seems to question the success of the State deposit system. It has been profitable to the State, for the interest collected amounted to \$48,890.09 during the fifty-ninth fiscal year, and during the first four months of the sixtieth fiscal year it came to \$27,445.37. The advantage to the State of keeping in circulation in business channels a large amount of money which would otherwise be locked up in public treasuries is even greater than the gain to the State and counties from interest collected or to the banks from the profits they can make in using the money. Under our California law a degree of safety is obtained which is practically absolute.

It is not to be supposed that this reform in the handling of State and other public funds will for any long time stop at the stage which has been reached; it is altogether probable that legislation will be enacted through which, under the same guarantees of safety as are now provided, the public depositories in different parts of the State may receive direct deposits of public revenue, thus avoiding the expense of transporting the moneys to Sacramento, only to be transported back again when it is necessary to pay out the same moneys. Disbursements could then be made through a checking system, thus introducing into the State's financial transactions all the advantages of the modern business system and saving a considerable sum now spent on account of exchange.

TO PROTECT CREDIT OF STATE.

As one of the consequences of the act passed by the Legislature in November, 1907, postponing the date of delinquency of taxes, there was not sufficient money in the Interest and Sinking Fund on the 1st of January, 1908, to pay all of the interest on outstanding bonds of the State. The situation would have been serious but for the fact that the bonds in question, instead of being on the market, are held by the State itself, so that the short delay in meeting the interest charges was of little moment. But the recurrence of such a situation should be provided against, as can be done easily by an act of the legislature authorizing transfers from other funds to the Interest and Sinking Fund. There is already an act authorizing such transfers to the General Fund when it is exhausted.

AN URGENT NEED FOR LEGISLATION.

There are a considerable number of pieces of property in some of the counties of the State which were sold and deeded to the State before the year 1895, which the State has been unable to dispose of because it can not make a valid conveyance of title. As the law stood prior to the year above named, a purchaser at a tax sale was required to serve notice upon the property owner before taking a deed to the property, and, as the courts have decided, no one was legally authorized to represent the State in giving such notice. Much of this property has been off the assessment rolls for a long time, although it would be possible to sell it and thereby restore it to the rolls, if only a way were provided by which the State could take and give valid deeds. The best way to accomplish this would probably be through the passage of an act making provision whereby the Controller, or some other officer on behalf of the State, could serve the notice formerly required by section 3785 of the Political Code; after the service of such notice, the State could take new deeds to the property, and then be in a position to sell it and furnish a valid title to the purchaser.

THE STATE'S BOND DEBT.

The statement of the bond debt of the State, which was dropped from the Controller's report many years ago, when practically all of the bonds had been bought in for the University and the School Funds, has been restored in the present report. On July 1, 1908, the total outstanding bond issues of the State amounted to \$3,131,500, and the net indebtedness (valuing bonds in sinking funds at face) was \$2,633,113.02, including the \$751,000 of funded debt bonds of 1873 held for the University and the \$1,526,500 held for the School Fund. These latter bonds represent the investment of moneys which are inviolably dedicated to the support of common schools. The date of maturity of the bonds passed in 1893, but the legislature in that year adopted a declaratory act fixing the status of the bonds in terms as follows:

"The State of California hereby agrees to pay, and will pay, interest on said outstanding bonds so held in trust for the benefit of the State School Fund and the University Fund at the rate of 6 per cent per annum, payable semiannually, from January first, eighteen hundred and ninety-three, on the second of January and July of each year, and the faith of the State of California is hereby pledged for the payment of interest as herein provided."

The State bonds in private hands on July 1, 1908, consisted of \$400,000 of the San Francisco depot bonds of 1891 and \$250,000 of the seawall bonds of 1903; but since that date there has been sold \$500,000 additional of the seawall bonds, and another issue of the same amount is being advertised and will be sold soon. With this last mentioned sale

consummated, the total outstanding issue of State bonds will amount to \$4,131,500, of which \$2,477,500 will represent an investment of trust funds of the State and \$1,654,000 will be in private hands. There will be \$750,000 still unissued of the total of \$2,000,000 of the seawall bonds of 1903. Both the seawall and depot bonds are payable, principal and interest, by transfer from the San Francisco Harbor Improvement Fund.

At the general election last November an amendment to the constitution was approved which permits the issue of State bonds for as long a term as seventy-five years, and at the same time two propositions to issue twenty-five-year bonds to the total amount of \$3,000,000 were voted down, but it now seems probable that other bond propositions will be submitted to the people.

STATE AND INSTITUTION ACCOUNTS.

The law gives the Controller discretionary authority to inspect the books of any person charged with the receipt or disbursement of public moneys, but does not make it his duty to do this regularly, and the authority conferred is seldom exercised, and without a considerably larger office force no great number of such examinations could be made. It is also provided in the Political Code that the Board of Examiners shall investigate the accounts of the Controller and of the Treasurer whenever deemed proper, but save for the periodical count of the money in the treasury such investigations are, practically, never made. Indeed, it can not be said that the accounts of most State officers and most State institutions are ever examined or expeted unless something develops to suggest that irregularities have occurred.

This is not consistent with good business system, which calls for regular experting of the accounts of public officers. In a number of the states the office of Public Accountant or State Examiner has been created, and such officer is vested with authority to prescribe forms of accounts as well as to make examinations. Also, he is usually empowered to exercise supervision over the accounts of county officers, and sometimes of municipal officers. As the importance of correct, and, so far as possible uniform, systems of public accounting comes to be better understood, it is pretty certain that the public examiner plan will be taken up, in some form, by every state, California included. The subject has been under discussion recently, and it is probable that a measure will be proposed during the coming session of the legislature. My only desire at this time is to urge the importance of having some system of regular examinations of accounts of State institutions and public offi-

cers. It is believed that the introduction of such a system would be welcomed by the heads of departments and of State institutions, since it would be to them the best possible guaranty of accuracy and safety.

CONTINGENT FUNDS OF STATE INSTITUTIONS.

There are sixteen State institutions or boards—six hospitals, two reform schools, five normal schools, the Institution for the Deaf and Blind, the California Polytechnic School, and the Board of Pharmacy—which have contingent funds made up of earnings and other receipts not derived from appropriations made by the legislature. During the fifty-ninth fiscal year the combined receipts in these funds amounted to \$173,021.21, and the disbursements were \$164,111.25.

Since 1899 monthly reports of the contingent fund collections have been made to the Controller, and the money is turned into the State treasury. But control over the expenditures is exercised by the boards of trustees and directors of the several institutions, subject only to the usual audit of claims by the State Board of Examiners, and, in the case of the hospitals, by the Commission in Lunacy. The legislature, of course, has practically no voice in regard to the use made of the contingent funds, though vested with power to legislate on the matter if it chooses to do so.

Contingent funds are used to meet incidental expenses not covered by regular appropriations, also to eke out the latter when they are insufficient in amount, and, in the case of the hospitals, very largely for minor building operations. That the contingent funds are in general carefully handled, and that they are a real convenience in the financing of the institutions there can be no question; but their existence is hardly consistent with the general theory of State finances and particularly with the section of the constitution which says that "no money shall be drawn from the treasury but in consequence of appropriations made by law." While I am not disposed to make a definite recommendation at this time, it seems probable that eventually the legislature will take the view that all collections made by State institutions should be paid directly into the General Fund, and that the appropriations should be increased sufficiently to make good the difference. Whenever this is done, it will be well to establish some sort of emergency fund to be disbursed upon order of the State Board of Examiners and used to meet unforeseen needs of the different institutions.

DRAINAGE DISTRICT APPROPRIATION.

One of the acts of the legislature passed at the regular session in 1907 appropriated \$25,000 to pay expenses and claims incurred by the Board of Drainage Commissioners of the Sacramento Drainage District created by the act of 1905. There appearing to be some question of the constitutionality of the drainage district legislation, I declined to draw warrants under the act of 1907 until a judicial test had been made. Judge G. W. Nicol, sitting in the Superior Court for Sacramento County, in the case of the *People ex rel. G. W. Chapman vs. The Sacramento Drainage District*, rendered a decision upholding the constitutionality of the original act, whereupon, acting on the advice of the Attorney General, I drew the warrants, which amounted in the aggregate to approximately \$25,000.

One of the provisions of the act of 1907 directed the repayment to the State out of the proceeds of the first assessment levied by the Drainage District Commissioners of the amount of the appropriation before mentioned. The commissioners have recently levied an assessment in the total sum of \$50,000, which becomes delinquent January 4, 1909, and a portion of which has already been paid in to the county treasurers of the several counties in which the district is situated.

In the mean time the Chapman case has been appeal to the Supreme Court, but not yet decided by that tribunal.

AUDIT OF NATIONAL GUARD CLAIMS.

One of the sections of the National Guard law passed in 1905 substituted the Adjutant General for the Board of Military Auditors as the authority to audit all claims for expenditures on account of the Guard. This is so much a departure from the general plan of auditing State accounts that I feel justified in calling it to the attention of the legislature, with the suggestion that it consider carefully whether claims for National Guard expenditures ought not to be passed upon by the State Board of Examiners, as are claims for the expenditures of all other branches of the government. By this I do not mean that there has been any abuse of the authority on the part of the present Adjutant General, for I am not aware of any; but it is a primary rule in any sound system of public accounting that claims shall be finally audited by some one else than the officer who contracts them. In the case of the State officers who are members of the Board of Examiners, they are forbidden to pass on expenditures from their own departments, and no good reason is apparent for making an exception to this stringent rule. The law of 1905 was intended to bring the organization of the

National Guard of California into conformity with congressional legislation on the subject, but I have not been able to find anything in the latter which would be contravened by a requirement that the Board of Examiners audit the claims of the military department.

MUNICIPAL AND COUNTY STATISTICS.

Acting upon a request from the League of California Municipalities, I have made a collection of statistics of assessed values, revenues and expenditures, tax rates and bond debts of incorporated cities and towns. Reports were received from 152 municipalities, and a compilation of the returns will be found elsewhere in this report. These municipalities, including San Francisco, which is a combined city and county, have assessable property of more than a billion and a quarter of dollars; their annual revenues are upwards of thirty million dollars, and they have outstanding bonds of twenty-eight and a half millions.

The reports from the different municipalities were received through the courtesy of city clerks and auditors, there being no law to compel them to respond to a request for data. If the statistics are of sufficient value to justify collection and publication—and it is believed they are—it would be well to pass an act making it obligatory upon municipal officers to report, and, at the same time, attention might profitably be given to the amendment of the law under which financial statistics of the counties have so long been collected and published by the Controller, since as now gathered the statistics do not include a full statement of county revenues and expenditures, and they also omit other facts of importance.

PULLMAN TAX SUIT AND OTHER LITIGATION.

Following the assessment by the State Board of Equalization of the Pullman Company for purposes of taxation for the year 1907, a suit was instituted by the corporation in the United States Circuit Court, the intent being to restrain the Controller from taking any steps toward collecting the tax. In its bill the Pullman Company set up the claim that the Board of Equalization was without authority to make a legal assessment, and also that the amount of the assessment was excessive and unjust. Hon. U. S. Webb, Attorney General, appearing for the Controller, presented a demurrer, which, after extended argument, was sustained by Judge W. C. Van Fleet, who held that the bill filed did not present any ground of equitable interference, since the law afforded an adequate remedy for the company's injuries, if it had sustained any.

After this outcome of the injunction contest it was hoped that the

Pullman Company would pay its taxes, but it neglected to do so, making it necessary to bring suit for collection in the manner provided in the Political Code. The suit was filed July 29, 1908, in the Superior Court in San Francisco, and judgment was asked for \$33,199.57 on account of taxes and \$3,319.96 for delinquent penalties, besides costs and an attorney's fee. Upon the suggestion of the Attorney General, an arrangement was made with the law firm of Solinsky & Wehe of San Francisco to assist in conducting the case of the State, they to receive only such fee as the court may require the Pullman Company to pay in the event that a judgment against the company is rendered. The case is now under submission to the court for decision upon a demurrer raised by the corporation.

The company has also failed to pay the first installment of its taxes for 1908, and another suit to enforce collection may become necessary.

UNITED RAILROADS TAXES.

By a decision of the Supreme Court rendered early in the year 1908 it was established that the sum of \$37,572.79, being part of a larger amount deposited in court four years previously, was due to the State and to the city and county of San Francisco as taxes for the year 1903 on the property of the United Railroads. When a court order was made for the payment of the amount named to the tax collector, it was discovered that the county clerk's special fund in the city and county treasury did not contain sufficient money to meet the demand, and an investigation by the Board of Supervisors followed. At my request the Attorney General took the matter up with the city and county attorney of San Francisco, expert accountants were employed, and the discovery was made that an apparent shortage of more than \$60,000 existed, the railroad tax money constituting a portion of this sum.

It was ascertained that the State's share of the missing tax money was \$14,162.96, and on October 30, 1908, a suit for that amount was filed against C. A. Bantel, former city and county treasurer, and the Aetna Indemnity Company, which had furnished his bond. From the report of the experts it appeared that the shortage occurred in 1906 during Mr. Bantel's term of office, though there was no evidence that he was aware of it at the time it occurred.

COMMISSIONS ON STATE TAXES.

A suit in which the Controller is named as defendant was commenced some months since by the county of Alameda for the purpose of enforcing repayment by the State of the cost of collecting State taxes. Prior to the year 1893 it was the practice to pay such claims of the counties, but it was terminated by a statute passed at that time. In a legal sense

the claim of Alameda County appears to be based on a construction of section 3696 of the Political Code, which requires the State Board of Equalization in determining the rate of taxation to make an allowance of "five per cent for delinquencies in and costs of collection of taxes." The suit is pending in the Superior Court of Alameda County.

LUKENS VS. NYE.

A mandamus suit to compel the drawing of a warrant for \$22,808.15 in favor of Mrs. Emma Mullan Lukens, on an assigned claim of John Mullan, was instituted in June, 1907, since which time judgment has been rendered against the Controller in the Superior Court of Sacramento County, and also, on appeal, in the Third District Court of Appeal. This action grew out of the passage by the legislature of 1905 of an act appropriating \$45,616.30 to pay the claim of Captain Mullan, who represented the State at Washington in the collection of certain claims against the Federal Government. Governor Pardee, before signing the bill, objected to the amount of the claim, whereupon the assignee filed in the Controller's office an agreement to accept \$25,000 in "full receipt and satisfaction of all and every claim of the said John Mullan * * * against the State of California." Half of the original amount, or \$22,808.15, was paid to claimant, after which she refused to be bound by the agreement and demanded payment in the full amount of the appropriation. Since the decision in the Appellate Court the Controller has asked for and been granted a hearing in the Supreme Court.

OTHER SUITS.

In a suit which was instituted by Assemblyman John Wessling to compel payment out of the Assembly contingent fund of \$394, on account of election contest expenses, a judgment was rendered in the Superior Court in favor of the Controller, but this was reversed on appeal. An application for a hearing in the Supreme Court will probably be made. The amount involved is not large, but the law points are of considerable importance.

Litigation has also occurred over the payment of claims of the Woman's Relief Corps Home under legislative appropriations. It having been determined by decision of the Third District Court of Appeal that the home is under State control, the claims in question have now been paid.

STATE EXPENDITURES.

The expenditures of the State government (excluding transfers and payment of railroad taxes to the counties) for the fifty-eighth and fifty-ninth fiscal years, and also for the nine preceding years, are given in the following table, which also contains a column showing year by year the percentage of increase over the amount expended in the year first given :

Fiscal Year.	Expenditures.	Per cent of Increase (about).
Forty-ninth (1897-8).....	\$7,586,174 33	-----
Fiftieth (1898-9).....	7,909,464 01	4
Fifty-first (1899-1900).....	8,663,195 28	14
Fifty-second (1900-1).....	8,891,535 42	17
Fifty-third (1901-2).....	8,997,084 59	19
Fifty-fourth (1902-3).....	9,585,180 78	27
Fifty-fifth (1903-4).....	11,116,591 88	47
Fifty-sixth (1904-5).....	12,214,011 62	61
Fifty-seventh (1905-6).....	10,981,375 23	45
Fifty-eighth (1906-7).....	13,072,258 36	72
Fifty-ninth (1907-8).....	13,931,997 56	84

An increase of 84 per cent in expenditures in ten years appears, and indeed is, a very large one. It shows a growth of expenditures about twice as rapid as the increase in the State's population, which is generally estimated as being approximately 2,000,000 at the present time.

Nevertheless, State expenditures in California are not growing out of proportion to those of other states, as has been ascertained through special inquiries made for the purposes of this report. The following facts will be of interest in this connection :

In Oregon, as reported by the State Auditor, legislative appropriations have increased more than 100 per cent in ten years. The State Auditor of Washington reports an increase in expenditures in ten years amounting to 190 per cent. The State Controller of Nevada reports an increase in the same period of 82.5 per cent ; Kansas, 136 per cent ; Minnesota, 170 per cent ; Illinois, 71 per cent ; Massachusetts, 63 per cent. Michigan has increased its tax levy nearly 100 per cent in the last ten years.

COMPARATIVE EXPENDITURES BY DEPARTMENTS.

In an endeavor to ascertain in what branches of the State expenditures the larger increases have taken place, a detailed comparison has been made, by departments, of the disbursements in the forty-ninth fiscal year with those in the fifty-ninth. Such an inquiry as this is especially timely this year, since it is just a decade since a special com-

mittee of the California Senate presented to the legislature a careful study of many of the public charges at that time.

The comparison by departments of our State government shows these results:

Department.	Expense Forty-ninth Fiscal Year.	Expense Fifty-ninth Fiscal Year.	Per cent of Increase or Decrease.
Judicial	\$282,244 16	\$453,941 22	61
Governor	21,390 10	32,377 56	51
Board of Examiners	9,279 12	16,667 58	80
Secretary of State	16,224 74	76,380 50	371
Controller	19,202 16	23,417 43	22
Treasurer	13,367 37	16,751 89	25
Attorney General	22,799 52	33,082 19	45
Surveyor General	14,336 35	20,679 89	44
Superintendent of Public Instruction	12,762 08	22,380 54	75
State Library	32,970 32	47,279 11	43
National Guard	174,178 53	259,180 44	49
Board of Health	8,762 12	37,452 22	327
Board of Equalization	19,525 73	21,450 19	10
Railroad Commissioners	16,528 43	17,994 48	9
Insurance Commissioner	7,443 17	33,543 04	351
Mining Bureau	25,803 01	25,214 94	Decrease 2
Fish Commission	27,746 67	109,859 33	296
Bureau Labor Statistics	8,928 97	10,786 79	21
Horticultural Department	9,795 32	24,258 39	148
Institution for Deaf and Blind	60,497 01	72,096 99	19
Home Adult Blind	21,195 82	26,710 03	26
Home for Feeble-Minded Children	74,766 56	139,387 82	86
State Hospitals	673,778 34	977,741 13	45
State Prisons	362,745 31	493,346 54	36

Arrest of criminals without the State	3,630 05	7,281 90	101
Code Commission	15,600 00	4,920 70	Decrease 68
Dairy Bureau	2,519 18	6,536 43	159
Agricultural Society	20,000 00	36,194 01	81
Payment of interest	166,232 10	175,754 70	6
Bank Commission	16,533 55	37,201 61	125
Building and Loan Commission	7,377 46	9,736 88	32
Department.	Expense Forty-eighth Fiscal Year.	Expense Fifty-eighth Fiscal Year.	Per cent of Increase or Decrease.
Legislative	\$203,300 16	\$270,126 77	33
State Printing Office	285,213 05	345,311 73	21

DISCUSSION OF FOREGOING FIGURES.

Beginning with the legislature, some of the figures in the foregoing table will be discussed in detail. The expenditures for per diem and mileage of Senators and Assemblymen were about equal for the two

years embraced in the comparison. The principal increases are shown by the following:

	1896-7.	1906-7.
Pay of officers and clerks, Senate	\$7,500 00	\$17,130 00
Contingent expenses, Senate	46,714 69	66,477 73
Pay of officers and clerks, Assembly	8,475 00	22,457 00
Contingent expenses, Assembly	70,000 00	96,566 59
Totals	\$132,689 69	\$202,631 32

By constitutional amendment recently adopted salaries have been substituted for per diem in payment of Senators and Assemblymen, and expenditures for officers, clerks, and employés are limited to \$500 per day for either house.

THE COURTS.

In 1897-8 the total cost of maintaining the Supreme Court was \$110,898.41, including \$32,400 spent on account of the Supreme Court Commission, and in 1907-8 the total expense was \$121,791.35, which amount included \$23,254.33 expended to replace the library and to supply furniture. A recent increase in the salaries of the Justices added \$14,000 to the total expense, and the court's expenses incurred under Section 47 of the Code of Civil Procedure increased from \$17,355.27 to \$22,174.47.

The total cost for the fifty-ninth fiscal year of the three District Courts of Appeal, created in 1905, amounted to \$107,044.66, of which amount the salaries of the nine Justices amounted to \$63,000.

In 1897-8 the cost of maintaining the office of Clerk of the Supreme Court was \$14,517.45, and in 1907-8 it was \$19,948.43. The principal part of this increase was due to additional salaries.

And, finally, increases in salaries of judges of the Superior Courts caused this item of State expenditure to rise from \$158,176.91 to \$204,340.03. By reason of other salary increases which become operative on the first Monday in January, 1909, this expenditure will hereafter amount to \$209,500 per year.

EXECUTIVE DEPARTMENT.

Of an apparent increase of \$10,987.46 in the expenditures connected with the office of Governor, the sum of \$671.50 represents printing, which in former years was not charged against individual offices. The principal increase of expense has been on account of the Governor's mansion, which was not purchased by the State until 1904. In the fifty-ninth fiscal year \$3,781.93 was paid for maintenance of the mansion and \$6,887.87 for refurnishing. In addition, the salary of the executive secretary of the Governor has been increased from \$2,600 to \$3,200 per year.

BOARD OF EXAMINERS.

Within the last ten years the number of clerks in the office of the Board of Examiners has been increased from one to four; the salary of the assistant secretary has been increased from \$1,800 to \$2,400, and that of the expert from \$2,000 to \$2,400.

SECRETARY OF STATE.

No department has shown a more rapid expansion during the last ten years than that of which the Secretary of State is the head. Two important additions recently made are the Corporation License Department, which in the fifty-ninth fiscal year entailed a cost of \$13,400.68 for salaries of clerks and other expenses, and the Motor Vehicle License Department, which cost for salaries and other expenses \$8,118.87. Printing, always a large item in this office, cost \$17,727.50. Some of the additions to the salary list made during the last ten years are shown by the following: Statistician, \$2,400 per annum; State Janitor, \$2,000; Clerk to Janitor, \$1,600; Assistant Bookkeeper, \$2,000; Certificate clerks (two), \$3,200; Register Clerk, \$1,600; additional clerks (three), \$4,800. In addition, there have been increases in some of the salaries of the office staff, such increases and the new positions before mentioned accounting for \$19,200 of the added expense.

On the other hand, the collections in the office of the Secretary of State have increased from \$22,489.70 in the forty-ninth fiscal year to \$883,973.21 in the fifty-ninth year.

STATE CONTROLLER.

The only addition to the force of employés in the Controller's office which has occurred in the last ten years is that of a stenographer. In this office, as in others, an increase of \$300 per year has been made in the compensation of the Chief Deputy; the pay of the bookkeeper has been increased \$400, and that of the porter \$240; one clerk has been promoted to the position of expert, and his salary increased \$400. The total increase in the salary roll has been \$2,240 per annum, and the addition of a printing appropriation of \$2,000 per year accounts for the greater part of the remaining difference between the expenditures of the forty-ninth and the fifty-ninth fiscal years. Meantime, the volume of work in some of the departments of the office has doubled.

STATE TREASURER.

The only additions to the roll of employés have been one watchman at \$1,200 and a stenographer. Salary increases include \$300 for the Chief Deputy, \$400 for the bookkeeper, and \$240 for the porter. Total increase of salary roll, \$3,040. Printing, postage, etc., account for the

remainder of the increase of 25 per cent in expenditures in the ten years. Within the same period the amount of money handled by the Treasurer has increased at least 80 per cent, and the adoption of the policy of depositing funds in bank has added very materially to his labors.

ATTORNEY GENERAL.

In this office, as a consequence of the growth of business to be transacted, the number of deputies has been increased from three to four, and two stenographers have been added. Also the salaries of the Assistant Attorney General and of two deputies have been raised to \$3,000 each. Two deputies are salaried at \$2,400; the phonographic reporter is paid \$1,800, two clerks \$1,600 each, and the stenographers \$1,200 each. Total increase of salary roll, \$7,000. Printing accounts for \$2,766 of the remaining increase; office rent in San Francisco has increased about \$600, and there have been larger expenses for postage, traveling, and purchase of library.

SURVEYOR GENERAL.

The single addition to the force of this department has been an Assistant Surveyor General at \$2,000 per year. There has been the usual increase in the salary of the Chief Deputy. Printing expense for the fifty-ninth year amounted to \$566. During the same year there was expended \$2,420 for purchase and copying of maps, as compared with \$1,500 in the forty-ninth year; for settlement of disputed titles under the act of March 21, 1907, the expenditure was \$2,030.80.

SUPERINTENDENT OF PUBLIC INSTRUCTION.

There has been an increase of only one in the number of regular employes of the department proper, the office of statistician being created with a salary of \$2,000; one clerk has been raised from \$1,200 to \$1,600. The largest apparent increase of expense is due to the charging of necessary printing expenses to the office; this amounted for the fifty-ninth fiscal year to \$7,963.75. Postage and expressage, traveling, and contingent expense account for the remainder of the increase.

STATE PRINTING OFFICE.

In the case of the State Printing Office it is necessary to depart from the usual method of making comparisons, because in 1898 the office, except for the printing of school text-books, was practically shut down, owing to the veto by Governor Budd of the appropriations made by the legislature of 1897. Therefore, the comparison in the general table is between the total expenditures for the forty-eighth fiscal year and the total for the fifty-eighth.

But these figures are scarcely representative, and a fairer comparison will be one made between the average of expenditures for the five years preceding 1897-8 and the average for the last five years. This last comparison shows that the total expenditures of the State Printing Office at present average about the same as before 1898. Yet closer examination reveals the fact that a larger proportion of the expenditures is attributable to the cost of manufacturing school text-books and less to general printing.

The following statistics will give a very good idea of the range of State Printing Office expenditures for sixteen years past:

Fiscal Years.	Total Expenditures.	For School Text-Books.	All Except Text-Books.
Total for five years—1892-3 to 1896-7.....	\$1,416,209 56	\$442,839 03	\$973,370 53
Average per year.....	283,241 91	88,567 80	194,674 10
1897-8.			
Appropriations vetoed.....	98,989 09	92,009 93	6,979 16
Total for five years—1898-9 to 1902-3.....	990,821 74	397,781 49	593,013 25
Average per year.....	198,164 34	79,556 29	118,602 65
Total for five years—1903-4 to 1907-8.....	1,413,517 94	693,772 58	719,745 36
Average per year.....	282,703 58	138,754 51	143,949 07

It was at the session of the legislature following Governor Budd's veto of the appropriations that the present plan of making individual appropriations for the several departments and offices, instead of one lump appropriation for support of the office, was put in force, and from the above figures it will be seen that the reform has been effective in reducing the cost of general printing, which for the last five years has averaged some \$50,000 less per year than during the five years preceding 1897-8.

STATE LIBRARY.

Only the salaries of the Librarian and two Deputy Librarians of the State Library are paid out of appropriations carried in the general appropriation bill, other expenditures of all kinds being met by the payment into the State Library Fund of a fixed amount derived from the fees collected by the Secretary of State. Up to 1895 the law required the whole of such fees to be paid into the State Library Fund: in that year the payments were limited to \$2,500 per month, which allowance has since been increased to \$3,500.

THE NATIONAL GUARD.

While the figures given in the table show an increase of 49 per cent in the fifty-ninth year, as compared with the forty-ninth, this is due entirely to unusual military expenses connected with active service of the National Guard on two recent occasions. During the fifty-ninth

fiscal year there was paid \$73,052.74 of claims arising from the service rendered in San Francisco in 1906 after the fire and earthquake, and \$16,742.32 on account of military expenses in the same city during the time of the street-car strike of 1907. Deducting these amounts, there is left \$169,385.38 to represent the ordinary expenses of the National Guard during the last fiscal year, and they were somewhat less than in the year 1897-8, though larger than the expenditures in most other years a decade back. During the latter half of the year named the war with Spain was in progress and the State's military expenses were greater than usual.

The largest item carried in the general appropriation bill on account of the National Guard is always that of "armory rents and other expenses," and the amount of expenditure under this heading has remained about stationary. In 1897-8 it was \$93,865.04, and in 1907-8 it was \$90,513.76. Among the larger increases in the expenses of the Guard are those on account of target practice, purchase of uniforms, encampments, allowances for regimental headquarters, traveling expenses and increased cost of administration in the Adjutant General's office. Many of these things were rendered necessary by the reorganization accomplished through the passage of the new military law in 1905. The office expenses before referred to show an increase at the end of the ten years of \$7,800 per annum.

On December 31, 1898, the National Guard of California was composed of 4,758 officers and men, and on September 30, 1908, its total strength was 3,282.

STATE BOARD OF HEALTH.

During the decade the scope of the work done by this department has greatly widened. Through legislation enacted in 1907 a pure food laboratory was established, and this entailed an expense in the fifty-ninth fiscal year of \$6,146.79; a bacteriological laboratory cost \$1,618.39; the sum of \$13,609.40 was expended for the prevention of the spread of contagious diseases. The office salary roll amounted for the year to \$12,525, including \$3,000 for an attorney, who has been an attachment of the Board of Health for many years.

BOARD OF EQUALIZATION.

An increase of \$1,000 per year in the appropriation for the traveling and contingent expenses of the Board and one of \$600 per year in the salary of the secretary are the principal causes of the growth of a little less than 10 per cent in the expenditures on account of this Board.

INSURANCE COMMISSIONER.

In this department the expenses have taken on a large expansion along with the enlargement of the duties of the Commissioner. While his salary has been increased from \$3,000 to \$4,000 and that of the deputy from \$1,800 to \$2,700, the greater part of the added expense has come from the much larger clerical force, fees paid for appraising properties of insurance companies, rent, and similar expenses. Only the salaries of the Commissioner and the Deputy Commissioner are fixed by statute; in addition, there were on the November, 1908, pay roll an assistant to the Commissioner at \$225 per month, statistician at \$200, one person credited with clerical services to the amount of \$200, four more at \$150 each, two stenographers at \$75 each, and a messenger at \$30. This, with the Commissioner and Deputy Commissioner, makes a salary roll at the rate of \$23,560 per year. Salaries other than those of the Commissioner and Deputy Commissioner are paid out of the Insurance Commissioner's special fund. The law formerly provided that out of the moneys collected by the Commissioner the sum of \$2,000 should be annually set aside for the general expenses of the office; in 1906 this allowance was increased to \$5,000, and in 1907 it was raised to \$25,000 per annum.

In the forty-ninth year the collections of the Insurance Commissioner were \$24,450.73, and in the fifty-ninth they were \$284,496.10.

FISH COMMISSION.

The appropriations available for the Fish Commission in the forty-ninth fiscal year amounted to \$26,100 and in the fifty-ninth to \$40,500. Other receipts were \$4,342.50 in the former year and \$136,511.98 in the latter year. This last amount was greatly in excess of the collections of the Fish Commission in any other year, and was due principally to the new hunting license law, which was the means of turning into the Game Preservation Fund \$116,569.11. In the forty-ninth year the total expenditures were \$27,746.67, and in the fifty-ninth \$109,859.33, an increase of 296 per cent.

BUREAU OF LABOR STATISTICS.

Statutory salaries in this department have remained unchanged, but the legislature has made a larger allowance for assistants, which, in addition to printing, accounts for the increase of about 21 per cent in expenditures.

HORTICULTURAL DEPARTMENT.

By the legislation of 1903 the form of organization of this department was entirely changed, a single commissioner taking the place of the former Board of Horticulture. The Commissioner receives a salary

of \$3,000; deputy, \$2,400, and secretary, \$2,100. During the last fiscal year in the work of the department \$7,621.28 was spent out of the appropriation for support and \$8,768.11 out of that for prosecution of the search for beneficial insects.

INSTITUTION FOR DEAF AND BLIND.

This institution shows a total increase in ten years of \$11,599.98, or 19 per cent. During the last fiscal year the expenditure for salaries was \$45,584.13, and that from the support fund was \$20,934.09. From the contingent fund there was drawn \$5,567.52.

In the forty-ninth year the number of pupils was 212, and in the fifty-ninth 229. The per capita expense on this basis was \$285.36 in the former year and \$314.83 in the latter. If, however, the contingent fund expenditures be eliminated, which is the usual method of figuring, the per capita for the fifty-ninth year is only \$292.

HOME FOR THE ADULT BLIND.

In the forty-ninth fiscal year the expenditures, including the Adult Blind Fund, amounted to \$36,491.32, and in the fifty-ninth year, on the same basis, the expenditures were \$54,258.01. Omitting consideration of the Adult Blind Fund, which has generally been used to buy material and to pay wages of blind workmen, the expenditures were \$21,195.82 in the forty-ninth year and \$26,710.03 in the fifty-ninth. In the former year, according to the report of the Senate committee, the inmates numbered 107, and in the latter year, the average number of inmates, according to the State Board of Charities, was 106; on the basis of cost as above given the per capita expense would be \$198.09 for 1897-8 and \$251.98 for 1907-8.

HOME FOR FEEBLE-MINDED CHILDREN.

This institution shows an increase of about 40 per cent in the number of its inmates, or from 521 in the forty-ninth year to 729 in the fifty-ninth. The per capita expenditure, as computed by General Superintendent Hatch, was \$150.18 in the earlier year and \$209.26 in the later one. This is an increase in the per capita cost of 39 per cent. The total cost of maintenance of the institution has increased 86 per cent, according to the Controller's figures.

THE STATE HOSPITALS.

According to the figures of the Controller's office, the expenditures out of public appropriations for maintenance of the five State hospitals were \$673,778.34 in the forty-ninth fiscal year and \$977,771.13 in the

fifty-ninth year, an increase of 45 per cent. This omits consideration of the contingent fund expenditures; the total expenditure from those funds was \$120,933.29, but it is not practicable to segregate the expenditures for maintenance from those for permanent improvements.

Dr. F. W. Hatch, General Superintendent of State Hospitals, has prepared from the records of the Commission in Lunacy the following statistical comparison, his figures on expenditures differing somewhat from those of the Controller, owing to the basis of computation adopted. Dr. Hatch's figures represent actual indebtedness incurred, and Controller's figures amounts actually paid by fiscal years:

	Hospital Cost, 1898.	Hospital Cost, 1908.	Per cent of Increase.
All hospitals	\$674,376 18	\$954,949 75	41

	Cost per Patient for the Year Ending June 30, 1898.	Cost per Patient for the Year Ending June 30, 1908.	Population, 1898.	Population, 1908.
Stockton	\$126 81	\$139 77	1,557	1,988
Napa	133 46	147 93	1,466	1,838
Agnews	133 30	197 58	926	769
Mendocino	160 65	164 36	477	846
Southern California	160 50	175 78	575	1,114
Totals	\$714 72	\$825 42	5,001	6,555
Average	\$142 94	\$165 08	Increase of popula- tion in ten years.. 1,554	
Per cent of increase of cost		15½	Per cent of increase in population 31	

SAN QUENTIN AND FOLSOM PRISONS.

Including expenditures from appropriations and other funds used for maintenance, the total expenditures of San Quentin were \$251,807 in the forty-ninth fiscal year and \$311,210.85 in the fifty-ninth, an increase of 23 per cent. The expenditures of Folsom increased from \$110,938.31 to \$182,135.69, an increase of 64 per cent.

For the forty-ninth year the number of prisoners reported in San Quentin was 1,336, and in Folsom 906. The per capita cost in San Quentin was, on the basis of above figures, \$180.99 and in Folsom \$122.45. In the fifty-ninth year the population of San Quentin averaged 1,620 and the per capita cost \$192.11. For Folsom the corresponding figures are 996 prisons and a per capita cost of \$182.87. It should be stated, however, that the figures here given, though correct as to the years mentioned, can not be taken as fair averages all the way through; it so happened that the expenditures for Folsom Prison in the forty-ninth year were exceptionally small, by reason of which the per capita for that year is made abnormally low.

WHITTIER AND PRESTON SCHOOLS.

If contingent fund expenditures and special appropriations for improvements are disregarded, the expenses of maintaining the Preston and Whittier State schools in the forty-ninth and fifty-ninth fiscal years were:

Schools.	Forty-ninth Year.	Fifty-ninth Year.	Per cent of Increase.
Preston.....	\$63,012 45	\$69,672 69	11
Whittier.....	94,647 52	103,582 00	9
Total.....	157,659 97	\$173,254 69	

For the forty-ninth year the population of Whittier was reported as 307, making the per capita cost \$308.29; average population for fifty-ninth year 300, and per capita cost \$345.27.

For the forty-ninth year the population of Preston was 141, and the per capita cost \$446.90; for the fifty-ninth year the average population was 292, and the per capita cost \$238.60.

The population figures given above, which are by the State Board of Charities, omit from consideration all pupils on parole, of whom the average number at Whittier in the fifty-ninth year was 234 and at Preston 69. One explanation of the low per capita cost at Preston in the fifty-ninth year is that through an unexpectedly large increase in number of pupils the appropriations ran short, necessitating stringent economies.

TRANSPORTATION OF INSANE AND PRISONERS.

The figures given in the table indicate an increase of only 15 per cent for the fifty-ninth year over the forty-ninth for the transportation of insane persons and prisoners, but the real increase in ten years has been about 30 per cent. It has usually happened that the legislature has made appropriations in the general appropriation bill which have proved inadequate to pay the transportation expenses, rendering deficiency appropriations necessary at the next session. For a five-year period beginning with the forty-ninth year and ending with the fifty-third, the annual average of expenditures was \$53,833.65, and for the ensuing five-year period the average was \$70,364.82.

In the forty-ninth year there were 1,192 insane persons and 849 prisoners, a total of 2,041, delivered at hospitals and prisons, and in the fifty-ninth year the numbers delivered were 1,697 and 1,279, respectively, the total being 2,976. The proportionate expense has been slightly reduced, but there can be no great saving made until the legislature determines that the hospital authorities, instead of the sheriffs, shall assume charge of the delivery of insane persons. This change has been made in some other states and has been found economical, as well as advantageous from other points of view.

SUPPORT OF ORPHANS.

This is a branch of expenditure in which a falling-off appears when the payments made in the forty-ninth fiscal year are compared with those in the fifty-ninth. Orphan expenditures reached their highest point in 1902-3, in which year more than half a million dollars was paid out, but in the five years since there has been a fairly regular annual decrease. These figures show the expenditures for the last eleven years:

1897-8.....	\$470,030 47	1903-4.....	\$480,278 82
1898-9.....	488,594 20	1904-5.....	444,716 15
1899-1900.....	433,143 09	1905-6.....	453,003 72
1900-1.....	469,575 62	1906-7.....	435,659 26
1901-2.....	482,465 66	1907-8.....	435,950 82
1902-3.....	502,862 55		

THE NORMAL SCHOOLS.

The comparison as to Normal School expenditures includes only expenses of maintenance, which were \$127,904.21 in the forty-ninth year, and \$283,852.99 in the fifty-ninth. But in the interval two additional schools, the San Diego and the San Francisco, were established. Taking the three older schools, the costs of maintenance compare as follows:

Schools.	Forty-ninth Year.	Fifty-ninth Year.	Per cent of Increase.
San José.....	\$51,759 33	\$57,618 58	11
Los Angeles.....	48,423 17	61,581 59	27
Chico.....	27,721 71	41,909 93	51
Totals.....	\$127,904 21	\$161,110 10	26

THE COMMON SCHOOLS.

In the course of ten years the cost to the State of primary and grammar schools has increased \$1,161,232.20, which is a little less than 38 per cent. At the same time the increase in number of children of school age has been about 31.5 per cent. The sums distributed among the counties for support of common schools include not only the receipts from the tax levy for the State school fund, but also income from all other sources, including poll tax, inheritance tax, and interest on bonds. No change has been made in the rate of \$7 per census child, which constitutes the basis of the ad valorem tax levy for school purposes, but the receipts from other sources have increased.

In the forty-ninth fiscal year the total amount contributed by the State for support of common schools was \$3,073,909.70, which was distributed on a basis of 374,624 census children, amounting to \$8.21 per child. In the fifty-ninth year there was a distribution of

\$4,235,141.90 for the benefit of 457,048 census children, making an average of \$9.27. These figures differ slightly from others given in another part of this report, being made upon a different basis.

CAPITOL BUILDING AND GROUNDS.

During the fiscal year 1907-8 the total amount expended upon the Capitol building and grounds was \$300,572.82, of which \$224,892.12 was drawn from special appropriations made by the legislatures of 1905 and 1907 for remodeling and improving the building. In addition, there was expended in repairs \$2,921.35, drawn from the regular biennial appropriations. Eliminating these items, and also deducting from the expenditures of 1897-8, which totaled \$61,111.07, all repair items, the ordinary expenditures for the two years compare as follows:

	Forty-ninth Fiscal Year.	Fifty-ninth Fiscal Year.	Per Cent of Increase.
Total expense -----	\$48,204 03	\$72,759 35	51

The principal increases were in pay of employes in the building and on the grounds, which increased from \$27,680 to \$36,911.80; stationery, fuel, and lights for legislative and State officers, \$8,081.10 to \$9,717.15; purchase of carpets and furniture, from \$2,959.72 to \$15,759; lighting grounds, \$648 to \$864; water for Capitol building, \$150 to \$933.15.

CODE COMMISSION.

The economy effected in this department has resulted from the abolition of the former commission of three members, who employed a secretary and stenographer, and the substitution of a single commissioner, receiving a salary of \$3,600 a year, with the allowance of a stenographer at \$1,200 a year. During the present fiscal year there has been an expenditure of \$5,000 for printing an index to the laws.

ARREST OF CRIMINALS WITHOUT THE STATE.

Expenses under this head grow from year to year, and in occasional years, when there are costly foreign extraditions, they are especially large. In the fifty-eighth fiscal year the expenditures were \$16,518.10, the excess over the normal being due principally to the extradition from British Columbia of George D. Collins. From the forty-ninth to the fifty-third year, both inclusive, the average was \$2,338.49, and, omitting the fifty-eighth year, the average from the fifty-fourth to the fifty-ninth has been \$6,446.38. During the current year the expenditures to date have been at the rate of about \$9,000 per year.

OBSOLETE DEPARTMENTS AND NEW ONES.

Within the ten-year period embraced in this review several departments or commissions have been abolished and a number of new ones created. The Yosemite Commission, which expended \$19,488.95 in the forty-ninth fiscal year, was one of those abolished. The Board of Viticulture, also, was abolished and its work turned over to the University. The office of Commissioner of Public Works, that of Débris Commissioner and the Department of Highways, whose combined expenditures in the fifty-seventh year were \$148,317.71, went out of existence when the State Engineering Department was created in 1907. State aid to aged persons in indigent circumstances is another form of expenditure which has ceased to exist.

One of the new expenses of the State government is support of high schools, which in the fifty-ninth year cost \$302,592.89. The California Polytechnic School has been established within the decade; its cost in the fifty-ninth year was \$92,376.73. The establishment of the University Farm at Davisville will add considerably to expenses of University maintenance.

The Board of Forestry, established in 1905, cost last year \$21,973.46, including maintenance of California Redwood Park. In addition, there are the San Diego and San Francisco Normal Schools, already mentioned.

The Department of Engineering last year represented a direct charge against the treasury of \$127,192.27, and a large amount of additional expense was charged against various buildings and other improvements constructed.

Another office established less than ten years since is that of State Veterinarian, the expense of which in the fifty-ninth year was \$8,096.77.

EXPENDITURES FOR PERMANENT IMPROVEMENTS.

By the following figures are shown the amounts which were expended during the fifty-eighth and fifty-ninth fiscal years for buildings and other permanent improvements in connection with the different State institutions, the Capitol, roads, river work, forestry work, purchases of land, and harbor work at San Francisco:

Home for Adult Blind, workshop and dormitory	\$25,812 41
Home for Feeble-Minded Children, additional buildings, etc.	112,068 47
Napa State Hospital, reservoir, purchase of land, etc.	82,884 04
Agnews State Hospital, reconstruction	157,557 11
Mendocino State Hospital, cottages and other improvements	40,230 65
Southern California State Hospital, new buildings, storm channels, etc. .	44,756 70
Stockton State Hospital, various improvements	9,954 11
San Quentin Prison, new cell building	52,578 46

Folsom Prison, new cells, machinery, etc.	\$69,543 90
Whittier State School, water supply, shops, repairs	7,225 72
Preston School of Industry, assembly hall, water supply, etc.	28,229 12
San José Normal School, reconstruction	31,992 40
Los Angeles Normal School, repairs	431 58
Chico Normal School, furniture, heating plant, etc.	6,799 30
San Diego Normal School, various improvements	7,042 31
San Francisco Normal School, new buildings, site, etc.	110,605 08
California Polytechnic School, new buildings and other improvements	72,906 30
State Capitol, remodeling interior	313,749 79
State University, University Farm and various improvements.....	331,709 54
State Agricultural Society, new buildings, etc.	22,035 44
Veterans' Home at Yountville, water supply and other improvements..	33,228 46
Sutter's Fort, purchase of land and improving grounds	10,305 51
Erection of bridges, etc., Sonora and Mono road	5,426 96
Improvements, etc., Mono Lake Basin road	6,139 91
Improvements, etc., Sonora and Mono road	10,658 79
Improvements, etc., Lake Tahoe Wagon road	3,928 41
Bridge work, Lake Tahoe Wagon road	4,715 13
Wagon road to Mono Lake Basin	442 50
Mount Pleasant and Downieville road	3,104 28
Protecting banks of Eel River	31,288 56
Kings River Canyon road	9,659 29
Reforestation San Bernardino Forest Reserve	1,971 13
Highway, Trinity and Humboldt counties	4,970 92
Construction works for restraining debris	48,348 15
Rectifying river channels	42,162 70
Improvement of California Redwood Park	12,901 35
Repairing Marshall Monument	62 45
Purchase of water, Marshall Monument	250 00
Construction of Alturas and Cedarville road	316 70
Guide posts, desert sections of California	130 05
Repairs, Woman's Relief Corps Home	1,150 40
Preservation of Colton Hall, Monterey	1,358 25
Improvements on San Francisco water front executed by State Har- bor Commission during fifty-eighth and fifty-ninth fiscal years.....	996,899 65
Expenditures from Stockton Hospital "contingent funds," fifty-ninth and sixtieth fiscal years, for improvements	21,240 00
Expenditures from Napa Hospital "contingent funds," fifty-ninth and sixtieth fiscal years, for improvements	33,371 53
Expenditures from Agnews Hospital "contingent funds," fifty-ninth and sixtieth fiscal years, for improvements	3,433 25
Expenditures from Mendocino Hospital "contingent funds," fifty- ninth and sixtieth fiscal years, for improvements	16,039 84
Expenditures from Southern California Hospital "contingent funds," fifty-ninth and sixtieth fiscal years, for improvements	27,915 22
Purchase of site for State building, San Francisco	72,000 00
Preliminary work, Alaska-Yukon Exposition	5,000 00
Acquisition of fish transportation car	5,458 76
Total	\$2,944,843 58

A VALUATION OF STATE PROPERTY.

There has been prepared, and is printed in another portion of this report, an estimate of the value of the lands, buildings, and property of every description owned by the State, and it shows the very large total of \$51,965,852.85. When the collection of the data contained in this schedule of properties was commenced, I hoped to present a balance sheet, in order to show in compendious form the assets and liabilities of the State government; but, as it proved to be impossible, in the limited time and with the facilities available, to secure in all instances appraisements made with sufficient accuracy for balance sheet purposes, this schedule is submitted as a substitute, and it is believed it possesses considerable value as an exhibit of the State's various properties. At any rate, it is the first attempt made to assemble data of this kind.

Most of the valuations have been made by the heads of departments, institutions, and commissions, but assistance has been received from city and county assessors and from experts of various kinds. It is believed that a majority of the valuations are conservative. The general plan was to include everything in the nature of real estate and permanent investments; the land to be valued at what it would sell for, but buildings and other improvements and also personal property to be rated at their value to the State for the uses to which they are now put, proper deductions from cost price to be made for depreciation.

In the case of the San Francisco water front property, which is the State's largest single asset, no satisfactory basis for a commercial valuation could be found, and it was necessary to omit from the schedule the amount represented by the water frontage itself. But the reclaimed seawall lots had been appraised and their rental value fixed some time before by real estate experts, and the figures which they reported, viz.: \$3,616,000, were placed in the schedule. The valuable improvements which have been created during the last fifty years were estimated at more than \$5,000,000, and enough other property under control of the Harbor Commission was found to make up a total of \$9,237,876.68.

The State's interest in the water front and tide lands of San Diego and Oakland can be estimated more easily, because in both cases portions of the harbor lands are in private ownership and have a commercial value. The San Diego property is valued at a total of \$1,692,038. At its last regular session the legislature made an appropriation for the purpose of settling disputed titles to some of this property.

Whether or not the State still owns valuable tide lands in the harbor of San Pedro is a disputed point, and no estimate of values has been attempted. But the Attorney General has recently commenced an action in the name of the State to quiet title to a large amount of

valuable harbor property at that port, and it may yet prove to belong to the State.

By the decision of the California Supreme Court in the Oakland water front suit and by other evidence, it is made certain that the State is the owner of several miles of water frontage on the Oakland estuary and on the western and southern boundaries of the city of Alameda. The water frontage of Oakland within its original corporate limits was conveyed by the State to the city, and in large part has since passed to other owners, but the East Oakland basin and the southern, or Alameda, shore of the estuary were not included in the original grant, although most of the northern shore of the basin is claimed under a tide land patent. Through the harbor improvements being executed by the United States Government, which are designed to give thirty feet of water at low tide, the frontage on the estuary is being made highly valuable, and the valuation of \$500,000, which has been assigned to the State's holdings, is a very small part of what they will soon be worth.

Some of the State's holdings of real estate in cities like Los Angeles, Stockton, Oakland, Berkeley, and Sacramento have become extremely valuable. Another instance of rapid appreciation in value is furnished by the California Redwood Park, which the State bought a few years ago for \$250,000 and which is now commercially worth twice as much.

An estimate of half a million dollars has also been placed on the water-power rights of the State at Folsom Prison, such estimate assuming that the full amount of power will ultimately be utilized.

The assets of the University of California, including all endowments, amount to \$10,029,536.76, and constitute the largest item which figures in the schedule.

ESTIMATES OF EXPENDITURES.

In the pages immediately following will be found the usual estimates of expenditures prepared as a suggestion for the general appropriation bill. Such estimates have been based in large part on the data furnished by the heads of the different State offices and departments, who are necessarily better acquainted than any one else with the needs which will be experienced during the sixty-first and sixty-second fiscal years. Yet it has been necessary, as usual, to reduce many of the preliminary estimates furnished in this way, because the aggregate exceeded greatly the total which any legislature would appropriate.

No estimates are included for new buildings and other permanent improvements, since all such are excluded by the constitution from the general appropriation bill. Close attention has been paid to present statutory requirements and limitations, which have necessitated making

some proposed appropriations larger and others smaller than they would otherwise have been.

In certain instances in which the purpose of the expenditure is such as to make it properly a part of the general appropriation bill, but either the department or the work is new, the amounts requested have been inserted as furnished, leaving it entirely to the legislature to determine the policy to be pursued with regard to expenditures. Such is the case with the State Board of Health in relation to the newly established pure food and bacteriological laboratories. On the other hand, the amount requested for contingent for the Engineering Department has been reduced because it appeared that the proper way to cover certain salary expenditures would be by making new statutory offices.

Estimates for salaries of State officers have been left as in former years, because it is not yet determined whether the increases made by the recent constitutional amendment take effect at once or only with the beginning of the new terms of the officers affected. If it shall be found that the former is the case, the following increases should be made for the two years: Governor, \$8,000; Lieutenant Governor, \$8,000; Secretary of State, Controller, Treasurer, Surveyor General, and Superintendent of Public Instruction, \$4,000 each; Attorney General, \$6,000; a total of \$42,000.

On account of lack of data no estimate has been made for the maintenance of the University Farm at Davisville.

The estimates for departments occupying offices in San Francisco include the usual amounts for rent, although there is a possibility that the new State building in that city will be completed by the beginning of the sixty-second fiscal year, in which event further payment of rent can be avoided in the cases of most of the departments, as they can be assigned rooms in the new building. The Supreme Court, however, has taken a lease for five years of the quarters which it occupies jointly with the District Court of Appeal.

The estimates of expenditures for the State Hospitals, including the Hospital for the Criminal Insane, now in course of construction at Folsom, make a total of \$2,357,511. This is an increase of \$423,407. But large as is the increase, it is only fair to state that Dr. F. W. Hatch, General Superintendent of State Hospitals, believes that the estimates for support are too low, and requests that the following figures on support be submitted as alternative estimates: Stockton, \$334,560, instead of \$318,084; Napa, \$334,824, instead of \$315,459; Agnews, \$214,450, instead of \$189,111; Mendocino, \$214,200, instead of \$184,632; Southern California, \$288,850, instead of \$262,085. It is assumed that the legislature will give due consideration to both sets of figures.

The estimates for the several funds aggregate the following amounts for the sixty-first and sixty-second years:

General Fund	\$9,114,521 00
State School Fund	6,398,672 00
State High School Fund	728,010 00
Interest and Sinking Fund	282,870 00
Total	<u>\$16,524,073 00</u>

The total of estimates for the fifty-ninth and sixtieth fiscal years was \$15,189,473; for the fifty-seventh and fifty-eighth, \$13,750,657; for the fifty-fifth and fifty-sixth, \$12,078,151.

The last legislature appropriated for the General Fund \$213,249 more than the Controller's estimate.

Respectfully submitted.

A. B. NYE,
Controller.

ESTIMATE OF EXPENDITURES

For the sixty-first and sixty-second fiscal years ending June 30, 1910 and 1911.

For What Purpose.	Amount.	Total.
<i>For Legislative Department.</i>		
*Salaries and mileage of Senators and per diem and mileage of Lieutenant-Governor	\$42,200 00	
Salaries and mileage of Assemblymen	83,000 00	
Pay of Officers, Clerks and all other employés of the Senate	35,000 00	
Pay of Officers, Clerks and all other employés of the Assembly	35,000 00	
Contingent expenses of the Senate	5,000 00	
Contingent expenses of the Assembly	7,000 00	
		\$207,200 00
<i>For Judicial Department.</i>		
Salaries Justices of Supreme Court	\$112,000 00	
Salaries of two Secretaries of Supreme Court	9,600 00	
Salaries of two Phonographic Reporters of Supreme Court	10,800 00	
Salary of Reporter of Decisions of Supreme Court and District Courts of Appeal	5,000 00	
Salary of one Assistant Reporter of Decisions of Supreme Court and District Courts of Appeal	4,800 00	
Salary of Librarian of Supreme Court	3,000 00	
Salaries of two Bailiffs of Supreme Court	6,000 00	
Salary of Clerk of Supreme Court	6,000 00	
Salary of Chief Deputy Clerk of Supreme Court	4,800 00	
Salaries of five Deputy Clerks of Supreme Court	18,000 00	
Salary of Stenographer to Clerk of Supreme Court	2,000 00	
Pay of Porter to Clerk of Supreme Court, Sacramento	1,440 00	
Salaries of Justices of District Courts of Appeal	126,000 00	
Salaries of three Clerks of District Courts of Appeal	14,400 00	
Salaries of three Deputy Clerks of District Courts of Appeal	10,800 00	
Salaries of three Phonographic Reporters of District Courts of Appeal	14,400 00	
Salaries of three Bailiffs of District Courts of Appeal	7,200 00	
Salaries of Judges of Superior Courts (State's portion)	419,000 00	
Postage and contingent expenses of Supreme Court	250 00	
Postage and contingent expenses of Clerk of Supreme Court	4,000 00	
Postage and contingent expenses of District Courts of Appeal (one third to each)	750 00	
Postage and contingent expenses of Clerks of District Courts of Appeal (one third to each)	3,000 00	
Expenses of Supreme Court under Section 47, C. of C. P.	50,800 00	
Printing, binding, etc., Clerk of Supreme Court	2,500 00	
Printing, binding, etc., Clerks of District Courts of Appeal (one third to each)	3,000 00	
Salaries of Porters of District Courts of Appeal (one third to each)	5,400 00	
Justices of District Court of Appeal, rent of court rooms, Los Angeles	8,000 00	
		852,940 00
<i>For Executive Department.</i>		
Salary of Governor	\$12,000 00	
Salary of Private Secretary to Governor	8,000 00	
Salary of Executive Secretary to Governor	6,400 00

\$51,965,852 85

STATEMENT OF BONDED DEBT.

State Bonded Debt July 1, 1908.

Civil bonds of 1857, 7 per cent	\$3,500 00
Civil bonds of 1860, 7 per cent	500 00
Funded Debt bonds of 1873, 6 per cent	2,277,500 00
San Francisco Depot bonds, 1891, 4 per cent	\$600,000 00
There is, in bonds and cash, in the San Francisco Depot Sinking Fund to meet this obligation, to date:	
Bonds, face value	\$464,500 00
Cash	3,317 27
	<hr/> 467,817 27
Net indebtedness	132,182 73
Seawall bonds, 1903, 4 per cent	\$250,000 00
Bonds in Seawall Sinking Fund:	
Face value	\$30,000 00
Cash in same	569 71
	<hr/> 30,569 71
Net indebtedness	219,430 29
Total net indebtedness July 1, 1908	<hr/> \$2,633,113 02
Total of bonds outstanding July 1, 1908	<hr/> \$3,131,500 00

In the statements of sinking funds above given the bond holdings are given at par, but on July 1, 1908, the premium on the United States bonds in the San Francisco Depot Sinking Fund amounted to \$96,383.75, according to the report of the State Treasurer.

Of the foregoing the Civil Bonds of 1857 and 1860 are supposed to have been lost or destroyed, never having been presented for payment. Interest has ceased.

Of the Funded Debt Bonds of 1873 the State Treasurer holds in trust for the University of California \$751,000 and for the State School Fund \$1,526,500, the entire issue being held by the State.

The State Treasurer also holds in trust for the State School Fund \$200,000 of the \$600,000 issue of San Francisco Depot Bonds, the other \$400,000 being in the hands of private holders.

The \$250,000 issue of Seawall Bonds was sold to individual holders.

NOTE—An additional issue of Seawall Bonds in the sum of \$500,000 was sold on the 2d of July, 1908, to the State of Nebraska, at par.

*Includes improvements.

Notes: C.H.—City Hall; W.Wks.—Water Works; G.Wks.—Gas Wks.; E.L.P.—Electric Light Plant; Cem.—Cemetery; G.C.—Garbage Crematory; P.M.—Public Market; S.S.—Sewer System; P.L.—Public Library; L.B.—Library Building.

Notes: The Controller is indebted for the foregoing figures to the clerk and auditors of the various cities and incorporated towns. A number of municipalities are omitted from the table because no returns could be secured from them. In several instances only the names of assessment rolls were furnished, by reason of which fact the aggregate of such totals exceeds the aggregate of real estate, improvements and personal property.

The returns in respect to public utilities owned by municipalities show that 83 cities and towns own city halls, 12 own electric light plants, 82 own sewer systems, 100 own public libraries, 69 own library buildings, 41 own water works, 28 own cemeteries, 12 own docks or wharves, 7 own garbage crematories, 1 owns gas works, and 2 own public markets.

EXHIBITS

SHOWING THE

ASSESSED VALUE OF PROPERTY

AS RETURNED BY COUNTY AUDITORS FOR THE YEAR 1908,

AND THE

INDEBTEDNESS OF THE COUNTIES OF THE STATE.

1908

ALAMEDA COUNTY.

REPORT OF THE STATE BOARD OF EQUALIZATION.

To His Excellency, JAMES N. GILLET, Governor.

SIR: In accordance with the provisions of law the State Board of Equalization submits the following report covering the assessment years of 1907 and 1908.

INCREASE IN ASSESSED VALUATION.

In the last report of this Board it was shown that in the ten years, 1896 to 1906, the assessed value of property, as returned by assessors, had increased \$293,136,891, or 24 per cent, while the railway assessments made by this Board, for the same period, had increased \$37,454,117, or 87 per cent. If we compare the 1908 assessments with those of ten years ago, a far greater difference and more favorable showing is made. The total assessment made by the assessors for the year 1898 amounted to \$1,086,602,230, while for the year 1908 the returns show \$1,874,856,441, an increase of \$788,254,211, or 73 per cent. In 1898 the total railway assessments by this Board footed \$44,457,473, levied upon 4,625 miles of railway. In 1908 the railway mileage had increased to 5,960 (or 29 per cent), while the assessment by this Board jumped to \$116,698,162, or an increase of 163 per cent in ten years. But coming to the part in these increases directly attributable to the present Board—who assumed office in January, 1907—we have but to compare the record for two years. When we assumed office we found the railroads assessed (in 1906) for \$81,010,821. Our first assessment raised this property to \$113,822,216, and for the current year (1908) an assessment, as before stated, of \$116,698,162. The percentage of increase was, therefore, 40.5 per cent in 1907 over 1906; 2.5 per cent in 1908 over 1907, and 44.3 per cent in 1908 over 1906. The great increase in railway assessments shown in the last two years was the direct result of applying the “percentage of gross earnings” plan to those assessments. In other words, the Board undertook to fix such ad valorem assessments on the several railways as would produce a tax equal to 4 per cent of the gross earnings of the roads for a calendar year. This was in conformity with the constitutional amendment adopted by the Legislature and submitted to the people at the recent election. It may be here stated, however, that the gross earning plan was not applied to certain of the railway

companies assessable by this Board, for we did not feel that we could consistently assess such roads for less than the value of their tangible and franchise properties, and to have applied such plan would have reduced the assessments to a considerable extent. This applies, however, to only those certain railways just commencing operations, and which were unable to report actual gross earnings for a full year (roads under construction), or to such roads as might be termed private railways, engaged in hauling sugar beets and cement to and from factories.

VISITING COUNTIES AND COUNTY ASSESSMENTS.

During the first six months of 1907 every county in the State was visited by the Board, either collectively or by at least two members. This was immediately following the great earthquake and fire, by which property amounting to hundreds of millions of dollars was lost to the assessment rolls. In each county the Board urged upon the assessors the necessity of keeping up their assessment value, and we also endeavored to show those officers the great necessity for large increases to make up for the lost and destroyed property, else the State would be compelled to levy an extremely high tax rate. How well the counties responded is shown by the fact that the 1907 assessment exceeded that of 1906 by \$251,618,063, the largest increase for a single year of any known since the adoption of our present revenue system in 1872. This Board reciprocated by increasing the railway assessments, for the same period, \$32,811,395. These enormous increases permitted this Board to drop the State tax rate a fraction over three cents, notwithstanding the legislative direction to raise by taxation \$688,000 more than we did in 1906. For the 1908 assessment the counties gave us another valued increase of \$110,017,622, and the railways contributed an increase of \$2,875,946. These increases, coupled with the fact that we had \$400,000 less taxes to raise than in the preceding year, enabled the State to get along with a tax rate of 40 cents, or $4\frac{1}{2}$ cents lower than for 1907. This is the lowest legitimate tax rate in the history of the State. (The tax rate for the year 1902 was one cent and eight mills lower, but a deficiency of over one and a half millions of dollars followed the levy, which had to be made up the succeeding year.)

It is the general tendency in the administration of public affairs, as assessments increase and the State grows more wealthy and more able to stand the burden of taxation, that the tax rate remains stationary or increases slightly. This is borne out by the returns made to this Board by the counties, which show, with very few exceptions, that while the assessments of the county have increased very materially, the county tax rate has also increased. On the other hand, there has been a considerable decrease in State rates, and should the taxpayer

find any increase in his taxes this year, no blame can be attached to the State government, but he must look to those who are responsible for the proper administration of county affairs, to ascertain the cause of the increase.

PREPARING AND COMPLETING THE ASSESSMENT ROLL.

The Board desires to call attention to two very important matters in connection with the compilation and completion of the assessment roll.

First, description of property. In this regard the assessor should exercise great care to see that the description is definite and certain on his roll, and when a map or plat of the property has been filed, the description should refer to such map or plat. Let the reference be to the date of the filing of the map or plat, to the book, page, and office where filed and recorded. The supervisors will no doubt furnish the assessor with proper rubber stamps for all such purposes. We are aware, of course, that our courts have recently, in an instance or so, upheld an assessment wherein the map or plat was not referred to in the assessment; but why compel the State and County to seek the courts for the upholding of such descriptions when the assessor by the exercise of a little care and time can make his descriptions so certain and definite as not to be assailable in the courts?

Second, certification of the roll. Section 3652 of the Political Code requires the assessor and his deputies, before turning the roll over to the board of supervisors, to *certify* to the correctness and other material facts relating to the assessments and roll. It is true the section contains a saving clause that a failure of the assessor to so certify will not affect the validity of the assessment. But why leave such loopholes for the dissatisfied taxpayer to attack? The certification is an important matter, as the Supreme Court pointed out in *Allen vs. McKay*, 139 Cal. p. 94, when it said: "The sole and exclusive evidence of the date of the assessment of real property is the date when the assessment roll was completed *and certified by the assessor.*" Again, the First Appellate Court said, in *Houghton vs. Market Street Railway*, 1 Cal. App. p. 576, that "*the assessment roll is not completed until certified by the assessor and delivered to the clerk of the board of supervisors.*"

The Board calls attention to these matters in this report that they may thereby reach the assessors, and thus assist in obtaining legal and unassailable tax assessments.

QUESTION OF ASSESSMENT OF STOCK.

A controversy arose during the present assessment season between the assessors of Trinity and Tehama counties relative to the assessment of stock belonging to non-residents. Most likely the same question has

arisen in other counties, but so far no final determination of the matter has seemingly been made by the courts. The facts in the Trinity-Tehama case are as follows: Trinity has numerous stock owners, chiefly cattlemen, who reside in and own grazing and pasture land in their home county, and also own or rent large tracts of the same kind of land in the adjoining county of Tehama. Owing to climatic or other physical conditions prevailing in those two counties, the Trinity residents, owners of such cattle, must necessarily drive their stock from Trinity to Tehama County for keeping and pasture not later than the month of November in each year, and there keep and pasture them until the latter part of April of each year, covering a period of at least one half of the year. Thus, in Tehama County (a county outside the residence of the owner of the cattle) the stock is herded and cared for, the young are born in the spring months, sexes are intermingled for breeding purposes, the bands are rounded up and in all respects kept, pastured and cared for in the same manner as they would have been if they had remained in the home county of the owner.

Thus is presented the question as to whether Tehama or Trinity County has jurisdiction for assessment purposes. No hard and fast rule in the premises can be gathered from the legislation and judicial decision of the State. The general rule is, that tangible, visible, personal property, like cattle, sheep, and other live stock, in law is deemed to have its *situs* at and with the domicile of the owner. In its nature, such property is movable, and its *situs* follows the domicile of the owner. The latest judicial expression along this line was the case of *Rosasco vs. Tuolumne County*, 143 Cal. 430; but the facts in this case are not on all fours with the controversy herein referred to. A condensed history of the Tuolumne case was as follows: Mrs. Rosasco owned about 2,000 acres of land in Tuolumne County, in which she resided, and which land constituted the "home ranch." She also owned another ranch of about 500 acres in Stanislaus County. She was also the owner of some 300 head of cattle, which for several months prior to the 2d day of March, 1901, had been pastured on the "home ranch" in Tuolumne County. On that day the owner caused 230 head of said cattle to be driven from the "home ranch" in Tuolumne County to the lands in Stanislaus County, and these cattle were in the last named county on the first Monday in March at 12 o'clock m., and continued to be pastured there until the first of the following April, when they were driven back to the "home ranch."

None of these cattle were listed or described in any statement given by the owner to the assessor of either county for assessment purposes for that year. The assessor of Tuolumne County, however, made an assessment thereon. The tax was paid under protest, and thus went into court. The Supreme Court affirmed the lower court, which had sus-

tained the assessment in Tuolumne County. The lower court found as a matter of fact that the 230 head of cattle were driven from Tuolumne County into Stanislaus County for the purpose of *temporarily* pasturing the same in the latter county, and further found and concluded as a matter of law, upon this proposition, that grazing stock are assessable, without regard to the residence of the owner, in the county where they are *permanently* reared and kept. There was also a finding by the lower court that the change in the *locus* of the cattle from Tuolumne to Stanislaus County was not made in good faith, but for the purpose of avoiding the taxation of the property in any county.

From an analysis of the case it seems conclusive—

1. The actual situation of personal property (as to county) does not necessarily control the assessment.
2. The residence or domicile of the owner of the property does not control the assessment, as to the county.
3. Live stock must be assessed in the county in which it is *permanently* kept and pastured, and not in the county where it is *temporarily* kept or pastured.

But as before stated the facts in the Trinity-Tehama case vary considerably from the Tuolumne case, and as the Trinity stockmen have paid their taxes on the Tehama assessment under protest, we may have the question legally settled within a short time.

QUESTION ON ASSESSMENT OF SOLVENT CREDITS.

The assessor of Glenn County, when assessing the Bank of Willows in 1907 for its solvent credits, concluded that the laws of this State were mandatory that where such credits were secured by mortgage, pledge, or hypothecation of real estate or personal property, the same must be assessed *at their full cash value without deduction for debts* of the owner. The mooted question arose only as to the assessment of solvent credits secured by mortgage or pledge of personal property—such as crop mortgages, hypothecation or pledge of grain in warehouse, warehouse receipts, or mortgage of other personal property permissible by law—and not to any case when real estate was the security. The bank claimed the right to deduct from its sum total of credits (excepting, of course, those credits secured by mortgage on real estate) its debts, including sums due depositors and due other banks and bankers. The Glenn County assessor followed literally Rule IX of this board, adopted and promulgated some twenty-five years ago, and which reads as follows:

RULE IX.

Banking corporations, and all banks and banking firms or associations, or persons doing a banking business, must be assessed for the full amount of money, gold dust, or bullion on hand (except the special deposits mentioned in Rule VIII); and,

in addition thereto, under the head of solvent credits, all their loans, and all solvent credits due them which are secured by mortgage or other lien upon real or personal property, must be assessed at the full cash value thereof, without any deduction on account of any indebtedness, and notwithstanding the creditors (or depositors, as they are commonly called) of such corporations, banks, banking firms, associations, or persons, may have been, or may be liable to be, assessed for their said deposits or credits, as solvent credits due them. With respect to such solvent credits as are not secured in the manner above stated, the excess of the same over the amount of the same party's indebtedness which is not secured in the manner above stated, only is to be assessed. You are specially instructed that in case of savings and loan corporations, where the depositors in such institutions are not assessed for their deposits or "solvent credits," you will not permit such corporations to deduct from their statement of "solvent credits," *i. e.*, the unsecured debts due them, the amount due by them to their depositors as "debts due bona fide residents." They are not entitled to such deduction. You will assess such corporations for the full amount of their "solvent credits."

After the assessment the assessor appealed to this Board for advice, and we thereupon laid the matter before the Attorney-General for an opinion. That learned officer held as his opinion that the banks' contentions were correct, and that said Rule IX of this Board was in conflict with law. But the Glenn assessor decided to test the matter in the courts, and made the assessment in accordance with his view of the law and as interpreted by this Board in said Rule IX. The bank thereupon paid the full amount of the tax so assessed, and commenced an action in the Superior Court of Glenn County for a determination of the assessment and to recover the portion of the tax alleged to have been illegally collected. The bank had judgment in the lower court, and the case is now on appeal to the Supreme Court. The question at issue is a vital one, and if the Glenn assessor can be sustained, it means an addition to the assessment roll of the several counties of hundreds of thousands of dollars. This Board holds strong views favorable to the legality of Rule IX, but as the Attorney-General holds views adverse to ours, and as the matter is in a fair way to be judicially settled, we refrain from further comment.

RAILROAD REHEARINGS.

The Pacific Coast Railway was assessed in 1907 by this Board for \$458,670, and the Pullman Company for \$1,625,527, an increase over the 1906 assessment of \$149,025 for the former and of \$1,025,527 for the latter. Both companies entered a protest against such assessments, and filed applications for equalization and reduction thereof. The matters came on regularly to be heard, but after a full and fair investigation the Board felt satisfied that no injustice had been done and refused to decrease or change the assessments as made. It may be here admitted, however, as regards the Pacific Coast Railway, that subsequent to the 1907 assessment the Board entered into a critical examination of said railway, particularly as to the earnings and the earning capacity, and

found that the percentage of net earnings to gross was the lowest of any of the roads coming under our jurisdiction; and further, that nearly all the business done by the road (which is a narrow gauge) was in direct competition with a transcontinental standard gauge road. These facts were given consideration in the 1908 assessment.

As to the Pullman Company, this Board has endeavored for years to obtain a report from the company which would give the California earnings thereof, or at least a fair estimate of such earnings, but the company claims that it can not give such information and has always refused and neglected to even approximate such earnings for the Board. As we had adopted the gross earning plan for our assessment of the railroads, we were compelled, therefore, to make an estimate of the earnings on our own initiative. We also examined the records of the assessments heretofore made of this company and found that in no instance had a *franchise* value ever been assessed, and it was patent to us that the company was exercising and owned a valuable franchise right to do business in this State. Therefore, for both years covered by this report said company was assessed with a franchise value.

Upon the denial of a reduction of assessment by the Board, the Pullman Company brought an action in the Federal court to restrain the Controller from extending the taxes upon such assessment, but the company met with defeat in the action. Tax delinquency thereupon ensued, and the Controller brought an action to recover. A history of these tax suits will be found in the report of the Controller.

The assessments for 1908 brought protests, not only from the Pullman Company, but as well from the Southern Pacific Railroad and the Central Pacific Railway, and rehearings were duly granted. The Board, however, deemed that all the roads had received fair treatment; that no assessment had been made beyond that warranted by taking four per cent of the gross earnings as a basis of valuation of physical property and franchise. Again, the Board declined to interfere with the original assessment.

EXPERTING RAILROAD ACCOUNTS.

The Board decided this year to verify the reports of the larger railroads as rendered for the 1908 assessments, and to this end employed a firm of experts in San Francisco, who were perfectly familiar with the accounts, methods, and bookkeeping of railroads. The experts went into the matter of the gross earnings and tax payments of the Southern Pacific Railroad, the Central Pacific Railway, the Atchison, Topeka and Santa Fé Railway, the San Pedro, Los Angeles and Salt Lake Railroad, and the Northwestern Pacific Railroad. In an extended report made to and filed with this Board the experts stated that such reports of the railroads were absolutely correct in the respects mentioned.

COLLECTING STATE POLL TAX.

At the meeting of the State Assessors' Association held in Bakersfield September 22-24, 1908, by a unanimous vote it was decided to ask the ensuing Legislature to extend the time for the collection of the two-dollar State poll tax from the first Monday in July to the first Monday in August. This Board concurs in the recommendation. As pointed out, the assessor and his deputies are kept busy almost every hour between the first Monday in March and the first Monday in July gathering his assessment statements and completing the assessment roll preparatory to turning his roll over to the supervisors on the last date mentioned, and thus have no time to devote to the collection of head-taxes from the transient class. Again, the law is mandatory that the assessor must make demand, either personally or through the mail, for poll taxes, and no one may be returned as delinquent unless such demand shall have been made. If granted the extension, this Board feels that a far greater collection can be made in this respect, and as the entire tax when collected inures solely to the benefit of the State School Fund, legislation should be enacted granting such extension.

COMMISSIONS ON POLL TAX.

There is a growing tendency of late to place the assessors on a straight salary basis, and providing in law that all "fees and commissions" ordinarily received by that officer shall be paid into the county treasury. This is unwise legislation, extremely hurtful to the State's revenues, and should be stopped. It is certainly apparent that the great incentive for this collection is in the commission awarded for its collection, and that without this incentive due diligence will not be exercised to collect the tax.

EQUALIZATION OF ASSESSMENTS.

The duties of the State Board of Equalization in the matter of assessment equalization are such as to excite the antagonism of nearly every property holder in the State, at least in those counties where the delinquencies of assessors call for action of the Board in increasing the rolls of the county.

The strife between counties to keep their assessments down to the lowest notch on account of the State tax is just as much a feature to-day as it has been at any period of the State's history.

It is a cardinal principle of our tax jurisprudence that assessments within the county and throughout the State shall be equal and uniform; yet it is within the certain knowledge of this Board that the percentage of assessed value to actual cash value of property in the several counties varies from, say, twenty-five per cent to eighty per cent.

It is patent to this Board that different species of property within a county, such as country real estate, town lots, and improvements, have each a different percentage of assessed value; that the small land holdings are assessed at a much higher percentage than real estate held in large tracts, and this, too, in the face of the fact that such real estate in both small and large holdings is about of the same character and similarly situated.

Thus is presented the difficult problem by which this Board is confronted when equalization between the counties is determined upon. Under the decision of the Supreme Court in the Wells-Fargo case (September, 1880), this Board was denied the right to equalize assessments within the confines of a county. If equalization is attempted, it must be to increase or lower the entire assessment roll of a county, and under this practice glaring defects in assessments within a county are simply augmented and not rectified. Under the decision in the above case, this Board was shorn of its most potent equalization power, which every Board of Equalization since the adoption of the constitution has declared it was the intention of the framers of the constitution to grant this Board, notwithstanding the decision above referred to. An examination of the decision in the Wells-Fargo case discloses the fact that only four of the judges agree upon the principle "that the Board has no power to increase or lower an individual assessment," while two of the judges expressly agree, and one by his dissent to the opinion of the court impliedly agrees, that the Board has that power. The decision, it seems to us, was given upon technical construction of words rather than upon the justice of the constitutional provision.

In view of the fact that the personnel of our Supreme Court has entirely changed since that decision was handed down, and in view of the further fact that modern revenue legislation, and the decisions of our courts thereon, have entirely changed within recent years, the question arises whether it were better to submit the question again to the Supreme Court, or submit to the people such an amendment to the constitution as will effectually put the question of the power of this Board beyond a doubt. If the Legislature in its wisdom should deem it proper to submit such question to the people in the manner of a constitutional amendment, let us impress upon that body that to attain an approach to equality and uniformity of assessment, the Board should be clothed with the following powers:

First—To increase or lower any assessment on the assessment roll.

Second—To increase or lower the entire assessment of any class of property; as real estate, improvements, or personal property, excepting of course, money, solvent credits, and mortgages.

Third—To increase or lower the assessment of any species of any class of property; as of real estate, city or town lots; of improvements,

improvements on farms, or lots; and of personal property, such as sheep, horses, hogs, etc.

We desire at this point to anticipate the objection which is most likely to be made to the above proposal, and which is that even if the State Board should be clothed with the power to raise or lower individual assessments or assessments of any class or species of property, the time and facilities for investigation at the Board's command would not be sufficient to permit such an examination of the assessment rolls of all the counties in the State as would justify attempts to equalize by this method. In our judgment such an objection possesses much less force than would appear on the first statement of it. For the mere *power* to raise assessments of certain classes of property, or individual assessments, would enable a State Board to work a great improvement in the assessments of many counties, even though the power should be seldom or never exercised. Indeed, we are inclined to think that comparatively few occasions for the exercise of such power would arise, because a simple warning would suffice in nearly all instances to secure action by county assessors to correct any glaring inequalities which might be discovered in their rolls before the completion of the assessment.

As matters now stand, with the State Board possessing no authority except to raise or lower county assessments as a whole, assessors are disposed to pay little heed to suggestions that some property is assessed proportionately too high and other property too low. It is within the knowledge of members of the State Board that in certain counties for years past one or more species of property have been grossly under-assessed as compared with other species of property in the same county; time after time attention has been called to these discrepancies, with little effect in securing a correction of the same. Even in aggravated cases of the kind the State Board is naturally averse to raising a whole county assessment simply because one class or species of property is undervalued, when it is obvious that a horizontal raise will do serious injustice to property owners who are already assessed high enough. But the situation would be very different if the State Board were known to possess the authority to follow up a suggestion by positive action in the event that an assessor should refuse to correct inequalities in his roll to which attention had been invited; almost any assessor would prefer to correct his own roll rather than to have it done for him by the State Board; but in order to insure this state of affairs it is necessary for the Board to possess an authority which it may exercise if necessity should arise, improbable though it be that occasion for such exercise would arise save in very exceptional instances.

If in this connection it should be urged that to confer upon the State Board the power to equalize assessments within a single county, as well

as between different counties, is a move toward centralization of assessment for tax purposes, it may be frankly admitted that such is the case. Moreover, it can be stated unhesitatingly that the whole tendency in the most advanced states is toward a larger degree of centralization of the work of assessment. It is brought about by natural and inevitable changes in economic conditions. Thirty years ago the framers of the present constitution of California recognized the beginning of these changes when they provided for State instead of local assessment of railroads, because they knew that a great railroad system operating in many counties can not be adequately assessed by a number of local assessors, each restricted to consideration of what property he could find in his own county; and even before the constitution of 1878-79 the Legislature had attempted to create a State Board of Equalization with authority to equalize county assessments. This act was a move toward centralization, because it was an attempt to confer on a State body supervisory authority over the action of county assessors and county boards of equalization which theretofore had been supreme in all assessment matters.

During the thirty years since the adoption of the constitution great changes in certain lines of industry have been in progress, and railroads are no longer the only class of corporations whose business has become so much delocalized that proper assessments can no longer be made by county assessors. Electric power lines, pipe lines, telegraph and telephone lines, and the business of express companies and insurance companies present examples of assessable values which can best be treated as a whole and not piecemeal. The argument for centralized assessment, or at least centralized supervision of assessments, applies with particular force to the assessing of the franchises of large corporations. Our present constitution and laws contemplate the assessment of such franchises as being an important part of the property of the corporations possessing them, and the Supreme Court has laid down a rule to follow in making valuations, but experience shows that county assessors are at so much disadvantage in assessing franchises where companies do business in many counties that no kind of uniformity or even ordinary justice can be expected. A given corporation having its principal place of business in a certain county will be assessed for millions on its franchise, while another corporation possessing a franchise of equal or greater value, but having its principal place of business in a different county, will escape with a franchise assessment of merely a few thousand dollars, or perhaps none at all. Such inequalities as these rise to the magnitude of crying evils, and under the existing system there is no way to remedy them.

The present Board, having within its knowledge almost indisputable facts relative to the glaring and unjust differences in the equality and

uniformity of assessment as between the counties, refrained from exercising its prerogative to increase or lower the county rolls, believing that the people would see the wisdom of separating the State revenues from those of the county, as was proposed in the rejected Senate Constitutional Amendment No. 1, and thereby do away with the necessity for equalization. But the people have negatively ruled on the proposition. The best piece of legislation that has been offered the people since the State was organized has, through a lack of knowledge of its beneficent qualities, been cast aside, and we are thrown back on the old system, at least for the time being. Therefore, it devolves upon this Board to *equalize*. We propose to enter upon a campaign of information, and to that end, by expert testimony, and by every other available means, establish what we believe to be the percentage of assessed value to actual cash value in the several counties, and make an attempt to place the counties on a plane of equality, at the same time admitting that as we are confined to the power alone to increase or lower the entire assessment roll, we shall be doing injustice to the individual and species of property already properly assessed. But at the same time we will be compelling those delinquent counties to share their just proportion of the State tax.

It occurs to us that the necessity for the employment of this somewhat inequitable means to establish equity would be minimized if the Legislature could be induced to go as far as the present constitutional limitations will permit it to go in aiding the State Board to exercise a regulative and supervisory control of the work of county assessors. Since equalization by the raising or lowering of entire counties is open to such serious objection, it is better to accomplish the same result, so far as it may be done, through exchange of information by members of the State Board and county assessors and by friendly criticism of the work of the latter.

We would not have it understood from anything contained in this report that in the opinion of the State Board the great majority of county assessors are not endeavoring to perform their duties conscientiously and in the spirit of the law; on the contrary, we believe that this very thing is the aim of most assessors, and many of them are men of superior ability and long experience. But the conditions by which they are surrounded and their work affected are oftentimes adverse to the accomplishment of such results as the assessors themselves would like to achieve if they felt perfectly free to act as their judgment would dictate.

Another disadvantage under which assessors quite generally labor is that of insufficient knowledge of what other assessors in other counties are doing with respect to the valuation of different kinds of property, and this lack of trustworthy information is bound to affect the totals

of many assessments so long as there continues the very prevalent fear on the part of each community that it is being assessed higher than other communities. County assessors themselves realize this, and by voluntary action they have established a State association of assessors, at whose meetings some of the vexed problems of assessment are talked over and much benefit gained from the exchange of views.

But these meetings are not so generally attended as they should be, nor are the discussions so businesslike and productive of mutual benefit as they would be if the State Board of Equalization were authorized by law to call the assessors together, and to assume general direction of the proceedings. This latter plan of procedure has been adopted in Indiana, and possibly in other States as well, with the effect of greatly improving the character of assessment work and bringing valuations nearer to a common level in all of the counties.

In order that the best results might be realized from the holding of conferences of assessors under the direction of the State Board of Equalization, the attendance on the part of assessors, as well as of members of the State Board, should be rendered compulsory; the payment of actual traveling expenses should be made either a State or a county charge; and, also, the State Board should be authorized to incur necessary incidental expense to secure such data relative to property values as would be of most assistance to the assessors in their work. There might also be arranged a system of reports by which the State Board could keep in touch with the work of the different county assessors during the making of the assessment. The necessary expense need not be very great, and naturally the amount which could be expended for these purposes would be strictly limited by the Legislature. Every dollar expended in the way here proposed would be returned many fold through the medium of a larger total assessment roll, but the greatest advantage of all would be that the tendency would be to make assessments everywhere more just and equitable.

SUGGESTED CHANGES IN THE LAW.

We would respectfully recommend that the law be so amended as to permit this Board to hold meetings and transact certain of its functions in places other than in the State capital. Emergency cases often arise demanding the immediate attention and orders of the Board, but which, under existing laws, can be transacted only at a meeting to be held in Sacramento.

The power of this Board in the way of issuing subpoenas and compelling the attendance before it of persons to give testimony and submit books and papers should be enlarged. Under the present law our powers in this respect are doubtful. There should also be granted to

this Board definite power to employ expert accountants, who should be endowed by law with the usual authority and power possessed by experts appointed in judicial proceedings.

CONSTITUTIONAL AMENDMENTS.

The Legislature of 1907 submitted to the people two constitutional amendments in which this Board was much interested. One was Senate Constitutional Amendment No. 1, relating to the taxation of public service corporations, and generally to separating the State revenues from those of the county. The other was Senate Constitutional Amendment No. 26, relating to the assessment of mortgages. At the time of closing this report to be sent to the printer, it is known that the former amendment was defeated at the recent election, but the fate of the latter is not yet known.

Respectfully submitted.

ALEX. BROWN, Chairman,
R. E. COLLINS,
JEFF McELVAINE,
J. HARRY SCOTT,
A. B. NYE,
State Board of Equalization.

T. M. EBY, Secretary.

DETAILED STATEMENT

Of the Manner in which the Appropriation for Postage, Expressage, Telegraphing, and Contingent Expenses, of the State Board of Equalization was Expended for the Fifty-eighth Fiscal Year, ending June 30, 1907

1906.

REPORT OF STATE BOARD OF EQUALIZATION.

DETAILED STATEMENT—*Continued.*

1908.		
June 16	Subscription, law journals, to June 30, 1908	\$9 00
	Rubber stamps	2 25
	Towel service to June 30, 1908	3 00
	Cleaning letter scale	2 00
	Telephone, June rental	2 90
	Telephone, May switching	2 00
	Expressage, May service	30
	Telegraphing, May service	1 05
		<hr/> \$22 50
		<hr/> \$363 80

The following bills accrued in the fifty-ninth fiscal year and were paid in the sixtieth fiscal year:

1908.		
July 1	Expressage, June service	\$1 91
	Telegraphing, June service	80
		<hr/> \$2 71
July 9	Copy, Poor's Manual of Railroads	\$10 00
	Money order	08
		<hr/> 10 08
July 15	Shelving for office	21 00
		<hr/> \$33 79

I, T. M. Eby, Secretary of the State Board of Equalization, do hereby certify that the foregoing is a true and correct statement, in detail, of the manner in which the appropriation for postage, expressage, telegraphing and contingent expenses was expended, vouchers for all of which are on file with the State Controller.

T. M. EBY.

Subscribed and sworn to before me this 17th day of August, 1908.

ALEX. BROWN,
Chairman, State Board of Equalization.

VALUATIONS AND RATES OF TAXATION—1907.

SCHEDULE A.

Showing Amount of Property upon which the State Rate of Taxation was Based, and the Rate for 1907.

Value returned by Auditors	\$1,765,906,547	
Railroad assessments by Board	113,822,216	
Amount upon which tax is based	\$1,879,728,763	

Amount to be Raised for Fifty-ninth Fiscal Year.

		Rate.
General Fund	\$4,030,000	22.6
School Fund	3,086,419	17.3
High Schools Fund	320,925	1.8
Interest and Sinking Fund	141,435	.8
University Fund		2.0
Totals	\$7,578,779	44.5

SCHEDULE B.

Showing Number of Acres Assessed, as per Auditors' Statements, and Valuation of Real Estate and Improvements, for 1907.

Counties.	Acres Assessed.	Value of Real Estate other than City and Town Lots.	Value of City and Town Lots.	Value of All Real Estate.	Value of Improvements on Real Estate other than City and Town Lots.	Value of Improvements on City and Town Lots.	Value of All Improvements.

* No information.

NOTE.—This table is of no great value, and is added to the report solely to comply with the law. The figures given are almost wholly unreliable. In many counties for several years the assessors have arbitrarily refused to assess mortgages, unless requested to do so by one of the parties to the instrument. Also, since the constitutional change of 1906, relative to payment of taxes on mortgages, nearly all such instruments are now written net as to interest. However, the constitution and statutory law still require the assessment of all mortgages.

SCHEDULE E.

Showing Assessment and Apportionment of Railways for 1907.

Name of each Railway Assessed, and Name of the County to which Assessment is Appor- tioned.	Number of Miles of Railway Operated in the State	Number of Miles of Railway in each County— Main line. SCHEDULE K.

Extracts from reports of Railways to the State Board of Equalization for 1907 assessment purposes, showing Gross Earnings from Operation, Operating Expenses, Deductions, Surplus, Deficit, etc.

SOUTHERN PACIFIC RAILROAD COMPANY.

(Report to June 30, 1906)

Gross earnings from operation		\$35,169,744 28
Operating expenses:		
Maintenance of way and structures	\$6,009,690 10	
Maintenance of equipment	5,164,831 51	
Conducting transportation	9,026,385 59	
General expenses	1,816,772 53	
Total operating expenses		22,017,679 73
Net income from operation		\$13,152,064 55
Dividends on stocks owned	\$18 52	
Miscellaneous income	1,671,320 01	
Rentals	10,000 00	
Income from other sources		1,681,338 53
Total net income		\$14,833,403 08
Interest on funded debt, accrued	\$5,732,381 00	
Betterments and additions	1,715,359 47	
Other deductions	2,197,070 64	
Salaries and maintenance of organization	21,377 34	
Total deductions from income		9,666,188 45
Surplus		\$5,167,214 63
Dividends, 2% common stock		3,200,000 00
Surplus from operation, year ending June 30, 1906		\$1,967,214 63

CENTRAL PACIFIC RAILWAY COMPANY.

(Report to June 30, 1906.)

Gross earnings from operation		\$23,953,201 95
Operating expenses:		
Maintenance of way and structures	\$3,088,842 70	
Maintenance of equipment	3,480,535 10	
Conducting transportation	6,996,795 69	
General expenses	1,360,398 18	
Total operating expenses		14,926,571 67
Net income from operation		\$9,026,630 28
Rentals	\$10,000 00	
Miscellaneous income	598,390 85	
Steamers, net earnings	1,845,710 21	
Income from other sources		2,454,101 06
Total net income		\$11,480,731 34
Interest on funded debt, accrued	\$4,100,850 01	
Interest on 3% notes to United States of America	588,127 20	
Betterments and additions	1,308,977 54	
Other deductions	797,020 95	
Salaries and maintenance of organization	10,027 50	
Total deductions from income		6,805,003 20
Surplus		\$4,675,728 14
Dividends, 3% common stock	\$2,018,265 00	
Dividends, 4% preferred stock	524,000 00	
Total dividends		2,542,265 00
Surplus from operation, year ending June 30, 1906		\$2,133,463 14

SOUTH PACIFIC COAST RAILWAY COMPANY.

(Report to June 30, 1906.)

Gross earnings from operation		\$700,836 28
Operating expenses:		
Maintenance of way and structures	\$285,670 55	
Maintenance of equipment	126,348 48	
Conducting transportation	394,501 08	
General expenses	53,019 16	
Total operating expenses		859,539 27
Deficit		\$158,702 99
Interest on funded debt, accrued	\$220,000 00	
Betterments and additions	181,942 02	
Losses in San Francisco fire, April, 1906	1,470 48	
Rentals, other property and facilities	7,750 49	
Steamers, deficit from operation	19,915 19	
Total deductions from income		431,078 18
Deficit from operation, year ending June 30, 1906		\$589,781 17
Payment by lessee		\$589,781 17

NEVADA AND CALIFORNIA RAILWAY COMPANY.

(Report to June 30, 1906.)

Gross earnings from operation		\$1,262,935 31
Operating expenses:		
Maintenance of way and structures	\$333,622 68	
Maintenance of equipment	136,761 28	
Conducting transportation	317,768 71	
General expenses	49,977 33	
Total operating expenses		838,130 00
Net income from operation		\$424,805 31
Miscellaneous income—interest on open accounts		8,784 62
Total net income		\$433,589 93
Interest on funded debt, accrued	\$80,000 00	
Betterments and additions	141,298 91	
Other deductions	2,677 15

Interest on funded debt, accrued		3,750 00
Surplus from operation, year ending December 31, 1906		\$11,362 71

YOSEMITE VALLEY RAILROAD COMPANY.

*(IN COURSE OF CONSTRUCTION.)**(Report to December 31, 1906.)*

Gross earnings from operation		\$20,216 75
Operating expenses:		
Maintenance of equipment	\$13,236 40	
Conducting transportation	24,848 90	
General expenses	7,341 30	
Total operating expenses		45,426 60
Deficit from operation, year ending December 31, 1906		\$25,209 85

NORTHERN ELECTRIC COMPANY.

*(IN COURSE OF CONSTRUCTION.)**(Report to December 31, 1906.)*

Gross earnings from operation		\$99,315 28
Operating expenses:		
Maintenance of way and structures	\$6,609 05	
Maintenance of equipment	11,480 42	
Conducting transportation	37,475 36	
General expenses	5,738 61	
Total operating expenses		61,303 44
Net income from operation		\$38,011 84

THE PULLMAN COMPANY.

(Report as of March 4, 1907.)

Recapitulation showing percentage of and value of sleeping cars, awarded to California in report of said company, 1907 assessment.

Railroads, Cars and Lines.	Standard.	Value.	Tourist.	Value.	Total Value.
Atchison, Topeka and Santa Fé: sleeping cars; local lines-----	4.522	\$22,610 00	.250	\$375 00	\$22,985 00
Atchison, Topeka and Santa Fé: sleeping cars; interstate lines..	12.984	64,920 00	10.512	15,768 00	80,688 00
San Pedro, Los Angeles and Salt Lake: sleeping cars; local lines-----					
San Pedro, Los Angeles and Salt Lake: sleeping cars; interstate lines-----	3.084	15,420 00	2.843	4,264 50	19,684 50
Southern Pacific: sleeping cars; local lines-----	17.880	89,400 00	3.625	5,437 50	94,837 50
Southern Pacific: sleeping cars; interstate lines-----	34.955	174,775 00	26.473	39,709 50	214,484 50
Southern Pacific: parlor cars; local lines-----	9.688	48,440 00			48,440 00
	83.113	\$415,565 00	43.703	\$65,554 50	\$481,119 50

NOTE.—The Pullman Company returned as the average value, standard \$5,000 and tourist \$1,500.

VALUATIONS AND RATES OF TAXATION—1908.

SCHEDULE L.

Showing Amount of Property upon which the State Rate of Taxation was Based, and the Rate for 1908.

Value returned by Auditors	\$1,874,856,441
Railroad assessments by Board	116,698,162
Amount upon which tax is based	<u>\$1,991,554,603</u>

Amount to be Raised for Sixtieth Fiscal Year.

		Rate.
General Fund	\$3,630,000	19.2
School Fund	3,086,419	16.3
High School Fund	320,925	1.7
Interest and Sinking Fund	151,435	.8
University Fund	-----	2.0
Totals	<u>\$7,188,779</u>	<u>40.0</u>

SCHEDULE M.

Showing Number of Acres Assessed, as per Auditors' Statements, and Valuation of Real Estate and Improvements, for 1908.

Counties.	Acres Assessed.	Value of Real Estate other than City and Town Lots.	Value of City and Town Lots.	Value of All Real Estate.	Value of Improvements on Real Estate other than City and Town Lots.	Value of Improvements on City and Town Lots.	Value of All Improvements.

Sinking fund installments	30,000 00	
Total deductions from income		112,130 02
Deficit from operation, year ending December 31, 1907		\$74,122 51

NEVADA COUNTY NARROW GAUGE RAILROAD COMPANY.

(Report to December 31, 1907.)

Gross earnings from operation		\$129,067 92
Operating expenses:		
Maintenance of way and structures	\$19,887 24	
Maintenance of equipment	14,747 53	
Conducting transportation	36,117 73	
General expenses	11,906 03	
Total operating expenses		82,658 53
Net income from operation		\$46,409 39
Miscellaneous income		464 95
Total net income		\$46,874 34
Interest on funded debt, accrued	\$14,910 00	
Betterments and additions	28,006 29	
Bonds redeemed	6,000 00	
Total deductions from income		48,916 29
Deficit from operation, year ending December 31, 1907		\$2,041 95

NORTHERN ELECTRIC RAILWAY.

(Report to December 31, 1907.)

Gross earnings from operation		\$373,669 74
Operating expenses:		
Maintenance of way and structures	\$29,115 76	
Maintenance of equipment	45,349 99	
Electric equipment	8,924 32	
Conducting transportation	150,254 78	
General expenses	32,799 95	
Total operating expenses		266,444 80
Net income from operation		\$107,224 94
Interest on funded debt, accrued		85,237 50
Surplus from operation, year ending December 31, 1907		\$21,987 44

TONOPAH AND TIDEWATER RAILROAD COMPANY.

(Report to December 31, 1907.)

Gross earnings from operation		\$172,766 69
Operating expenses:		
Maintenance of way and structures	\$28,731 18	
Maintenance of equipment	25,497 74	
Conducting transportation	91,325 29	
General expenses	6,338 54	
Total operating expenses		151,892 75
Net income from operation		\$20,873 94
Miscellaneous income		9,989 14
Total net income		\$30,863 08
Interest on funded debt, accrued (one month only)		13,994 27
Surplus from operation, year ending December 31, 1907		\$16,868 81

PAJARO VALLEY CONSOLIDATED RAILROAD COMPANY.

(Report to December 31, 1907.)

Gross earnings from operation		\$54,568 49
Operating expenses:		
Maintenance of way and structures	\$14,388 78	
Maintenance of equipment	10,839 71	
Conducting transportation	16,505 29	
General expenses	17,961 46	
Total operating expenses		59,695 24
Deficit from operation, year ending December 31, 1907		\$5,126 75

YOSEMITE VALLEY RAILROAD COMPANY.

(Report to December 31, 1907.)

Gross earnings from operation		\$138,133 39
Operating expenses:		
Maintenance of way and structures	\$14,155 13	
Maintenance of equipment	27,945 26	
Conducting transportation	62,593 02	
General expenses	9,262 81	
Total operating expenses		113,956 22
Net income from operation		\$24,177 17
Interest on funded debt, accrued	\$75,000 00	
Interest on interest-bearing current liabilities, accrued	29,521 61	
Other deductions	2,984 67	
Total deduction from income		107,506 28
Deficit from operation, year ending December 31, 1907		\$83,329 11

LAKE TAHOE RAILWAY AND TRANSPORTATION COMPANY.

(Report to December 31, 1907.)

Gross earnings from operation		\$54,287 38
Operating expenses:		
Maintenance of way and structures	\$10,435 56	
Maintenance of equipment	3,462 05	
Conducting transportation	19,640 29	
General expenses	9,238 08	
Total operating expenses		42,775 98
Net income from operation		\$11,511 40
Interest on funded debt, accrued	\$16,250 00	
Interest on interest-bearing current liabilities, accrued	2,552 28	
Total deductions from income		18,802 28
Deficit from operation, year ending December 31, 1907		\$7,290 88

SAN JUAN PACIFIC RAILWAY COMPANY.

(Report to December 31, 1907.)

Gross earnings from operation		\$5,076 27
Operating expenses:		
Maintenance of way and structures	\$57 45	
Maintenance of equipment	49 72	
Conducting transportation	2,679 75	
General expenses	550 30	
Total operating expenses		3,337 22
Net income from operation		\$1,739 05
Interest on interest-bearing current liabilities, accrued		2,680 88
Deficit from operation, year ending December 31, 1907		\$941 83

THE PULLMAN COMPANY.

(Report as of March 2, 1908.)

Recapitulation showing percentage of and value of sleeping cars, awarded to California in report of said company, 1908 assessment.

Railroads, Cars and Lines.	Standard.	Value.	Tourist.	Value.	Total Value.
Atchison, Topeka and Santa Fé: sleeping cars; local lines-----	2.000	\$15,800 00	-----	-----	\$15,000 00
Atchison, Topeka and Santa Fé: sleeping cars; interstate lines-----	15.748	124,409 20	10.632	\$51,033 60	175,442 80
San Pedro, Los Angeles and Salt Lake: sleeping cars; local lines-----	-----	-----	-----	-----	-----
San Pedro, Los Angeles and Salt Lake: sleeping cars; interstate lines-----	4.251	33,582 90	2.759	13,243 20	46,826 10

REPORT OF THE ATTORNEY-GENERAL.

SACRAMENTO, September 15, 1908.

*To His Excellency, JAMES N. GILLETT,
Governor of California, Sacramento, California.*

SIR: In compliance with law, I transmit herewith a report of the business of this office for the two years ending September 15, 1908.

The work of this office may, in a general way, be classified as, (1) civil litigation for the State, its several officers, boards, commissions, and municipal subdivisions; (2) criminal cases in the appellate courts; (3) opinions.

A detailed report of civil litigation, and of criminal cases in the appellate courts, will be found in following pages of this report.

The business of this office, in all lines, is rapidly increasing. A striking instance of this increase is found in the civil litigation. During the two years ending September 15, 1904, there were commenced seventy-two civil cases, in which it was the duty of this office to appear. During the two years ending September 15, 1906, there were commenced one hundred and three civil cases in which it was the duty of this office to appear, while during the two years covered by this report, I have appeared in one hundred and fifty-four new civil cases. During such period one hundred and forty-one civil cases have been finally disposed of, leaving at this date one hundred and ten pending.

Fortunately, criminal appeals have not shown a corresponding increase. During the two years prior to September 15, 1906, one hundred and fourteen criminal appeals had been taken, while during the last two years one hundred and seventeen appeals have been filed. At the date of my last report there were pending undisposed of in the appellate courts thirty-three criminal cases, which, added to the one hundred and seventeen new appeals, makes a total of one hundred and fifty. In nine criminal cases decided by the District Courts of Appeal petitions that such cases be heard and determined by the Supreme Court were granted, and such cases subsequently decided by that court.

The following table shows the results of all appeals determined :

	Supreme Court.	First District.	Second District.	Third District.	Totals.
In favor of people	16	27	23	26	92
In favor of defendants	4	10	8	5	27
Total decided	20	37	31	31	119
Number pending	10	14	9	7	40
Totals reported	30	51	40	38	159

It is thus seen that of the one hundred and ten cases finally disposed of, in twenty-two the judgments were reversed and in eighty-eight the judgments affirmed. Of the cases decided by the appellate courts eighty per cent have been affirmed and twenty per cent reversed. Of the forty criminal appeals now pending, all but seven are under submission or are fully briefed and ready for submission.

In a large number of cases pending at the date of my last report the records had been destroyed by the fire of April 18, 1906. I was able to restore the records in such cases, and they have all been finally disposed of.

In two criminal cases writs of error to the United States Supreme Court have been granted, and such cases are now pending in that court.

Thirty-one murder cases have been decided by the appellate courts, resulting in twenty-six affirmances and five reversals.

From the reports of the several District Attorneys, a tabulation of which is given in later pages of this report, it appears that they have handled three thousand and forty-nine felony cases, and that two thousand six hundred and seventy-eight defendants were convicted or pleaded guilty, while three hundred and seventy-one were acquitted.

OPINIONS, ETC.

Within the past two years I have rendered to the various officers, boards, and commissions, and to the several District Attorneys of the State, three hundred and sixty-five written opinions. In these opinions it has been the endeavor to cover the subjects treated of fully, and to give at length the authorities upon which the conclusions reached were based.

In this connection we have examined abstracts of title of lands which the State desired to purchase, and have examined and passed upon the legal sufficiency of every contract for the erection of buildings and the furnishing of supplies to State institutions.

During this period there has been an unusually large number of such contracts, because of the damage to and destruction of various State buildings, resulting from the fire and earthquake of 1906, and under such contracts more than a million dollars have been expended in constructing new buildings and in reconstructing old ones.

I have also examined the abstracts of proceedings of the various bond issues upon which the bid of the State has been accepted.

The following table shows the issues approved and purchased by the State during this period:

Name.	Date of Issue.	Amount.	Rate per cent.	Net Rate.
San José High School	Jan. 1, 1907	\$175,000 00	4	3.952
San José School District	Jan. 1, 1907	225,000 00	4	3.952
San Benito High School	Oct. 2, 1907	45,000 00	4½	4.50
Lake County Refunding	Oct. 7, 1907	37,000 00	5	5.00
Roeding School District, Fresno County	July 12, 1907	10,000 00	5	5.00
Santa Clara Water, Light and Power	May 1, 1907	21,000 00	4½	4.50
Los Angeles Water Works	Dec. 1, 1907	510,000 00	4	4.00
Plumas County Bridge and Highway	Oct. 1, 1907	100,000 00	4	4.00
Capital School District, Sacramento County ..	Jan. 21, 1908	32,000 00	4½	4.50
Oroville Levee	July 15, 1908	60,000 00	4	4.00
Livermore Sewer	July 1, 1908	25,000 00	4½	4.50
Fairfield Sewer	Oct. 1, 1907	20,000 00	5	5.00
Sacramento Sewer	July 1, 1908	200,000 00	4	4.00
San Buenaventura Municipal	June 1, 1908	27,600 00	5	4.50
Belvedere Municipal	Sept. 1, 1908	36,000 00	4½	4.50
Duarte School District, Los Angeles County ..	Aug. 10, 1908	15,000 00	5	4.50
Lone Tree School District, Shasta County	July 9, 1908	3,500 00	6	5.00
Sacramento Levee	July 1, 1908	75,000 00	4	4.00
Porterville School District, Tulare County	Aug. 1, 1908	25,000 00	5	4.50
Eureka School District, Humboldt County	Sept. 1, 1908	15,000 00	4½	4.50
Total		\$1,657,100 00		

INSURANCE MATTERS.

In my last report attention was called to the necessity of a revision of the insurance laws of the State. The Legislature of 1907 completely revised such laws. This act took effect on March 8, 1907, and the experience of the eighteen months since its adoption has proven that it fairly effects the purposes intended. The adjustment of the new act to the insurance business of the State has thrown upon this office a vast amount of additional work, requiring practically the entire time of one member of the office force. Since this act went into effect the office has passed upon innumerable papers, bonds, documents, charters, etc., presented to the Insurance Commissioner, and in this connection, during the eighteen months since such act went into effect, we have furnished to the Insurance Commissioner five hundred and sixty-four written opinions and reports, in addition to the official opinions heretofore mentioned. Added to this are many consultations with the Insurance Commissioner and representatives of various insurance companies.

While the act, in the main, appears to be operating successfully, there is one feature to which especial attention should be called. It was found that the Commercial Union Assurance Company, a foreign corporation, carrying on its insurance business in this State, had, on its motion, transferred causes commenced against it in the courts of this

State to the Federal court. Acting under the provisions of section 595 of the Political Code and its amendments, the Insurance Commissioner declined, because of such transfer, to issue to said Commercial Union Assurance Company a new certificate of authority to transact business in this State for the year 1907.

The section of the Political Code referred to originally provided that upon a transfer of a cause by an insurance company from the State to the Federal courts, the right of such company to transact business in this State should cease and determine, and it was made the duty of the Insurance Commissioner to immediately revoke the certificate of authority of such company. That section became section 608 of the Political Code in the act heretofore referred to, taking effect March 8, 1907, and in that act was so amended as to omit therefrom the provision that the right of the company so transferring a cause to transact business in this State shall cease and determine upon such transfer, but in its amended form retained that portion of the original section, making it the duty of the Insurance Commissioner to revoke the certificate of authority of such company.

Upon the refusal of the Insurance Commissioner to issue to such company a certificate of authority for the year 1907, the company sued out a writ of mandate against the Insurance Commissioner to compel the issuance of such certificate. It was contended on behalf of the Insurance Commissioner that his action was proper, and that a company whose certificate of authority had been revoked because of a transfer of an action from the State to the Federal court was thereafter ineligible to receive a certificate of authority. The trial court upon a hearing directed the issuance of the writ, and from that judgment an appeal was prosecuted to the District Court of Appeal, First District, and that court held that as the statute provided for the issuance of an annual certificate of authority, the power of the Insurance Commissioner was exhausted upon the revocation of the certificate in force during the year that the transfer was made, and that the company's ineligibility continued only until the first day of July following the date of such revocation; that upon the first day of July a new period began, and that the company was not disqualified to receive a new certificate of authority on that date, because of its action in transferring a cause prior thereto.

From this decision it follows that though a foreign insurance company may transfer from the State to the Federal court any number of causes during any one year, it can be debarred from doing business in this State through the revocation of its certificate of authority for such period only as lies between the date of revocation and the first day of July following, and notwithstanding the transfer of one or many causes

the company so transferring will be entitled to a new certificate on the first day of July following such transfer.

I think it clear the Legislature intended no such result, and it is respectfully suggested that the law should be so amended as to deprive any foreign insurance company that transfers an action commenced against it in the State courts upon an insurance policy, to the Federal court, of the right to ever again transact business in this State.

LEAVE TO SUE.

During the period covered by this report, under section 803 of the Code of Civil Procedure, twenty-four applications have been made to this office for leave to sue in the name of the People, in *quo warranto* proceedings. Of these, fourteen have been granted and ten refused.

In this connection, attention is respectfully called to the suggestion made in my last report, to the effect that the power to grant leave to sue in *quo warranto* should, by appropriate legislation, be taken from this office and vested in the courts. I can conceive of no good reason why this power should be vested in this office, rather than in the court having jurisdiction to try the case, in the event that the application for leave to sue be granted.

The present law imposes upon this office the exercise of a judicial function which should be exercised by the courts alone.

CIVIL ACTIONS.

The present status of the one hundred and ten civil cases now pending, and the result of the one hundred and forty-one civil cases disposed of during the past two years, is shown in succeeding pages of this report.

BANKS.

Under the provisions of the banking act, during the last two years, upon reports made to me by the Bank Commissioners, I have proceeded against fourteen banking concerns. In eleven of these receivers were appointed, and the same are now in process of liquidation; in two all liabilities were paid, and, as a result, the actions dismissed. The remaining one has not yet reached trial.

It is worthy of consideration that these institutions were all commercial banks, though many of them carried savings deposit. It will be remembered that the present law permits officers and directors of commercial banks to become the borrowers of bank funds and deposits. The condition of the affairs of the several banks proceeded against has shown that the practice of loaning money to directors and officers has been one of the chief causes of bank failures.

Section 578 of the Civil Code provides that:

"No director or officer of any savings and loan corporation must, directly or indirectly, for himself or as the partner or agent of others, borrow any of the deposits or other funds of such corporation, nor must he become an indorser or surety for loans to others, nor in any manner be an obligor for moneys borrowed of or loaned by such corporation."

In my judgment a similar provision applicable to commercial banks should be adopted, and appropriate penalties provided for its violation.

RAILROAD RATE INVESTIGATION.

In accordance with suggestions made in a communication addressed by me to the Board of Railroad Commissioners, of date January 16, 1908, calling attention to the charges of discriminations practiced by the various railroads of the State, that Board passed the following resolutions:

"*Resolved*, That the Board of Railroad Commissioners hold an investigation as to alleged discriminations in freight rates and transportation facilities, between intrastate shippers, upon the part of the Southern Pacific Company on the 12th day of February, 1908.

"*Resolved*, That the Board of Railroad Commissioners hold an investigation as to alleged discriminations in freight rates and transportation facilities, between intrastate shippers, upon the part of the Atchison, Topeka and Santa Fe Railway Company, said hearing and investigation to be held in Los Angeles.

"*Resolved*, That the Board of Railroad Commissioners hold an investigation as to alleged discriminations in freight rates and transportation facilities, between intrastate shippers upon the part of the San Pedro, Los Angeles and Salt Lake Railroad Company, said hearing and investigation to be held in the city of Los Angeles."

On March 10, 1908, after a careful examination by this office of the records of the Southern Pacific Company, the Atchison, Topeka and Santa Fe Railroad Company, and the Los Angeles, San Pedro and Salt Lake Railroad Company, the taking of testimony was commenced in the matter of alleged discriminations by the Southern Pacific Company. The taking of testimony consumed many days. Some twenty-two witnesses were examined, and a large number of exhibits of special rates were placed in evidence, and the matter was argued and submitted to

the Railroad Commission for decision on August 15, 1908. The decision of the Commission has not yet been rendered.

On April 6, 1908, a session of the Railroad Commission commenced in the city of Los Angeles for the purpose of taking testimony with respect to discriminations alleged to have been practiced by the Atchison, Topeka and Santa Fe Railroad Company and the Los Angeles, San Pedro and Salt Lake Railroad Company. The taking of testimony there occupied six days, and included oral and written testimony, records of the companies and a comparison of the special rates granted, with published tariff sheets contemporaneously issued by said companies. The two last named cases have not yet been submitted, but will be shortly.

Much difficulty was experienced by this office in the investigations, by reason of these facts; first, the published tariff sheets of the railroad companies concerned had not been preserved; second, an examination of the published tariff sheets on file with the Railroad Commission disclosed that but a small portion of the tariff sheets issued by the several railroad companies had been filed with the Commission; third, that for many years prior to January, 1908, the tariffs promulgated by the various railroad companies had not been adopted as required by the constitution of the State, except in a very few instances, and for this reason had not become the rates established by the Commission, as contemplated by the provisions of the constitution.

We were able, however, to present evidence demonstrating that the published tariffs of the various railroad companies for many years had been deviated from in innumerable instances, and that many shippers had been given special rates lower than the published tariff rate of the railroad company upon shipments originating and consummated within this State.

Prior to these hearings an invitation had been extended by the Commission to all shippers and commercial bodies of the State to attend such hearings, and to aid therein by the presentation of any testimony that they might have respecting these practices. This opportunity was not taken advantage of by any large number of shippers or others interested in transportation questions.

The California Traffic Association, however, did avail itself of this opportunity, and aided in the gathering and presentation of testimony. Its attorney, Mr. O. K. Cushing, attended every session and greatly aided this office in the presentation of the testimony, and the law applicable thereto, and I acknowledge my appreciation of the efforts of the Association and its attorney in this regard.

Under the law as it exists in this State at present, before a transportation company can be found guilty of discrimination, because of the

granting of rates lower than the published tariffs to certain shippers, it must be established that another shipper shipped a like commodity in like quantity between the same points at the published tariff.

In former years the Interstate Commerce Commission was confronted with the same difficulty, and, as a result thereof, the Interstate Commerce Act was amended so as to eliminate the necessity of proving a contemporaneous shipment at published rates, and under that law, as it stands to-day, discrimination is established by proof of a shipment at rates lower than the published tariff.

In my judgment, the legislation on this subject should be framed upon the lines of the present Interstate Commerce Act, making a willful deviation from the published tariff rate a violation of the law, whether or not other shippers of like commodity between the same points were compelled to pay the published tariff.

The constitution of 1879, by section 22 of article XII, created a Board of Railroad Commissioners and defined their powers and duties in certain respects.

Section 24 of article XII reads as follows:

“The Legislature shall pass all laws necessary for the enforcement of the provisions of this article.”

It is worthy of comment that the only statute passed by the Legislature of California, in pursuance of this mandate of the constitution, was approved April 15, 1880, and is entitled:

“An act to organize and define the powers of the Board of Railroad Commissioners.”

This act did little more than provide for the organization of the Board of Railroad Commissioners, prescribe the salaries of its employees, and attempt to define the term “transportation companies,” as found in section 22 of article XII of the constitution. This statute was inadequate at the time it was passed, it has not been sufficient to meet any commercial condition that has since existed, fails entirely to meet the conditions of the present, and will fail to meet the conditions of the future.

Section 21 of article XII of the constitution prohibits discriminations in charges or facilities for the transportation of freight or passengers, but provides no penalty for the violation of such provision, and no act has been passed by the Legislature since the adoption of the constitution providing for such penalties. The experience of all times has shown that the law is best enforced when appropriate penalties are provided for its violation.

Section 22 of article XII of the constitution provides a penalty for a failure “to conform to the rates established by the Commission.” In

the case of *De Leonis vs. Etchepare*, 120 Cal. 415, the Supreme Court of this State held that the word "conform" does not mean "identical" or "the same." This provision of the constitution can not be regarded as sufficient to meet the situation, but should be supplemented by appropriate legislation.

In 1878, prior to the adoption of the new constitution, a statute was passed by the Legislature of this State creating the office of "Commissioner of Transportation," defining his powers and duties, and defining discriminations and extortions by railroad companies. The penalty provided, however, in this statute for discriminations and extortions, as therein defined, is wholly inadequate.

In the presentation of these matters to the Railroad Commission we were compelled to rely upon this statute, notwithstanding the penalties provided were inadequate, and the further fact that in some of its features it had been repealed by the new constitution.

The only remedy for discriminations given by this statute exists in favor of an injured shipper, but before an injured shipper can recover he must prove that he was obliged to ship at the published tariff, while a more favored shipper was permitted to transport similar commodities between the same points at a rate less than published tariff.

It is thus apparent that the shippers of the State are practically helpless, as the required evidence in any case will be most difficult, and in most cases impossible, of procurement.

I believe this brief review of the situation will show the imperative necessity of prompt legislation on this subject, and, under the constitution of this State, the Legislature has ample authority to enact the required legislation. In other states this situation has been fully met, and the constitution of this State is amply sufficient to support legislation similar to that which is operating successfully in those states. There are but few states in the Union which have not adopted advance legislation upon these subjects, and California, unfortunately, is one of those few.

The various phases of railroad operation, including not only the establishment of rates of transportation charges, but the matter of switching, terminal charges, industrial tracks, loading, unloading and icing charges, interlocking switches, block systems, joint freight traffic, demurrage, the furnishing and interchange of cars, and other matters of similar character, as well as the control and regulation of express companies, telegraph and dispatch companies, and steamship companies plying upon the inland waters of the State, have been the subject of legislation in many of the states of the Union, and such legislation, while entirely fair to all transportation companies, has been of greatest benefit to all shippers and to all commercial interests.

Of legislative acts of the various states perhaps none have been more carefully drawn to meet present conditions than those of Wisconsin and Texas, and those acts, with the decisions of the courts construing the same, point clearly to the character of legislation needed to meet existing conditions in this State.

Rates.—The Commission should be given power to classify freight, as well as to establish rates for the transportation of each class. At the present time the “Western Classification” is used in California, which is subject to deviation by any railroad company at will.

In fixing rates the Commission should be authorized to fix different rates for the transportation of the same commodity over different roads, necessitated by the difference in locality of such roads, and governed by their expense in operation. They should be given power to require fair and just division of the charges arising for the transportation of freight over two or more connecting roads, should such roads be unable to agree upon such division.

Their power of fixing rates should extend to switching charges, loading, unloading and icing charges, and the application of terminal rates. They should be authorized to fix reasonable charges for the use or transportation of loaded or empty cars, and for the storage of freight, or demurrage on cars not unloaded after reasonable notice to consignee.

The method of establishing a rate, the time when a rate is to become effective, and the methods by which such rate may be changed should be clearly defined, and a deviation from such rate should be made unlawful, irrespective of contemporaneous shipments at full tariff. This would accord with the provisions of the Interstate Commerce Act, in the particular that proof of a shipment at less than published tariff is sufficient, without proof of a like shipment by a different shipper at full tariff.

Cars.—The Commission should have power to enforce the furnishing of cars after reasonable notice to the company, and for such purpose should be furnished a daily car report from each transportation company.

Discriminations.—The acts constituting discriminations should be clearly defined, and discrimination, false billing, false classification and false weighing, and every other device for the accomplishment of such objects prohibited.

Penalties.—For a violation of any of the provisions of the act appropriate penalties should be provided, for in many instances it is only through the means of penalties that proper observance of the law can be compelled.

Procedure.—The procedure for the enforcement of the penalties should be made clear, and the venue of such actions designated. The burden of proving that rates are confiscatory or unreasonable should be placed upon the complaining transportation company. The power to impose fines and the means through which the orders of the Commission are to be enforced should be clearly defined.

I have gone thus somewhat extensively into this subject because of its vital importance to the State, and feel that appropriate legislation is imperatively demanded.

STATE SCHOOL LANDS.

As you are aware, for several years there has existed between the State and Federal Government a controversy respecting State school lands. It has been contended by the Federal Government that there is due from the State to the Federal Government some fifty thousand acres of land on account of overlistings to the State. As a result of this claim, for many years indemnity school land selections of the State have not been approved by the Federal Government, but action thereon has been withheld, pending a settlement of the controversy referred to, thus resulting in great loss and inconvenience to many citizens of the State.

In 1907, in conjunction with the State Surveyor-General, I took up this matter with the Secretary of the Interior, and a conference was arranged between that official, Surveyor-General Kingsbury and this office. In June, that conference was held at Washington, Hon. George A. Sturtevant, then my assistant, representing this office.

At that conference it was contended on behalf of the State that the State of California was not liable for any overlistings occurring prior to March 1, 1877, and liability was admitted for such overlistings as occurred subsequent to that date. While the Government has not assented to this contention, as a result of that conference, and of further considerations since had, it has been arranged that the State will furnish substitute base for all overlistings occurring since March 1, 1877, amounting to some thirteen thousand acres, and that the legality of the claim for the amount of overlistings occurring prior to March 1, 1877, will be hereafter determined by some appropriate proceeding, and on its part the Government has agreed that as soon as substitute base for overlistings occurring subsequent to March 1, 1877, is furnished, it will go forward in the approval of indemnity school land selections so long pending in the General Land Office without action.

The work of ascertaining the exact amount of overlistings since 1877 is going rapidly forward, and substitute base will be furnished therefor.

It is confidently expected that as soon as this has been done the pending indemnity school land selections will be approved, and a perfect title thereto issued to the respective applicants.

In my view, the State is not legally liable for overlistings occurring prior to March 1, 1877, and the claim of the Federal Government based upon such overlistings should be resisted.

JUDGMENTS AGAINST THE STATE ON MONEY DEMANDS.

The Legislature of 1905 passed an act appropriating \$45,616.30 to pay the claim of John Mullan against the State of California. Prior to the approval of that act, the then Governor, Hon. George C. Pardee, took from the assignees of claimant an agreement to accept in full satisfaction of their claim against the State the sum of \$25,000, and because of such agreement approved the act.

The act provided that one half of the amount appropriated should be payable January 1, 1906, and the remaining half January 1, 1907.

One half the amount was paid on January 1, 1906, and on January 1, 1907, the assignees of claimant demanded the payment of the remaining half, under the terms of the act. This demand was refused by the Controller, in accordance with the advice of this office, and thereafter claimants sued out a writ of mandate against the Controller to compel the issuance of his warrant for the remaining half of the original appropriation.

The answer to the petition set up the agreement referred to, and the trial court held that such agreement did not constitute a defense, and ordered the writ to issue.

From such judgment an appeal was prosecuted to the District Court of Appeal, Third District, and the judgment of the trial court was there affirmed. Thereafter, this office petitioned the Supreme Court of the State to hear and determine said cause, the petition was granted, and the case will be upon the November calendar of that court.

At the session of 1907, an appropriation of \$5,000 was made to the Woman's Relief Corps Home Association, at Evergreen, Santa Clara County. A question arising as to the constitutionality of such act, the Controller declined to issue his warrant to meet claims presented against such appropriation.

The institution sued out a writ of mandate to compel the issuance of such warrant. The proceeding was brought in the District Court of Appeal, Third District, and, upon hearing, that court held the act to be in all respects constitutional, and directed the writ to issue.

In accordance with such direction the claims were paid.

While these were in the nature of judgments against the State, it will

be remembered that appropriations to meet the same have already been made. No other money judgments of any character against the State have been rendered during the period covered by this report.

STATE BOARDS, ETC.

From other sources, there will be presented to you reports of the proceedings of the several boards and commissions of which I am ex officio a member.

REPORTS OF DISTRICT ATTORNEYS.

In following pages of this report will be found a tabulation of the reports of the several District Attorneys of the State.

CONCLUSION.

Through the efficiency and earnest labors of the various members of my office force, I have been able to keep the work of this department up to date.

Respectfully submitted.

U. S. WEBB,
Attorney-General.

CASES IN THE UNITED STATES SUPREME COURT.

REPORT

OF THE

SUPERINTENDENT OF STATE PRINTING

FOR THE

Fifty-eighth and Fifty-ninth Fiscal Years

FROM

JULY 1, 1906, TO JUNE 30, 1908

SACRAMENTO

W. W. SHANNON, : : : : SUPERINTENDENT STATE PRINTING

1908.

REPORT

OF THE

SUPERINTENDENT OF STATE PRINTING

FOR THE

FIFTY-EIGHTH FISCAL YEAR

July 1, 1906, to June 30, 1907

REPORT OF STATE PRINTING DEPARTMENT.

SACRAMENTO, CAL., September 14, 1907.

To HON. JAMES N. GILLET, *Governor of California.*

SIR: In compliance with law, I have the honor to present herewith my fifth annual report of the transactions of the State Printing Office for the fifty-eighth fiscal year, ending June 30, 1907.

LEGISLATIVE PRINTING—THIRTY-SEVENTH SESSION.

Two appropriations were made by the Legislature for its printing for the thirty-seventh session, the first one being for \$50,000 and the second one for \$35,000, a total of \$85,000, and I rendered bills against the said appropriations, for labor and materials, amounting to \$84,880.43.

A detail of all legislative printing, and the cost thereof, is as follows:

	No. Pages.	Senate.	No. Pages.	Assembly.	Legislative.
Bills	3,521	\$5,635 10	3,060	\$5,573 55	-----
Amended Bills	2,271	3,885 50	1,826	2,959 30	-----
Substitute Bills	97	88 45	96	88 00	-----
Reprinted Bills	393	403 10	366	502 00	-----
Engrossed Bills	1,513	1,428 70	1,377	1,419 15	-----
Enrolled Bills	2,344	3,484 90	2,404	3,666 40	-----
Concurrent Resolutions	437	742 00	502	851 70	-----
Joint Resolutions	21	43 35	13	23 55	-----
Constitutional Amendments	87	148 75	58	100 75	-----
Daily Journal	1,967	5,636 70	1,928	5,349 10	-----
Corrected Journal	1,967	836 90	2,048	758 00	-----
Daily File	1,458	1,585 00	2,054	3,205 10	-----
Daily History	7,036	9,073 40	7,631	9,517 50	-----
Miscellaneous Chapters	433	247 60	311	392 95	-----
Bill Chapters	1,338	1,401 25	565	882 55	-----
Totals	-----	\$34,040 70	-----	\$34,891 60	-----
Final History	-----	-----	535	-----	\$660 80
Statutes, 1907	-----	-----	1,654	-----	5,165 60
Appendix Journals (3 vols.)	-----	-----	-----	-----	1,285 60
Senate and Assembly Journals (2 vols.)	-----	-----	-----	-----	2,221 60
Binding Senate and Assembly Official Journals	-----	-----	-----	-----	30 00
Handbook	-----	1,968 80	-----	-----	-----
Miscellaneous printing	-----	1,846 50	-----	2,769 23	-----
Totals	-----	\$37,856 00	-----	\$37,660 83	\$9,363 60

Recapitulation.

Senate	\$37,856 00
Assembly	37,660 83
Legislative	9,363 60
Total	\$84,880 43

DEPARTMENT PRINTING—FIFTY-EIGHTH FISCAL YEAR.

Printing and blank books for the several departments of State cost \$103,939.64, of which \$87,433.49 was charged to appropriations for the purpose, and \$16,506.15 placed to the credit of the State Printing Fund by departments having no direct appropriation for printing. The table below shows the sources whence the credits to this department were derived:

Department.	Balance from 57th Fiscal Year.	Additional Appropriations.	Cost of Printing During 58th Fiscal Year.	Balance to Treasury.
Adjutant-General	\$2,000 00	\$1,000 00	\$3,000 00	
Attorney-General	3,348 50		2,877 75	\$470 75

NEW MACHINERY.

The Legislature, by an Act approved March 18, 1905, appropriated \$35,000 "For the purpose of purchasing improved printing and binding material and machinery, and improvements for the State Printing Office and Bindery, and for installing the same."

Pursuant to said Act, I purchased and installed during the fifty-seventh fiscal year, as previously reported, machinery to the value of

\$20,554.60, and during the past year—the fifty-eighth—I have installed further machinery and made other improvements, as follows:

One Book Trimmer	\$1,000 00
One Bundling Machine	150 00
One Peerless Rotary Perforator—power, with four extra heads	390 00
Two Economic Feeding machines (to be attached to Folders)	2,200 00
One Duplex Style, 30a Hickok Ruling Machine	600 00
Freight on Book Trimmer	107 67
Freight on Bundling Machine	8 82
Freight on Quadruple Folder	137 81
Freight on White Paging Machine	7 72
Freight on Rotary Perforator	15 05
Freight on Ruling Machine	45 30
Freight on Automatic Feeders	94 28
Freight on Linotype Machines	217 39
Two Emerson Motors	160 00
Four Magazines, Model 5	400 00
One set 10-point De Vinne, with italic	66 00
Two sets 7-point No. 1, with italic No. 2	132 00
One set 6-point No. 2, with gothic No. 3	66 00
One set 6-point No. 2, with italic	66 00
Two Model 5, Quick-change Linotypes, Nos. 10,602 and 10,603, f. o. b. Brooklyn	6,300 00
One Linotype Saw, f. o. b. Brooklyn	150 00
Two Gas Governor Regulators	15 55
One Gas Pressure Water-gauge	2 50
One Mouthpiece Drift	50
13 Belting Linotype Saws	1 30
One pound Prussian Blue	15
12 Hacksaw Blades	70
Two Emerson Motor Belts, endless	2 85
One Mouthpiece Cleaning Saw	75
One 50-inch Brown & Carver Hand-clamp Cutter	951 00
One No. 12 Morrison Wire Stitcher	412 50
Installing Linotype Machines	131 25
Total expended fifty-eighth year	\$13,833 09
June 30, 1906—Expended fifty-seventh year	\$20,554 60
June 30, 1907—Expended fifty-eighth year	13,833 09
July 1, 1907, balance in appropriation	\$612 31

Of the \$40,000 appropriated in March, 1903, there is still a balance of \$340.37, making with the \$612.31, balance unexpended of the 1905 appropriation, a total of \$952.68.

SALES OF WASTE PAPER.

During the last fiscal year I sold waste and scrap paper to the amount of \$329.35, as follows:

1906—September 28	\$104 70
December 5	112 50
1907—May 2	112 15
Total	\$329 35

I have several times called attention to the inadequate housing of the plant of the State Printing Office, and again call your attention to the matter. The building is not only too small to accommodate the machinery and stock and necessary workmen, but is positively unsafe to hold the weights imposed on the different floors. I strongly urge that steps be at once taken to strengthen the building until such time as the Legislature sees fit to provide a new one.

Respectfully submitted.

W. W. SHANNON,
Superintendent of State Printing.

Subscribed and sworn to before me this 14th day of September, 1907.

JOHN WHICHER,
Deputy Superintendent of State Printing.

REPORT

OF THE

SUPERINTENDENT OF STATE PRINTING

FOR THE

FIFTY-NINTH FISCAL YEAR

July 1, 1907, to June 30, 1908

REPORT OF STATE PRINTING DEPARTMENT.

SACRAMENTO, August 1, 1908.

To HON. JAMES N. GILLETT, *Governor of California.*

SIR: Pursuant to law, I have the honor to hand you herewith my sixth annual report of the business of the State Printing Office for the fifty-ninth fiscal year, ending June 30, 1908.

LEGISLATIVE PRINTING, THIRTY-SEVENTH (EXTRA) SESSION.

The Legislature was convened in extraordinary sessions on the 19th of November, 1907, and again on the 23d of the same month. During the first special session the Legislature appropriated \$4,000 to cover any expenses that might be incurred for its printing, and I rendered bills against said appropriation, for labor and materials, to the amount of \$3,105.75, the detail of the work being as follows:

	Senate.	Assembly.	Legislative.
Bills.....	\$56 95	\$38 90	
Amended Bills.....	37 50	24 45	
Substitute Bills.....	51 85		
Engrossed Bills.....	37 90	16 25	
Enrolled Bills.....	180 35	5 60	
Concurrent Resolutions.....	171 50	8 15	
Joint Resolutions.....	9 80		
Daily Journal.....	364 80	344 75	
Corrected Journal.....	64 65	59 80	
Daily File and History.....	34 90	19 25	
Miscellaneous Chapters.....	34 50	2 40	
Bill Chapters.....	25 90		
Totals.....	\$1,070 50	\$519 55	
Final History.....			\$68 75
Statutes.....			497 45
Statutes (2d extra session).....			217 25
Journals.....			322 10
Binding Approved Bills.....			2 35
Miscellaneous Printing.....	184 10	223 70	
Totals.....	\$1,254 60	\$743 25	\$1,107 90

Recapitulation.

Senate.....	\$1,254 60
Assembly.....	743 25
Legislative.....	1,107 90
Total.....	\$3,105 75

DEPARTMENT PRINTING.

The table following shows the amounts charged for printing and blank books to the several departments, the sums appropriated for the fifty-ninth and sixtieth years, and the balances available for the sixtieth fiscal year, beginning July 1, 1908:

Department.	Appropriation 59th and 60th Fiscal Years.	Printing 59th Fiscal Year.	Balance to 60th Fiscal Year.

SALES OF OLD MATERIAL.

By order of the Board of Examiners I have sold the following material, all being old and unfit for further use in the office:

To Norman F. Hall Co.—	
One saw	\$50 00
One wire stitching machine	35 00
Five sewing benches	5 00
One Sanborn 32-inch cutter	105 00
To American Type Founders Co.—	
One Cottrell pony cylinder press	400 00
To Hirsch & Son—	
3,300 pounds dross, 50 pounds zinc waste	50 00
Total	\$645 00

All of which was deposited in the State treasury to the credit of the General Fund.

MACHINERY APPROPRIATIONS.

As reported last year, of the appropriations of 1903 and 1905 "for the purchase of improved printing and binding material and machinery, and improvements for the State Printing Office and Bindery," there was on the first of July, 1907, a balance of \$340.37 of the \$40,000.00 appropriated in 1903 and a balance of \$612 31 of the \$35,000.00 appropriated in 1905, and the only machinery purchased out of said appropriations during the fifty-ninth fiscal year, paid out of the appropriation of 1903, was the following:

December 12, 1907, one Tatum Adjustable Paper Punch, style D \$250 00

which left that account stand as follows:

Appropriation of 1903		\$40,000 00
Expended during fifty-fifth fiscal year	\$36,113 93	
Expended during fifty-sixth fiscal year	3 545 70	
Expended during fifty-ninth fiscal year	250 00	
		<hr/> 39,909 63
Balance unexpended for machinery and material		\$90 37
Balance 1905 appropriation		612 31
Amount still available		<hr/> \$702 68

REPAIRS TO BUILDING.

I have several times urged the necessity of providing a new building, which I again repeat. The office is valuable and the machinery and materials will now compare favorably with the best printing houses, with the one exception of typesetting machines, of which the office is equipped with four. But the plant should be housed in a building suitable for its business. As stated in previous reports, the present building, erected in 1872 as a residence for the Governor, is not strong enough to hold the immense weights, there being 124 tons on the second floor and 112 tons on the third floor, with overhead shafting in the first floor that makes constant oscillation and vibration; and conditions became so

alarming last summer that I deemed it only just to the employés that some steps should be taken toward placing the house in a stronger structural condition. Therefore, at your suggestion, Mr. N. Ellery, of the Department of Engineering, caused the building to be thoroughly inspected, and his report showing that the house ought to be at once strengthened, the Board of Examiners directed that repairs should be made out of balances that remained in the appropriations of 1903 and 1905, and a deficiency created for the unpaid portion of the bills for such repairs. Accordingly, the engineers of Mr. Ellery's department proceeded to put the building in safe condition, and rendered bills as follows:

Balance appropriation of 1903.....		\$90 37
Salaries of draughtsmen.....	\$87 76	
Thomson, Diggs & Co., nails.....	86	
Sacramento Transfer and Storage Co., cartage.....	1 50	
		<hr/> 90 12
Balance in appropriation.....		<hr/> 25
Balance in appropriation 1905.....		\$612 31
Transferred from appropriation 1903.....		25
		<hr/> \$612 56
Labor of carpenters.....	\$431 00	
Friend & Terry Lumber Co.....	133 95	
Root, Nelson & Co., machine work.....	47 61	
		<hr/> \$612 56

which exhausted the moneys in the two appropriations.

The following bill incurred by the Department of Engineering is unpaid:

Root, Nelson & Co., iron.....	\$479 57
-------------------------------	----------

making the total cost of repairs \$1,182.25.

The building is not, particularly as to its interior, a thing of beauty, but it is safe and will answer the requirements of the business until a new house can be provided.

SCHOOL TEXT-BOOK DEPARTMENT.

FIFTY-NINTH FISCAL YEAR.

The following tables indicate the transactions of School Text-Book Department for the year ending June 30, 1908:

BOOKS MANUFACTURED.

The books manufactured and delivered to the warehouse for the year ending June 30, 1908, are as follows:

SALES OF WASTE PAPER.

I have sold paper cuttings and scraps to the amount of \$532.16, all of which was deposited in the State treasury to the credit of the School Book Fund.

Respectfully submitted.

W. W. SHANNON,
Superintendent State Printing.

Subscribed and sworn to before me this 29th day of August, 1908.

JOHN WHICHER,
Deputy Supt. of State Printing.

BIENNIAL REPORT

OF THE

ADJUTANT GENERAL

OF THE

STATE OF CALIFORNIA

FOR THE TWO YEARS ENDED JUNE 30, 1904.

1903-1904.

SACRAMENTO:

W. W. SHANNON, : : : : SUPERINTENDENT STATE PRINTING.

1907.

REPORT.

ADJUTANT GENERAL'S OFFICE,

SACRAMENTO, CAL., September 15, 1904.

To His Excellency, GOVERNOR GEORGE C. PARDEE,

Commander-in-Chief.

SIR: I have the honor to submit the following report of the operations of this department for the two years ended June 30, 1904, as required by Section 2108, Political Code, with accompanying papers and reports.

ENROLLED MILITIA.

The number of persons in the State subject to military duty, as shown by the returns of the commanding generals of the three brigades, for the year 1904 (required by Section 1902, Political Code), is 257,363; an increase over the preceding year of 19,823.

NATIONAL GUARD.

Since June 30, 1902, the organized strength of the National Guard has been reduced by the muster-out of the following organizations, the same having fallen below the standard of efficiency:

Name of Organization.	Location.	Date of Muster-Out.
Signal Corps, Third Brigade.....	Sacramento.....	January 5, 1904
Company L, Seventh Infantry	Santa Ana.....	June 15, 1904

The National Guard, as at present constituted, consists of two signal corps, four troops of cavalry, four batteries of coast artillery, forty-six companies of infantry, and one company of Veteran Reserves, aggregating, with the staff of the Commander-in-Chief, general officers and general staff, 323 officers and 3,146 enlisted men. This military force is organized into one division, commanded by Major General John H. Dickinson, and three brigades—the First, commanded by Brigadier General Robert Wankowski, consisting of one Signal Corps, Troops C and D, Cavalry, and the Seventh Regiment of Infantry; the Second, commanded by Brigadier General R. H. Warfield, consisting of one Signal Corps, Troop A, Cavalry, the First Battalion of Artillery, and the First and Fifth Regiments of Infantry; and the Third, commanded

by Brigadier General M. W. Muller, consisting of Troop B, Cavalry, and the Second and Sixth Regiments of Infantry.

There are 292 National Guard officers on the Retired List.

NAVAL MILITIA.

The present organization is the same as noted in the last report of this department, consisting of seven divisions, organized into one battalion, commanded by Captain George W. Bauer, and aggregating 35 officers and 435 enlisted men.

There are 7 Naval Militia officers on the Retired List.

ARMS AND EQUIPMENTS.

The National Guard is now armed and equipped as follows:

Infantry Soldier.—U. S. magazine rifle, caliber .30, with sling, cartridge belt, bayonet and scabbard.

Blanket, blanket bag, complete; shelter-tent half and poles, canteen with strap, haversack with strap, meat can, knife, fork, spoon, and tin cup.

Cavalry Soldier.—U. S. magazine carbine, caliber .30, web belt, saber and strap, and Colt's revolver, caliber .38.

Saddle, complete; curb bridle, complete; watering bridle, halter, saddlebags, saddle blanket, nosebag, surcingle, currycomb, horse brush, horse cover, carbine scabbard, saber belt, spurs, blanket, poncho, shelter-tent half and poles, canteen with cavalry straps, meat can, knife, fork, spoon, and tin cup.

Enlisted Men of Signal Corps.—Same as for cavalry.

Sanitary Corps.—Same as for infantry, without arms. Privates carry pouch and litter sling.

Coast Artillery.—Same as for infantry.

Regimental Noncommissioned Staff Officers.—Same as for infantry, except that the revolver and noncommissioned officer's sword and waist belt are issued in lieu of rifle and equipment.

Officers.—No equipment is furnished to officers, they being required to furnish their own.

The equipment as enumerated above is the same as furnished to the U. S. Army, except that the cavalry is not supplied with the lariat and picket pin.

There is a complete equipment of hospital tents, wall tents, field desks, and field ranges. Most of the organizations are supplied with two each of drums and trumpets, complete.

In addition to the above equipment each cavalry troop and signal corps detachment has been issued one complete set of saddler's tools and one cavalry forge with tools for field service as in use in the U. S. Army.

The medical department has recently been equipped with one complete regimental hospital outfit for field and camp service, equal to that supplied to the U. S. Army.

The Naval Militia is armed with the Lee magazine rifle, caliber .45, and Colt's revolver, caliber .38. The equipment of the men is similar

to that of the U. S. Navy. There are also in use by the Naval Militia the U. S. S. "Marion," and one steam launch, stationed at San Francisco; the U. S. S. "Pinta," stationed at San Diego; one steam launch, located at San Pedro; nine small boats and equipments, in addition to those constituting a part of the equipment of the "Marion" and "Pinta"; three three-inch breech-loading rifles; two Colt's automatic guns, caliber .30; one gatling gun (Accles), complete; five one-pounder Hotchkiss rapid-fire guns; two one-pounder Hotchkiss heavy guns, mark II, complete; and one three-inch Fletcher Navy field gun, complete.

The U. S. S. "Marion" and the U. S. S. "Pinta," loaned by the Navy Department to the State, are old wooden vessels, of obsolete type, and not in condition to be propelled by their own steam. They should be replaced by vessels of modern type and adapted to the needs of the Naval Militia. Numerous applications to the Navy Department for the loan of serviceable vessels have been unavailing.

UNIFORMS.

During 1902 and 1903 merely partial issues of uniforms were made to cover deficiencies arising in the general issue of 1900. The uniforms issued in 1900 becoming practically unserviceable and in part obsolete, by reason of the adoption of new regulations adapted from the regulations for the new uniform of the Army, as prescribed in G. O. No. 132, series of 1902, Headquarters of the Army, a complete issue of uniforms was found necessary at the beginning of the present calendar year. Bids were called for and contracts let by the Uniform Board, and a complete issue of dress caps and coats made to the various headquarters and organizations of the National Guard.

On May 13 and June 11, 1904, requisitions were made upon the U. S. Government for a supply of the following articles of clothing, sufficient for the present needs of the Guard, the same, however, being of the style in use by the Army prior to the adoption of G. O. No. 132, series of 1902, Headquarters of the Army: Campaign hats, complete, with cords, letters, and numbers; canvas leggings, dark-blue flannel shirts, kersey trousers, and field uniform (khaki cotton) trousers.

Each enlisted man of the National Guard is now supplied with a blouse, blue shirt, trousers, forage cap, campaign hat, and leggings.

In addition to the above a sufficient number of overalls and stable frocks have been requisitioned for to supply each enlisted man of the cavalry and signal corps.

For further information I would respectfully refer you to the reports of the Uniform Board, submitted herewith.

The Uniform Board, as provided for in Section 2027, Political Code, is at present composed of the following officers: Brigadier General

J. B. Lauck, ex officio Quartermaster General; Colonel Thomas Wilhelm, Inspector General of Rifle Practice; and Lieutenant Colonel Frederick J. H. Rickon, Quartermaster, Division.

ENCAMPMENTS.

Owing to the limited appropriation for encampment purposes, during 1902 and 1903, the various organizations of the National Guard were assembled separately for discipline and drill at points convenient to their home stations.

During that portion of 1902 subsequent to June 30 encampments were held as follows: The First Regiment of Infantry, at Napa, August 2 to 8; the Second Regiment of Infantry, at Santa Cruz, July 27 to August 2; the First Brigade, excepting Troop C, Cavalry, at Long Beach, September 6 to 12; Troop B, Cavalry, at Santa Cruz, August 9 to 15; the Signal Corps, Third Brigade, a practice march from Sacramento to Cisco and return, during the month of July.

During 1903, encampments were held as follows: The First Battalion of Artillery, at Stockton, July 4 to 12; the First Regiment of Infantry, at Santa Rosa, June 20 to 28; the Second Regiment of Infantry, at Santa Cruz, August 9 to 22; the Fifth Regiment of Infantry, at Healdsburg, July 18 to 26; the Sixth Regiment of Infantry, at Santa Cruz, August 9 to 17; the Seventh Regiment of Infantry, at Coronado Beach, August 6 to 15; Troop B, Cavalry, a practice march and encampment to and at Santa Cruz, August 6 to 22; Troop C, Cavalry, a practice march through Monterey County, June 1 to 10; Troop D, Cavalry, a practice march in Los Angeles and Ventura counties, August 15 to 27; the Signal Corps, First Brigade, at Avalon, Catalina Island, August 9 to 19; the Signal Corps, Second Brigade, a practice march from San Francisco to Willits and return, June 23 to July 8; Company A. Veteran Reserves, at Calistoga, June 21 to 28. The number participating in the different camps during 1903 aggregated 189 officers and 2,176 enlisted men.

The Naval Militia were assembled in part for discipline and drill during 1902, as follows: That portion of the battalion assigned to the U. S. S. "Marion," and the Fourth Division, on the U. S. S. "Marion," in San Francisco Bay, off Sausalito, August 31 to September 6; the Fifth Division, on the Eel River, Humboldt County, September 7 to 14; and the Sixth Division, at Catalina Island, September 5 to 14. The number participating in the encampments and drills of the Naval Militia for 1902 aggregated 21 officers and 164 enlisted men.

As copies of the reports of the inspecting officers of these encampments have heretofore been submitted to Your Excellency, and have also been sent through channels to the commanding officers particularly interested, it is deemed unnecessary to include the same in this report.

INSPECTIONS.

During 1903 the organizations of the National Guard were inspected at their home stations between April 20 and July 1 under the direct supervision of the Commanding General of the Division, for further information relative to which you are respectfully referred to G. O. No. 13, series of 1903, A. G. O., State of California.

In addition, the entire Guard of the State was inspected by Major E. E. Hardin, Seventh Infantry, U. S. A., representing the U. S. Government, as provided in the "Dick" Militia Law.

For the present calendar year an armory inspection of all the organizations was made during the period of time between February 1 and May 20, with satisfactory results; and, in addition thereto, and in conjunction therewith, an inspection was made for the Government by Major Thomas Wilhelm, U. S. A., retired, on duty with the State troops. From extracts from his report furnished this office, the condition of the National Guard in the main was found satisfactory.

An inspection and muster of the Naval Militia was held at the home stations of the different organizations composing the battalion, during the month of June, 1903, attended with fairly satisfactory results, Lieutenant Commander A. A. Morey, Paymaster, N. M. C., being detailed for this purpose in the case of all the organizations excepting the Fourth Division, which was inspected by Commander George W. Bauer, N. M. C.

BOARDS OF SURVEY.

For the year 1902, following the custom of previous years, boards of survey, composed of two officers each for each of the three brigades, were appointed for action upon the loss or destruction of State and United States property for which officers in the various organizations might be responsible. The reports of these boards were presented to the War Department and approved in their entirety, thus authorizing the dropping of a large amount of property charged to the State, but too late to be incorporated in the annual property returns submitted by Your Excellency for that year.

No boards of survey were appointed for 1903, but a general board of survey, consisting of three officers, was appointed to meet at the various headquarters and armories of the organizations of the National Guard upon the dates designated for the annual muster and inspection for 1904. The reports of this board, which were prepared in accordance with forms and directions given in the Manual for Boards of Survey and the U. S. Army Regulations, have been presented to the War Department for action, but the results thereof are unknown at this writing.

TARGET PRACTICE.

For the years 1902 and 1903 target practice was held in this State with the .45 caliber Springfield rifle and the .38 caliber Colt's revolver, under the Firing Regulations for Small Arms, as adopted in G. O. No. 6, series of 1901, A. G. O., State of California, and amended in G. O. No. 5, series of 1902, A. G. O., State of California, with fairly satisfactory results.

The reports of target practice for the years named show the number of men qualifying in the different classes, as follows:

REVOLVER.

	1902.	1903.
Distinguished Marksmen	56	49
Sharpshooters	37	48
Riflemen	67	58
Marksmen	43	40
Totals	203	195

RIFLE.

Distinguished marksmen	125	141
Sharpshooters	99	97
Riflemen	294	366
Marksmen	313	262
Totals	831	866
Total number qualifying	1,034	1,061

The diminution in the number qualifying for 1902 and 1903 as compared with 1901 (1,205) is doubtless attributable to the raising of the standard of excellence required for qualification in each class and the failure of some organizations to hold any record practice due to a lack of proper range facilities.

During 1904 small arms practice has suffered much through the exchange of the .45 caliber Springfield rifle for the .30 caliber U. S. magazine rifle, and, incident thereto, the radical amending of the then existing firing regulations by the adoption of "Special Course C, Small Arms Firing Regulations for the use of the Organized Militia or National Guard," as published in G. O. No. 30, Headquarters of the Army, Adjutant General's Office, April 2, 1903. This course has been of necessity curtailed, owing to the impossibility of securing ranges of sufficient length to complete the course, many ranges which were suitable for the Springfield rifle being unsafe for the new arm. This difficulty could be largely overcome in the construction and maintenance by the State of target ranges near the cities of San Francisco, Los Angeles, and Sacramento.

THE "DICK" MILITIA LAW.

One of the most important congressional enactments of recent years for the betterment of the National Guard of the several States was the Militia Act of January 21, 1903, commonly known as the "Dick" Law. It takes the place of the old law, which had been in existence for more than a hundred years, and which had become obsolete and largely inoperative.

The new Act contemplates the harmonizing of the militia of all the States and Territories with the regular army of the United States, as to organization, armament, and discipline, as far as it may be practicable, and authority is given the War Department to furnish each State with the necessary equipment without cost to the State. It is compulsory upon each State, which desires to participate in the pecuniary advantages of this law, to be inspected annually by an officer of the regular army, detailed by the Secretary of War, and upon his report of the satisfactory or unsatisfactory condition of the organized militia (National Guard) of a State, and its compliance with the national law, depends its sharing in the allotment made each year by Congress.

ACTION TAKEN BY STATE TO CARRY OUT PROVISIONS OF DICK MILITIA LAW.

In order that the military laws of this State may be made to conform to the Dick Militia Law, a board of five officers, composed of Major General John H. Dickinson, commanding Division; Colonel N. S. Bangham, Assistant Adjutant General; Colonel George H. Pippy, Judge Advocate General; Captain M. W. Simpson, Fifth Infantry; and Captain F. V. Keesling, First Battalion of Artillery, was appointed on October 30, 1903, to consider amendments to the present military code. This board is following as nearly as local conditions will permit the outline of a general military law suggested in a circular issued from the War Department October 8, 1903, and has been directed to formulate the proposed amendments in a manner suitable for presentation to the Legislature at its next session.

The exchange of the Springfield rifles, caliber .45, with appendages and spare parts, for the U. S. magazine rifle, caliber .30, and equipments, as provided for by Section 13 of the Act in question, was made during the year 1903.

Under Section 15 of the same Act, arrangements have been perfected for the participation of the National Guard of this State in joint maneuvers with the United States troops at Atascadero, San Luis Obispo County, Cal., from August 12 to 27, 1904, under the immediate direction and control of Major General Arthur MacArthur, commanding Pacific Division, U. S. A.

EXTRA PAY OF CALIFORNIA U. S. VOLUNTEERS.

Since the last report of this department, the matter of the disbursement of the remainder of the \$58,119.26, collected from the U. S. Government on January 7, 1902, for the pay of California U. S. Volunteers, Spanish-American War of 1898, from date of enrollment to date of muster-in or rejection, has gone on and checks have been issued upon the State Treasurer, the custodian of this fund, as fast as applications have been received from those who had signed receipts to the late Adjutant General W. H. Seamans and were entitled to this pay.

On June 30, 1904, the status of this fund was as follows:

Amount collected from U. S. Government and deposited with State Treasurer	\$58,151 26
Amount for which checks, numbering 2,530, have been issued and paid	54,391 26
Balance on hand subject to check (representing 175 claimants)	\$3,760 00

In addition to those whose claims are represented by the \$58,151.26 received from the Government, it is estimated that there are still 1,500 officers and men entitled to pay, aggregating \$35,000.00. In order that provision might be made for their payment, a bill was introduced in the Legislature of 1903, providing for an appropriation of \$35,000.00, or so much thereof as might be necessary, for this purpose; but the measure failed of passage by the early adjournment of the Legislature. A favorable solution has since been presented, however, through an Act of Congress, approved April 27, 1904, extending the time within which the Governors of States could file claims for reimbursement for expenses incurred by them in raising troops for the war with Spain, until January 1, 1906. This will permit the presentation of a claim by Your Excellency for the pay of those men of the California U. S. Volunteers, from date of enrollment to date of muster-in or rejection, who failed to file vouchers in time for presentation with the claim made by the Governor just prior to January 1, 1902. The work of collecting the individual vouchers of officers and men entitled to the pay in question, for presentation with the State's claim against the Government, will soon be taken up and prosecuted with vigor by this department.

SPANISH-AMERICAN WAR CLAIMS.

The aggregate claim of the State of California against the United States for moneys expended and materials furnished in aiding the United States to raise the Volunteer Army for the war with Spain, under the Acts of Congress approved July 8, 1898, and March 3, 1899, was \$172,664.64. Of this amount the State has received a total of

\$146,847.71, of which \$2,928.63 was received on August 12, 1903, leaving a balance of \$25,816.93. This amount has been disallowed by the Auditor for the War Department for several reasons, principally because the services were rendered or the materials furnished after the troops were mustered into the United States service, there being no authority of law for the refund.

EXCHANGE OF STORES ON ACCOUNT OF SPANISH-AMERICAN WAR.

As stated in the last report of this department, there are still due the State from the United States Government in lieu of property transferred at the time of the Spanish-American War, ordnance stores to the value of \$2,335.96, no property having been drawn on this account during the last two fiscal years. The stores that can be drawn on this account must be in kind and there can be no substitution. It is expected that the particular stores due the State on this account will soon be needed, when requisition will be made therefor.

COLORS OF CALIFORNIA U. S. VOLUNTEERS.

Since the last biennial report the guidon presented by Colonel Caspar Crowninshield, of the Second Massachusetts Cavalry, to the "California Hundred," which latter organization served as a part of the Second Massachusetts Cavalry during the War of the Rebellion, was delivered to this department in September, 1903, by Colonel C. Mason Kinne, of San Francisco, late adjutant of that regiment. Upon this guidon are inscribed the names of twenty-five of the engagements in which the "California Hundred" participated.

In addition the colors of the Sixth California Volunteer Infantry, which organization was in the service of the United States during the Spanish-American War of 1898, have been deposited in this office. These colors were received from Colonel W. R. Johnson, Sixth Infantry, N. G. C. (Lieutenant Colonel, commanding Sixth California U. S. Volunteer Infantry), in December, 1903. Of the four regiments of infantry, and the battalion of heavy artillery from this State, in that war, the colors of the latter organization and of the Sixth California Infantry are the only ones now on deposit in this office. Efforts will be made in the near future to obtain the colors of the First, Seventh, and Eighth Regiments of Infantry, California Volunteers, and in this connection I take the liberty of repeating the well-chosen words of my predecessor in the last biennial report of this department:

"The proper place for the custody and preservation of the colors of these organizations should be the State Capitol, as is the custom in other States, both in justice to the State and to the members of the

several organizations. Proper provision should be made for the care and preservation of these flags, and the present holders directed to turn them over to the State. Congress evidently intended that this should be done, for an Act was passed providing that volunteer regiments be permitted to retain their regimental colors upon being mustered out of the service of the United States, to be delivered to the respective State authorities. It may be said that some of the colors of the California regiments were presented to the organizations, but being possessed by the organizations, they became the property of the State and not of individuals."

ATTENDANCE AT JOINT MANEUVERS.

Upon the request of the Secretary of War, the following officers of the National Guard of this State were detailed to witness and report upon the joint maneuvers of troops of the Regular Army and the National Guard during the year 1903:

Maneuvers, West Point, Kentucky, September 30 to October 11: Captain Francis V. Keesling, Battery D, First Battalion of Artillery; and First Lieutenant Charles W. Thomas, Jr., Second Infantry.

Maneuvers, Fort Riley, Kansas: Captain Henry G. Mathewson, Company D, First Infantry.

The very complete and instructive reports rendered by these officers evince the benefits accruing from such details. Owing to lack of sufficient space and the fact that they have heretofore been submitted to Your Excellency, these reports are not given herewith.

SPECIAL DUTY.

On July 27, 1903, Company H, Second Infantry, located at Placerville, was ordered into service by Your Excellency to aid the civil authorities in the arrest of a number of escaped convicts from the Folsom State Prison. The company performed excellent service.

UNIVERSITY CADETS.

From the last annual report of the Military Department of the University of California, made by First Lieutenant Henry DeH. Waite, U. S. Army, retired, Professor of Military Science and Tactics, for the year ended June 30, 1903, the following data are obtained: Cadets organized into one regiment of infantry, consisting of three battalions of four companies each, one band, one signal detachment, and one artillery detachment. Number in military department, 955, and constantly increasing. About 60 outdoor drills and 120 indoor drills held during the year, with an average attendance of over 90 per cent. A

portion of the Cadets instructed in target practice and signaling. Inter-collegiate rifle championship for 1903 won by a team from the University of California. Discipline and efficiency excellent. Cadets annually inspected by an officer of the U. S. Army.

No report of the Cadets for the year 1904 has been submitted by the commandant thereof, the same being no longer required by the War Department.

OFFICE BUSINESS.

The following has been a part of the work performed in this office during the fiscal year ended June 30, 1904:

Communications received	6,320
Communications written	6,000
General orders issued	22
Special orders issued	10
Commissions issued	259
Certificates of re-election issued	23
Certificates of service issued	95
Exempt certificates issued	68
Honorary membership certificates issued	20
Service medals issued	52

RECOMMENDATIONS.

I respectfully make the following recommendations, some of which have appeared in former reports:

First—That a State arsenal and armory be built at Sacramento for the proper storage and care of the military supplies belonging to the State and for the housing of those organizations of the National Guard located at Sacramento. By combining the State arsenal with an armory for these organizations, a large amount of money that is now paid for rent could be saved to the State, and the building would pay for itself in time.

Second—Following the practice of some of the Eastern States in erecting armories at State expense, I would recommend that this State build armories at San Francisco and Los Angeles for the use of the organizations of the National Guard located there. It is practically impossible for the organizations located in these cities to secure even passable armory accommodations at a rental that will permit of a sufficient balance remaining in their allowances to defray incidental expenses. If armories could be built in the cities mentioned, a great saving to the State would eventually result, in addition to securing safe and desirable quarters for the organizations thus affected and excellent storage facilities for their valuable military property.

Third—That the Adjutant General's office be provided with additional room. The vast increase in the volume of business of this department has caused the present quarters to become so crowded with desks, files, filing cases, books, etc., as to be entirely inadequate for the proper performance of the work connected therewith. This additional room should include a fire-proof vault for the safe-keeping and preservation of the many valuable records on file.

Fourth—That the clerical force of the Adjutant General's office should be increased by the addition of one clerk, one bookkeeper, and one stenographer. It is imperative that the additional clerical force herein asked for be provided.

There has been a steady increase in the daily correspondence with the office during the past two years and which will continue to increase as we get farther away from the periods of the past and the late wars in which troops of California have participated. The correspondence with an office of this character is of a varied nature. Requests for certified statements of military service during the early days of the Indian disturbances, the War of the Rebellion, and the Spanish-American War—which necessitates careful and time-consuming search of the records on account of their incompleteness—are received daily from various sections of the United States, and often from foreign countries. The discharge, or other evidence of honorable service, in the later wars is often lost or destroyed, and in such cases the widow or dependent children, or father or mother, failing to find any proof of the soldier's or sailor's service, communicates with this office for a certified statement of the service performed. The records often fail to supply the desired information. A careful search is necessary, and if the service claimed is of record, a certificate thereof is furnished the applicant by mail and without expense to him. Inquiries are also constantly received from the parents, guardians, or interested friends relative to the welfare or whereabouts of soldiers or sailors now in the army, navy, or marine corps: If absent from command and in hospital, where? dead, when and where? and what disposition has been or will be made of the remains, and whether they can be brought home for burial. In the interest and for the information of the inquirers, communication is had with the proper department of the General Government, and through the courtesy of the department communicated with the information desired is received and promptly conveyed by this office to the parties concerned.

The vast amount of work required by the War Department takes almost the entire time of one clerk. With the small force now provided for it has been impossible to properly comply with the requirements of the National Government, thereby placing this department in an

unfavorable light. The great quantity of property required to be kept on hand and the large amount continually passing through the hands of the Adjutant General, and for which the National Government requires strict and accurate accountability, together with the many heads under which appropriations are carried in this office, and the many and intricate accounts with over seventy-five different headquarters and organizations, demand the services of a first-class bookkeeper. Nearly every other department of the State Government has a bookkeeper, a position which this office has never had and which should be provided for.

This department has never been provided with a stenographer. The voluminous correspondence carried on in connection, not only with the many organizations of the National Guard, but also with the War and Navy Departments of the National Government, demands the services of a good stenographer.

The records of this office in many instances are far behind. The records of service of the California Volunteers in the Spanish-American War have never been compiled, and it will be impossible to take up this important matter until sufficient help is supplied. The records of those who participated in the War of the Rebellion are becoming worn and unfit for use in their present form, necessitating their change and transfer to another form of record. In justice to those participating in these two wars, the records of their services should be carefully made and kept.

The National Government is now allowing pensions to all Civil War veterans over sixty-two years of age, and, owing to the extreme care necessary to be exercised in furnishing certificates of service, in order to prevent fraud, considerable time is thus taken up. The Government has also allowed additional time for the volunteers of the Spanish-American War to file their claims for extra pay from date of enrollment to date of muster-in to the United States service, or rejection, and the collecting, handling and compiling of these claims alone will take the entire time of one clerk for a period of six months or more.

Pensions for those who served in the various Indian Wars are also being granted, the records of which are very much scattered and difficult to trace, thereby necessitating considerable research and the consumption of much time in the preparation of certificates of service.

While there has been a vast increase in the work of this department, there has been no increase whatever in the working force since June 30, 1899. In order to keep up with the greater part of the current work, it has been found necessary for the entire force to work nights from three to four hours for the past year.

For the several reasons stated, it is, therefore, absolutely necessary that the clerical force herein asked for be permanently provided.

Fifth—That an emergency fund be established, to be used for the pay, transportation, and subsistence of the National Guard when ordered out in case of war, insurrection, rebellion, or resistance to the execution of the laws of the State, or for any other necessary purpose; said fund to be available also for the payment of expenses of troops ordered out as escort to deceased officers or State officials entitled to military honors, expenditures from such fund to be made only upon direct authorization of the Governor. In this connection it may be stated that Companies C and H, Second Infantry, located at Nevada City and Placerville respectively, have not as yet received pay for the duty performed by them in connection with the outbreak of prisoners from the State Prison at Folsom, in July, 1903.

Sixth—That a sufficient appropriation be made to compile and print five thousand copies of the history and records of the California Volunteers in the Spanish-American War of 1898. Nearly every other State in the Union has published such a history, and in justice to the 5,587 men who served in that war a history of their achievements should be published by the State.

Seventh—That an Act be passed by the Legislature prohibiting any person or persons, or organization, other than of the U. S. Army and the National Guard, from wearing uniforms or parts of uniforms similar to those authorized to be worn by members of the U. S. Army and the National Guard.

Eighth—That the Act of the Legislature entitled "An Act to furnish arms for the use of military academies in the State," approved February 20, 1872, be repealed. Under the existing conditions it is impossible for the State to furnish military academies with arms and accouterments, as the same are the property of the U. S. Government and are for issue only to the organizations of the National Guard.

Section 1 of this Act, giving to the military instructor of a military academy that complies with certain conditions the rank of major in the National Guard, is considered by this department to be unjust to those men who give a good share of their time and energies to the military service of the State and to the acquiring of commissions therein.

Ninth—That Section 1477, Political Code, relative to the military instructor at the University of California, be amended to read as follows:

SEC. 1477. The military instructor must make a report on or before the first day of August of each year, to the Adjutant General of the State, showing the number, discipline and equipment of the cadets.

The following papers are herewith submitted for your information and made appendices to this report :

- Appendix No. 1—Statement of appropriations and expenditures for military purposes, 54th and 55th fiscal years.
- “ “ 2—Statement of money received and disbursed by the Adjutant General.
- “ “ 3—Statement of accounts with United States Government.
- “ “ 4—Account of arms, accouterments, ammunition, and military property belonging to the State, or issued to the State by the United States, showing to what organizations issued.
- “ “ 5—Statement of enrolled militia.
- “ “ 6—Statement of organized strength of the National Guard and Naval Militia in detail.
- “ “ 7—Statement of dates of organization of regiments, companies, troops, and Naval Militia.
- “ “ 8—Reports of Uniform Board.
- “ “ 9—List of Adjutants General.
- “ “ 10—Register of officers, active list.

In conclusion I desire to express my appreciation of the valuable and unvarying support I have received from Your Excellency in the administration of the affairs of this department. I also desire to extend my thanks to the officers and clerks of this office for their earnest and faithful work.

Very respectfully,

J. B. LAUCK.

Adjutant General, State of California.

APPENDIX No. 1.

APPROPRIATIONS AND EXPENDITURES FOR MILITARY PURPOSES.

APPROPRIATIONS AND EXPENDITURES FOR THE FIFTY-FOURTH FISCAL YEAR, ENDING JUNE 30, 1903.

Salary of Adjutant General.

To appropriation.....	\$3,000 00

Note.—All unexpended balances in the fifty-fifth fiscal year are carried over to and become available for use in the fifty-sixth fiscal year. In most cases where unexpended balances are shown in the fifty-fifth fiscal year claims are outstanding or expenditures have been authorized sufficient to exhaust the same.

STATE OF CALIFORNIA, }
COUNTY OF SACRAMENTO. } ss.

J. B. Lauck, Adjutant General of California, being duly sworn, says that the amounts certified to in the foregoing tables, under the heads of Postage, Expressage, Telegraphing, Care of State Armory, Cleaning and Transportation of Arms, Traveling and Contingent Expenses of the Adjutant General's office, were expended for the purposes mentioned, to the best of his knowledge and belief.

J. B. LAUCK,
Adjutant General of California.

Subscribed and sworn to before me, this 15th day of September, 1904.

A. B. NYE,
Private Secretary to Governor.
